An illuminating look at how national political parties nominate presidential candidates This innovative study blends sophisticated statistical analyses, campaign anecdotes, and penetrating political insight to produce a fascinating exploration of one of America's most controversial political

institutions—the process by which our major parties nominate candidates for the presidency. Larry Bartels focuses on the nature and impact of "momentum" in the contemporary nominating system. He describes the complex interconnections among primary election results, expectations, and subsequent primary results that have made it possible for candidates like Jimmy Carter, George Bush, and Gary Hart to emerge from relative obscurity into political prominence in nominating campaigns. In the course of his analysis, he addresses questions central to any understanding—or evaluation—of the modern nominating process. How do

---

fundamental political predispositions influence the behavior of primary voters? How quickly does the public learn about new candidates? Under what circumstances will primary success itself generate subsequent primary success? And what are the psychological processes underlying this dynamic tendency? Bartels examines the likely consequences of some proposed alternatives to the nominating process, including a regional primary system and a one-day national primary. Thus the work will be of interest to political activists, would-be reformers, and interested observers of the American political scene, as well as to students of public opinion, voting

behavior, the news media, campaigns, and electoral institutions. and speed potentially lifesaving drugs to market. Biennial Report of the Attorney General of the State of Illinois. John Wiley & Sons. The Financial Services Authority (OJK) has made substantial progress in updating its regulatory and

supervisory frameworks since the last Financial Stability Assessment Program (FSAP) in 2017. The OJK has strengthened its regulatory framework, implementing the Basel III post-crisis reforms. The recently enacted Financial Sector Omnibus Law (FSOL) enhances the OJK ' s institutional set-up, powers, banking regulation and supervisory frameworks and clarifies the Financial System Stability Committee ' s (KSSK ' s) mandate for systemic risk monitoring and coordination. The OJK has developed supervision capabilities and

deployed innovative Supervisory Technologies (SupTech) to achieve greater efficiency in banking supervision. New regulations on corporate governance have elevated the importance of good governance within the banking industry. While progress has been made, the OJK must continue intensifying its efforts, considering emerging challenges in the global economic and financial environment and new risks from digitalization, cyber and climate change. The Reasoning Voter is an insider's look at campaigns, candidates, media, and voters that convincingly argues that voters make informed logical choices. Samuel L. Popkin analyzes three primary campaigns—Carter in 1976; Bush and Reagan in 1980; and Hart, Mondale, and Jackson in 1984—to arrive at a new model of the way voters sort through commercials and sound bites to choose a candidate. Drawing on insights from economics and cognitive psychology, he convincingly demonstrates that, as trivial as campaigns often appear, they provide voters with a surprising amount of information on a

---

candidate's views and skills. For all their shortcomings, campaigns do matter. "Professor Popkin has brought V.O. Key's contention that voters are rational into the media age. This book is a useful rebuttal to the cynical view that politics is a wholly contrived business, in which unscrupulous operatives manipulate the emotions of distrustful but gullible citizens. The reality, he shows, is both more complex and more hopeful than that."—David S. Broder, *The Washington Post*

Confirmation Hearing on the Nomination of Thomas B. Griffith, of Utah, to be Circuit Judge for the District of Columbia Circuit  
This book explores how the lower federal court

appointment process became vastly politicized in the modern era. Scherer develops a theory of elite mobilization, positing that lower court appointments have always been used by politicians for electoral purposes, but because of two historic changes to American institutions in the 1950s and 1960s the breakdown of the old party system, and a federal judiciary reception to expanding individuals constitutional rights politicians shifted from an

---

appointment system dominated by patronage to a system dominated by new policy-oriented appointment strategies. The use of these new strategies not only resulted in partisan warfare during the nomination and confirmation stages of the appointment process, but also led to party-polarized voting in the lower federal courts. Employing exclusive data of judicial decision-making from the New Deal era through the present, Scherer demonstrates that there was little party-

polarized voting in the lower federal courts until the late 1960s, and that once politicians began to use elite mobilization strategies, significant party-polarized voting in the lower federal courts resulted. Accordingly, elite mobilization strategies have affected not only politics in Washington, but also the way justice is distributed across the country. Illinois Attorney General's Report for the Biennium The race that's run before the one for President--that's the money

primary. But more than money must be acquired in the early campaign for President. What's often just as important in securing candidate viability and success is the media coverage garnered during this time, since this is frequently the first decisive test of a candidate's presidential strength. The election years of 1988 and 2000 stand out among recent presidential nomination campaigns because they were two elections in which both major parties had open

---

nomination contests. In this book, Michael J. Goff looks at the pre-candidacy and early candidacy periods of each of these election cycles and the decisive impact that the money primary had on both. His study confirms the pivotal importance of money and media coverage in a successful nomination bid and suggests the advent of yet a new period in the ever-evolving system of presidential selection.
