Partial Translation of Zonaras's Epitome Historion (Epitome of History) (copy, Section 2) Nabu Press

Widely used as a primer, a text and a provocation to critical thinking, 'Studying Religion' aims to develop students' skills. The book clearly explains the methods and

theories employed in the study of religion. Essays are offered on a range of topics: from the history and functions of religion to public discourse on religion and the classification of religions. The works of key scholars - from Karl Marx, Ludwig Wittgenstein and Rudolf Otto to Mircea Eliade, James G. Frazer, and Sigmund Freud - are analysed and explored. 'Studying Religion' represents a shift away from the traditional focus of describing the exotic or curious religious 'Other' to an examination of how religious behaviours and institutions are studied. The book will be invaluable to students of religious studies.

Great Debates in American History: Economic and social questions, part 2 University of Denver, CTIR

The third volume of Professor Guthrie's great history of Greek thought, entitled The Fifth-Century Enlightenment, deals in two parts with the Sophists and Socrates, the key figures in the dramatic and fundamental shift of philosophical interest from the physical universe to man. Each of the two parts is available as a paperback with the text, bibliography and indexes amended where necessary so that each part is self-contained. Socrates dominated the controversies of this period, as he has dominated the subsequent history of western philosophy. He was the first to identify and grapple with some of the most intractable and persistent logical and philosophical problems; but he was also and has remained a highly controversial figure because of his extraordinary personal qualities and his remarkable career. Professor Guthrie offers a balanced and comprehensive picture of the man, his life, and his thought.
