Over a period of several centuries, Europeans developed an intricate system of plantation agriculture overseas that was quite different from the agricultural system used at home. Though the plantation complex centered on the American tropics, its influence was much wider. Much more than an economic order for the Americas, the plantation complex had an important place in world history. These essays concentrate on the intercontinental impact.

History of the Middle Ages Heterodox Studies in the Criti

A “marvelous history”* of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years’ War, by the Pulitzer Prize–winning author of *The Guns of August* *Lawrence Wright, author of *The End of October*, in *The Wall Street Journal* The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics,

of valor and “furious follies,” a “terrible worm in an iron cocoon.” Praise for *A Distant Mirror* “Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better.”—*The New York Review of Books* “A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer.”—*The Wall Street Journal* “Wise, witty, and wonderful . . . a great book, in a great historical tradition.”—*Commentary* NOTE: This edition does not include color images.

This book is the first of its kind to engage explicitly with the practice of conceptual history as it relates to the study of the Middle Ages, exploring the pay-offs and pitfalls of using concepts in medieval history. Concepts are indispensable to historians as a means of understanding past societies, but those concepts conjured in an effort to

bring order to the infinite complexity of the past have a bad habit of taking on a life of their own and inordinately influencing historical interpretation. The most famous example is feudalism, whose fate as a concept is reviewed here by E.A.R. Brown nearly fifty years after her seminal article on the topic. The volumes contributors offer a series of case studies of other concepts 'colony', 'crisis', 'frontier', 'identity', 'magic', 'networks' and 'politics' that have been influential, particularly among historians of Britain and Ireland in the later Middle Ages. The book explores the creative friction between historical ideas and analytical categories, and the potential for fresh and meaningful understandings to emerge from their dialogue.

Accounting for History in Marx's Capital Routledge

Feudal military practices, which are as varied as those of modern times, are surveyed here for the first time. The author treats in detail the bases on which feudal service was exacted, the mustering and composition of armies and their subsequent operations in the field, and the qualifications of their commanders. He discusses military feudalism as it originated and developed in the Frankish kingdom of the Carolingians and as it operated during the early Capetian period in the Ile de France and the feudal principalities of northern France. He then follows feudal developments, in roughly chronological order, in those states where feudalism was consciously imported—lower Italy and Sicily, England, and Crusader Syria. He finally treats lands in which the military structure revealed some feudal characteristics but where institutions were never more than superficially feudalized—Southern France, Christian Spain, central and northern Italy, and Germany—describing how such factors as native military institutions,

the pattern of landholding, economic structure, and manpower problems worked to modify feudal military institutions and practices. This book will illuminate for specialist and lay reader alike a strangely neglected aspect of feudal life.

This book offers a systematic comparison between Japanese and Western political institutions in the premodern period. It offers a brief discussion of the meaning and significance of the term Feudalism, and it suggests ways in which the term might be used for explorations in comparative history. Because of its brevity, it can be used as one of many paper backs in the premodern Japanese history course, or as background reading for courses on modern Japanese history and modern Japanese politics. Given its comparative approach, it can also be used as supplement in Western or world civilization course.

Originally published in 1973, *Origins of English Feudalism* suggests that English feudalism has, for a long time, been the most controversial and thereby the most highly technical aspect of English medieval history. The book contains relevant sources that will be of use to readers and will allow them to study documentary, literary and archaeological sources from the medieval period. The debate over the establishment of feudalism

in pre-Conquest England involves not only the question of the presence or absence of fief, but also of knights and cavalry, castles and vassal commendation. This book will be of interest to academics and the ease of use and careful division of sources, will be of interest to students.

Perspectives on Britain and Ireland, 1100-1500 Éditions de la Maison des sciences de l'homme, Paris

Much of what we know about the colourful Russian middle ages comes from legal sources: the treaties of Russian-Scandinavian warlords with the Byzantine emperors, the gradual penetration of Christianity and Byzantine institutions, the endless game of war and peace among the numerous regional princes, the activities of Hanseatic merchants in the wealthy city-republic of Novgorod, the curious relationships between the Mongol conquerors and Russian rulers and church dignitaries, etc. And, at the even further fringes of medieval Europe, there were the Christian kingdoms of Armenia and Georgia, squeezed between the Islamic empires of Iran and Turkey, but each possessing their elaborate and original legal systems. A discussion of more general questions of legal history and legal anthropology precedes the treatment of these various topics.
