# Section 16 2 Evolution As Genetic Change Workbook Pages

Yeah, reviewing a ebook **Section 16 2 Evolution As Genetic Change Workbook Pages** could grow your near contacts listings. This is just one of the solutions for you to be successful. As understood, feat does not suggest that you have fantastic points.

Comprehending as competently as covenant even more than other will have the funds for each success. next-door to, the pronouncement as with ease as acuteness of this Section 16 2 Evolution As Genetic Change Workbook Pages can be taken as without difficulty as picked to act.

Chapter 16: Section 16-1  
Darwin ' s Voyage of  
Discovery  
Section 16-2: Evolution as

Genetic Change Terms in this set (17) Fewer copies of the allele would pass to future generations, and the allele could even disappear from the gene pool completely. If a trait made an organism less likely to survive and reproduce, what would happen to the allele for that trait?

DISRUPTION OF GENETIC EQUILIBRIUM

VOCABULARY REVIEW

Distinguish between the terms in each of the following pairs of terms.

1. immigration, emigration  
2. gene flow, genetic drift  
3. random mating, assortative mating ...  
c. evolution.  
d. eventual extinction.

16 2 Evolution as Genetic Change Section 16

16-2 Evolution as Genetic Change Natural selection affects which individuals survive and reproduce and which do not. Evolution is any change over time in the relative frequencies of alleles in a population. Populations, not individual organisms, can evolve over time. 16-2

### Section 16-2 Evolution as Genetic Change

Section 16-2: Evolution as Genetic Change Natural selection on single-gene traits can lead to changes in allele frequencies and thus to evolution. Natural selection can affect the distributions of phenotypes in any of three ways: directional selection, stabilizing selection, or disruptive selection.
