this volume can be
used independently if

to lists of words for
reading and writing
practice, presented in
a series of short

Okell includes
sample texts from
Burmese materials

Appendices on

out the book. One of
the challenges of
learning a non-
Roman script

language from traditional course books is that the use of the Roman alphabet to describe sounds is not as effective as hearing the sounds. The extensive audio files that accompany this volume allow the learner to hear and produce the sounds corresponding to the symbols. Language professors and their students, or those learning Burmese on their own, will appreciate the accessible approach and the manageable size of the lessons of the very practical textbooks in this series.

chronicles the discovery and analysis of animal fossils found in one of the most important paleontological sites in the world—Porcupine Cave, located at an elevation of 9,500 feet in the Colorado Rocky Mountains. With tens of thousands of identified specimens, this site has become the key source of information on the fauna of North America's higher elevations between approximately 1 million and 600,000 years ago, a period that saw the advance and retreat of

glaciers numerous times. Until now, little has been understood about how this dramatic climate change affected life during the middle Pleistocene. In addition to presenting state-of-the-art data from Porcupine Cave, this study also presents groundbreaking analysis on what the data from the site show about the evolutionary and ecological adjustments that occurred in this period, shedding light on how one of the world's most pressing environmental concerns—global climate

change—can influence life on earth.

“ A true classic of world literature . . . A masterpiece that has inspired generations of writers in Nigeria, across Africa, and around the world. ”
—Barack Obama

“ African literature is incomplete and unthinkable without the works of Chinua Achebe. ” —Toni

Morrison Nominated as one of America ’ s best-loved novels by PBS ’ s The Great American Read

Things Fall Apart is the first of three novels in Chinua Achebe's critically acclaimed African Trilogy. It is a classic narrative about Africa's cataclysmic encounter with Europe as it establishes a colonial presence on the continent. Told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s, Things Fall Apart explores one man's futile resistance to the devaluing of his Igbo traditions by British political and religious forces and his despair as his community capitulates to the

powerful new order. With more than 20 million copies sold and translated into fifty-seven languages, Things Fall Apart provides one of the most illuminating and permanent monuments to African experience. Achebe does not only capture life in a pre-colonial African village, he conveys the tragedy of the loss of that world while broadening our understanding of our contemporary realities.
