Resistance of the Heart Theater: Theory/Text/Performan

Civil resistance, especially in the form of massive peaceful demonstrations, was at the heart of the Arab Spring—the chain of events in the Middle East and North Africa that erupted in December 2010. It won some notable victories: popular movements helped to bring about the fall of

authoritarian governments in Tunisia, Egypt, Libya and Yemen. Yet these apparent triumphs of non-violent action were followed by disasters—wars in Syria, anarchy in Libya and Yemen, reversion to authoritarian rule in Egypt, and counter-revolution backed by external intervention in Bahrain. Looming over these events was the enduring divide between the Sunni and Shi'a branches of Islam. Why did so much go wrong? Was the problem the methods, leadership and aims of the popular movements, or the conditions of their societies? In this book, experts on these countries, and on the techniques of civil resistance, set the events in their historical, social and political contexts. They describe how governments and outside powers—including the US and

EU—responded, how Arab monarchies in Jordan and Morocco undertook to introduce reforms to avert revolution, and why the Arab Spring failed to spark a Palestinian one. They indicate how and why Tunisia remained, precariously, the country that experienced the most political change for the lowest cost in bloodshed. This book provides a vivid illustrated account and rigorous scholarly analysis of the course and fate, the strengths and the weaknesses, of the Arab Spring. The authors draw clear and challenging conclusions from these tumultuous events. Above all, they show how civil resistance aiming at regime change is not enough: building the institutions and the trust necessary for reforms to be implemented and democracy to develop is a more

difficult but equally crucial task. Protest and Resistance in the Tourist City Berkley Stoltzfus's (history, Florida State U.) 1996 book has now appeared in paper. The Rosenstrasse protest consisted almost entirely of women protesting the arrest of their Jewish husbands by the Nazis in 1943. The Nazis, surprisingly enough, gave in, and almost all of the men survived the war in their Berlin neighborhood. Using interviews with survivors and other primary resources, Stoltzfuz reconstructs the story, offering his analysis of how intermarriage with Germans was viewed by the Gestapo and by Hitler. For more than a century, from 1900 to 2006, campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals. By attracting impressive support from citizens, whose activism takes the form of protests, boycotts, civil disobedience, and other forms of nonviolent noncooperation, these efforts help separate regimes from their main sources of power and produce remarkable results, even in Iran, Burma, the Philippines, and the Palestinian Territories.

Combining statistical analysis with case studies of specific countries and territories, Erica Chenoweth and Maria J. Stephan detail the factors enabling such campaigns to succeed and, sometimes, causing them to fail. They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment, and that higher levels of participation contribute to enhanced resilience, greater opportunities for tactical

uses extensive fieldwork and statistical analysis to examine both the causes and consequences of protest. The book adopts a holistic approach, encompassing national trends in worker-state relations, local policymaking processes and the dilemmas of individual officials and activists. Instead of taking sides in the old debate over whether non-democracies like China's are on the verge of collapse or have instead found ways of maintaining their power indefinitely, it explores the daily evolution of autocratic rule. While providing a uniquely comprehensive picture of change in China, this important study proposes a new model of bottom-up change within authoritarian systems more

This is a thoughtful and sensitive analysis of the history and significance of non-violent civil resistance in the Palestinian national movement. It shows how the thread of unarmed struggle has run through the history of Palestinian liberation, from the establishment of the Israeli state, through the Nakba and to the present day. Set in this historical context, the book draws upon personal conversations and living history in order to

focus on the contemporary movement in the Occupied Palestinian Territories. By analysing this under-emphasised dimension of the Palestinian struggle, the authors argue that today, the popular resistance movement, especially in the West Bank, is the most significant form of struggle against the ongoing occupation. They also address the international dimensions of the struggle, focusing in particular on the BDS campaign, the role of Israeli and international solidarity activists, and the changing forms of engagement developed by international

agencies seeking to work on the roots of the conflict.

The Disobedient Museum: Writing at the Edge aims to motivate disciplinary thinking to reimagine writing about museums as an activity where resistant forms of thinking, seeing, feeling, and acting can be produced, and to theorize this process as a form of protest against disciplinary stagnation. Drawing on a range of cultural, theoretical, and political approaches, Kylie Message examines potential links between methods of

critique today and moments of historical and disciplinary crisis, and asks what contribution museums might make to these, either as direct actors or through activities that sit more comfortably within their institutional remit. Identifying the process of writing about museums as a form of activism, that brings together and elaborates on cultural and political agendas for change, the book explores how a process of engaged critique might benefit museum studies, what this critique might look like, and how museum studies might make a

contribution to discourses of social and political change. The *Disobedient Museum* is the first volume in Routledges innovative *Museums in Focus* series and will be of great interest to scholars and students in the fields of Museum, Heritage, Public History, and Cultural Studies. It should also be essential reading for museum practitioners, particularly those engaged with questions about the role of museums in regard to social activism and contentious contemporary challenges.

A second edition of the classic introduction to arts in social movements, fully updated and now including Black Lives Matter, Occupy Wall Street, and new digital and social media forms of cultural resistance The Art of Protest, first published in 2006, was hailed as an "essential" introduction to progressive social movements in the United States and praised for its "fluid writing style" and "well-informed and insightful" contribution (Choice Magazine). Now thoroughly revised and updated, this new edition of T. V. Reed's acclaimed work offers engaging accounts of ten key progressive movements in postwar America, from the African American struggle for civil rights beginning in the 1950s to Occupy Wall Street and Black Lives Matter in the twenty-first century. Reed focuses on the artistic activities of these movements as a lively way to frame progressive social change and its cultural legacies: civil rights freedom songs, the street drama of the Black Panthers, revolutionary murals of the Chicano movement, poetry in women's movements, the American Indian Movement's use of film and video, anti-apartheid rock music, ACT UP's visual art, digital arts in #Occupy, Black Lives Matter rap videos, and more. Through the kaleidoscopic lens of artistic expression, Reed reveals how activism profoundly shapes popular cultural forms. For students and scholars of social change and those

seeking to counter reactionary efforts to turn back the clock on social equality and justice, the new edition of *The Art of Protest* will be both informative and inspiring.

Europe. Resistance is what 'saves' European societies from an otherwise chequered record of collaboration on the part of their economic, political, cultural and religious elites. Opposition took pride of place as a legitimizing device in the post-war order and has since become an indelible part of the collective consciousness. Yet there is one exception to this trend among previously occupied territories: the British Channel Islands. Collective identity construction in the islands still relies on the notion of 'orderly and correct relations' with the Germans, while talk of 'resistance' earns raised eyebrows. The general attitude to the many witnesses of conscience who existed in the islands remains ambiguous. This book conversely and expertly argues that there was in fact resistance against the Germans in the Channel Islands and is the first text to fully explore the complex relationship that existed between the Germans and the people of the only part of the

Winner of the Pulitzer Prize and the National Book Award, this #1 New York Times bestseller chronicles a young slave's adventures as she makes a desperate bid for freedom in the antebellum South. The basis for the acclaimed original Amazon Prime Video series directed by Barry Jenkins. Cora is a slave on a cotton plantation in Georgia. An outcast even among her fellow Africans, she is on the cusp of womanhood—where greater pain

awaits. And so when Caesar, a slave who has recently arrived from Virginia, urges her to join him on the Underground Railroad, she seizes the opportunity and escapes with him. In Colson Whitehead's ingenious conception, the Underground Railroad is no mere metaphor: engineers and conductors operate a secret network of actual tracks and tunnels beneath the Southern soil. Cora embarks on a harrowing flight from one state to the next, encountering, like Gulliver, strange yet familiar iterations of her own world at each stop. As Whitehead brilliantly re-creates the

terrors of the antebellum era, he weaves in the saga of our nation, from the brutal abduction of Africans to the unfulfilled promises of the present day. The Underground Railroad is both the gripping tale of one woman's will to escape the horrors of bondage—and a powerful meditation on the history we all share. Look for Colson Whitehead's bestselling new novel, *Harlem Shuffle!* The Disobedient Museum Rutgers University Press This edited collection of essays focuses on the topic of protest during the

Enlightenment of the long eighteenth century (roughly 1670-1833). Resistance in the eighteenth century was extensive, and the act of protest to foment meaningful societal change took on many forms from the circulation of ballads, swearing of oaths, to riots and work stoppages, or the composition of essays, novels, posters, caricatures, political cartoons, as well as theater and opera. The contributors to this volume examine the causes of protest as well as the broad ways in which common artifacts such as poles, trees, drums, conchs, and songs acted as

flashpoints for conflict and vehicles of protest. Rather than approaching the topic with strict geographical, temporal, and structural limitations, this book focuses on the time period from an international perspective and an interdisciplinary scope. Because of its wide scope, this book is an important contribution to the subject that will be of interest to both faculty and students of the history of protest, resistance and the changes that these forces bring as it also reminds us that the protests of today are rooted in historical resistances of the past.

A comprehensive, engaging and timely Bakhtinian examination of the ways in which the music and lyrics of Pacific reggae, aspects of performance, a record album cover and the social and political context construct social commentary, resistance and protest. Framed predominantly by the theory and philosophy of Russian literary theorist Mikhail Bakhtin, this innovative investigation of the discourse of Pacific reggae in New Zealand produces a multi-faceted analysis of the dialogic relationships that create meaning in this genre of popular music. It focuses on the award-winning EP *What's Be Happen?* by the band Herbs, which has been recognised for its ground-breaking music and social commentary in the early 1980s. Herbs' songs address the racism and ideology of the apartheid regime in South Africa and the relationship between sport and politics, as well as universally relevant conflicts over race relations, the experiences of migrants, and the historic and ongoing loss of indigenous people's lands. The book demonstrates the striking compatibility between Bakhtin's theorisation of utterances as ethical acts and reggae music, along with the Rastafari philosophy that underpins it, which speaks of resistance to social injustice, of ethical values and the kind of society people seek to achieve. It will appeal to a cross-disciplinary audience of

scholars in Bakhtin studies; discourse analysis; popular cultural studies; the literary analysis of popular music and lyrics, and those with an interest in the culture and politics of Aotearoa New Zealand and the Pacific region.

Civil Resistance in the Arab

Spring Rowman & Littlefield
Critical social workers emphasize activism for social justice, and acknowledge that global justice movements can inform the evolution of social work practice. Yet, scholarship on community practice and citizen participation has shown varying levels of attention to the interests and context of

racialized populations. This dissertation engages this discussion by developing an understanding of what activism comes to be for migrant communities who experience social injustices across local, national and transnational scales. I draw upon a framework of citizenship, racialization and spatiality to problematize conditions of resistance through the 2009 Tamil diaspora protests in Canada. Through a Critical Discourse Analysis of print media and key informant interviews, I explore the following: (1) What are the ideologies underlying media

representations of the movement in Canada? (2) How can social work researchers ethically represent the resistance movements of others? (3) Why and how does race frame the production of suffering and spectacle through protest? (4) How can we unpack representations of racialized local groups who protest an issue unfolding elsewhere? This project highlights the challenges experienced by racialized communities' in their struggles towards citizenship, social justice and decolonization. Chapter 1 presents the context of the 2009 Tamil diaspora protests, the conceptual framework, and methodology guiding this study. In accordance with the Factor-Inwentash Faculty of Social Work's 3-paper dissertation format, Chapter 2, 3 and 4 are stand-alone papers geared towards different peer-review journals. Chapter 2 problematizes how we should represent contested resistance movements in the age of terrorism. Chapter 3 examines how racial logic frames the expression of protesters' suffering, and the construction of the Canadian public's racial apathy. Chapter 4 explores how

national media discourses racially and spatially mark protesters as "others," "outlaws," and "outsiders." The findings of this interdisciplinary study demonstrate how resistance by racialized groups in a white settler state is distorted by the indirect and direct representational politics imposed by a hegemonic West. In Chapter 5, I offer implications for social work theory, practice and education to reconsider the boundaries of social justice, incorporate a conceptualization of transnational activism as citizenship, and forefront the

politics of protest.

An essential guide to building transformative movements to address the challenges of our time, from one of the country's leading organizers and a co-creator of Black Lives Matter "Excellent and provocative . . . a gateway [to] urgent debates."—Keeanga-Yamahtta Taylor, *The New Yorker* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Time • Marie Claire • Kirkus Reviews In 2013, Alicia Garza wrote what she called "a love letter to Black people" on Facebook, in the aftermath of the acquittal of the man who murdered seventeen-year-old Trayvon Martin. Garza wrote:

Black people. I love you. I love us. Our lives matter. With the speed and networking capacities of social media, #BlackLivesMatter became the hashtag heard 'round the world. But Garza knew even then that hashtags don't start movements—people do. Long before #BlackLivesMatter became a rallying cry for this generation, Garza had spent the better part of two decades learning and unlearning some hard lessons about organizing. The lessons she offers are different from the "rules for radicals" that animated earlier generations of activists, and diverge from the charismatic, patriarchal model of the American civil rights movement. She reflects instead on how making room amongst the woke for those who are still awakening can inspire and activate more people to fight for the world we all deserve. This is the story of one woman's lessons through years of bringing people together to create change. Most of all, it is a new paradigm for change for a new generation of changemakers, from the mind and heart behind one of the most important movements of our time.
