China fragments, a new Cold War with Russia, Mexico challenges U.S., the new great powers Turkey, Poland and Japan. The Next 100 Years is a fascinating, eye-opening and often shocking look at what lies ahead for the U.S. and the world from one of our most incisive futurists. In his provocative book, George Friedman turns his eye on the future—offering a lucid, highly readable forecast of the changes we can expect around the world during the twenty-first century. He explains where and why future wars will erupt (and how they will be fought), which nations will gain and lose economic and political power, and how new technologies and cultural trends will alter the way we live in the new century.

The Next 100 Years draws on a fascinating exploration of history and geopolitical patterns dating back hundreds of years. Friedman shows that we are now, for the first time in half a millennium, at the dawn of a new era—with changes in store, including:

- The U.S.-Jihadist war will conclude—replaced by a second full-blown cold war with Russia.
- China will undergo a major extended internal crisis, and Mexico will emerge as an important world power.

- A new global war will unfold toward the middle of the century between the United States and an unexpected coalition from Eastern Europe, Eurasia, and the Far East; but armies will be much smaller and wars will be less deadly.
- Technology will focus on space—both for major military uses and for a dramatic new energy resource that will have radical environmental implications.
- The United States will experience a Golden Age in the second half of the century.

Written with the keen insight and thoughtful analysis that has made George Friedman a renowned expert in geopolitics and forecasting, *The Next 100 Years* presents a fascinating picture of what lies ahead.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

The World in Conflict Penguin

At turns surprising, funny, and gut-wrenching, this is the hopeful story of the ordinary yet extraordinary people who have figured out how to build lasting peace in their communities. The word "peacebuilding" evokes a story we've all heard over and over: violence breaks out, foreign nations are scandalized, peacekeepers and million-dollar donors come rushing in, warring parties sign a peace agreement and, sadly, within months the situation is back to where it started—sometimes worse. But what strategies have worked to build lasting peace in conflict zones, particularly for ordinary citizens on the ground? And why should other ordinary citizens, thousands of miles away, care? In *The Frontlines of Peace*, Severine Autesserre, award-winning researcher and peacebuilder, examines the well-intentioned but inherently flawed peace industry. With examples drawn from across the globe, she reveals that peace can grow

in the most unlikely circumstances. Contrary to what most politicians preach, building peace doesn't require billions in aid or massive international interventions. Real, lasting peace requires giving power to local citizens. The Frontlines of Peace tells the stories of the ordinary yet extraordinary individuals and organizations that are confronting violence in their communities effectively. One thing is clear: successful examples of peacebuilding around the world, in countries at war or at peace, have involved innovative grassroots initiatives led by local people, at times supported by foreigners, often employing methods shunned by the international elite. By narrating success stories of this kind, Autesserre shows the radical changes we must take in our approach if we hope to build lasting peace around us--whether we live in Congo, the United States, or elsewhere.

"An invaluable eye-witness account of life at the lower levels of the German Army during the First World War."—HistoryOfWar.org At once harrowing and lighthearted, Herbert Sulzbach's exceptional diary has been highly praised since its original publication in Germany in 1935. With the reprint of this classic account of trench warfare, it records the pride and exhilaration of what to him was the fight for a just cause. It is one of the very few available records of an ordinary German soldier during the First World War. "One of the most notable books on the Great War. It is a book which finely expressed the true soldierly spirit on its highest level; the combination of a high sense of duty, courage, fairness and chivalry."—Sir Basil Liddell Hart "Herbert Sulzbach's first person diary focuses on four years of trench warfare and is a valuable contribution to the overall individual story of the First World War, more so than many other such accounts perhaps, as the author was German."—OCAD Militaria Collectors Resources "A first-class personal account of Herbert Sulzbach's war seen through his diaries. There is much insight into both his and the German soldier's attitude to war and events . . . a very readable narrative and adds to the library of sources that are invaluable to counter the legions of postmodern re-evaluations of the German soldier."—Battlefield Guide

Health in Humanitarian Emergencies Routledge Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

From the eastern to the western front this book tells the story of war from start to end, revealing why the war started, describes the horrors of trench warfare and describes the new ways we found to kill each other including poison gas.

Technology, Politics, and the Strategic Defense Initiative : how the Reagan Administration Set Out to Make Nuclear Weapons "impotent and Obsolete" and Succumbed to the Fallacy of the Last Move National Academies Press

From two former military officers and award-winning authors, a chillingly authentic geopolitical

thriller that imagines a naval clash between the US and China in the South China Sea in 2034--and the path from there to a nightmarish global conflagration. On March 12, 2034, US Navy Commodore Sarah Hunt is on the bridge of her flagship, the guided missile destroyer USS John Paul Jones, conducting a routine freedom of navigation patrol in the South China Sea when her ship detects an unflagged trawler in clear distress, smoke billowing from its bridge. On that same day, US Marine aviator Major Chris "Wedge" Mitchell is flying an F35E Lightning over the Strait of Hormuz, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt's destroyer will lie at the bottom of the sea, sunk by the Chinese Navy. Iran and China have clearly coordinated their moves, which involve the use of powerful new forms of cyber weaponry that render US ships and planes defenseless. In a single day, America's faith in its military's strategic pre-eminence is in tatters. A new, terrifying era is at hand. So begins a disturbingly plausible work of speculative fiction, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral who has spent much of his career strategically outmaneuvering America's most tenacious adversaries. Written with a powerful blend of geopolitical sophistication and human empathy, 2034 takes us inside the minds of a global cast of characters--Americans, Chinese, Iranians, Russians, Indians--as a series of arrogant miscalculations on all sides leads the world into an intensifying international storm. In the end, China and the United States will have paid a staggering cost, one that forever alters the global balance of power. Everything in 2034 is an imaginative extrapolation from present-day facts on the ground combined with the authors' years working at the highest and most classified levels of national security. Sometimes it takes a brilliant work of fiction to illuminate the most dire of warnings: 2034 is all too close at hand, and this cautionary tale presents the reader a dark yet possible future that we must do all we can to avoid.

This volume gathers an international cast of scholars to examine the unprecedented range of colonial encounters during the First World War. More than four million men of color, and an even greater number of white Europeans and Americans, crisscrossed the globe. Others, in occupied areas, behind the warzone or in neutral countries, were nonetheless swept into the maelstrom. From local encounters in New Zealand, Britain and East Africa to army camps and hospitals in France and Mesopotamia, from cafes and clubs in Salonika and London, to anticolonial networks in Germany, the USA and the Dutch East Indies, this volume examines the actions and experiences of a varied company of soldiers, medics, writers, photographers, and revolutionaries to reconceptualize this conflict as a turning point in the history of global encounters. How did people interact across uneven intersections of nationality, race, gender, class, religion and language? How did encounters - direct and mediated, forced and unforced - shape issues from cross-racial

intimacy and identity formation to anti-colonial networks, civil rights movements and visions of a post-war future? The twelve chapters delve into spaces and processes of encounter to explore how the conjoined realities of war, race and empire were experienced, recorded and instrumentalized.

The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other?

International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions

for research on conflict resolution in a transforming world system.

A Shield in Space? Gale, Cengage Learning

This true contemporary account of an American nurse's horrific and sometimes bizarre experiences while serving at a French battlefield hospital near Soissons during World War I has poignant layers which even the often naive author did not see. "As our camion drove through the chateau gate we could see that the grounds were covered with what looked like sleeping men." That is just her own introduction to the unit, housed in what was once a country estate, and soon she was standing hours on end treating friend and enemy alike, facing harrowing hyperreality with aplomb. Shirley Millard is throughout a willing reporter of her fascinating perspective on war, youth, loss, and love -- and always slapdash surgery and gallows camaraderie, inside a MASH unit before there was M*A*S*H. And before antibiotics, it is painfully clear. But she is also an unwitting reporter of so much more. The modern reader sees truths and wrongs that Shirley fails to experience herself, some at the time and too many upon rested reflection. Even some of the pronouns she uses reveal herself and the understory more than she ever realized. The book compels attention not only on the level on which she wrote it, which would be enough to bring crashing home this forgotten war, but also on levels hidden to her. Either way the insights pierce through, as when the young French doctor sums up war: "La gloire, la gloire! Bah! C'est de la merde!" He is a hero too, but has his own incongruous scenes later, just in his smoking habits alone. This collection of diary entries and later flashbacks may be the second greatest personal account of World War I, behind that by the much more self-aware Erich Remarque (though readers here may find themselves drawn into the lack of awareness as much as the account itself). Yet this book seems to have been lost in time and the crush of later events. As *Time* reviewed it in 1936, "Spare, simply written diary of a young, red-haired U.S. volunteer nurse in French hospitals near the front lines of 1918, in which romantic interludes heighten rather than ease a grisly atmosphere." It is that, but there is a lot more to it. And much of the writing is deeper than that, and certainly crisp and evocative in prose, even if some of the depth is more for the reader than the author. Includes penetrating new Foreword by law professor Elizabeth Townsend Gard, who studied the genre as part of her Ph.D. research in History at UCLA. The original book, and its incongruities and twists revealed by Townsend Gard, will stick with you. Previously only available as a rare book, now returned to its place in poignant history. This book, though listed as "trade" or could be read by college adults, will have as its principal audience the general reader and young adults. It would be an excellent, fairly brief book to assign to classes in High School and possibly Middle

School. Although some of its scenes are stark and upsetting, and one would be cautioned to have YAs read it much as would be true of the candor of *All Quiet on the Western Front*, it has no other aspects which would make it inappropriate for minors and allows excellent discussions of war, class, race, nationalism, medicine, unsung women in war, foreshadowing and subtext, and many other themes that the author herself did not mean to raise. In other words, since the writer speaks on one level, and does not realize the other levels she touches, it would help to develop readers' critical skills to share their opinions about what she is missing in her own text. And in the process there will be no concern that the book would be inappropriate for YAs except that some of the medical and casualty moments are, of course, brutal. Also available in ebook and digital formats.

A long-awaited English translation of the groundbreaking oral history of women in World War II across Europe and Russia—from the winner of the Nobel Prize in Literature NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The Washington Post* • *The Guardian* • NPR • *The Economist* • *Milwaukee Journal Sentinel* • *Kirkus Reviews* For more than three decades, Svetlana Alexievich has been the memory and conscience of the twentieth century. When the Swedish Academy awarded her the Nobel Prize, it cited her invention of "a new kind of literary genre," describing her work as "a history of emotions . . . a history of the soul." In *The Unwomanly Face of War*, Alexievich chronicles the experiences of the Soviet women who fought on the front lines, on the home front, and in the occupied territories. These women—more than a million in total—were nurses and doctors, pilots, tank drivers, machine-gunners, and snipers. They battled alongside men, and yet, after the victory, their efforts and sacrifices were forgotten. Alexievich traveled thousands of miles and visited more than a hundred towns to record these women's stories. Together, this symphony of voices reveals a different aspect of the war—the everyday details of life in combat left out of the official histories. Translated by the renowned Richard Pevear and Larissa Volokhonsky, *The Unwomanly Face of War* is a powerful and poignant account of the central conflict of the twentieth century, a kaleidoscopic portrait of the human side of war. THE WINNER OF THE NOBEL PRIZE IN LITERATURE "for her polyphonic writings, a monument to suffering and courage in our time." "A landmark."—Timothy Snyder, author of *On Tyranny: Twenty Lessons from the Twentieth Century* "An astonishing book,

harrowing and life-affirming . . . It deserves the widest possible readership.”—Paula Hawkins, author of *The Girl on the Train* “Alexievich has gained probably the world’s deepest, most eloquent understanding of the post-Soviet condition. . . . [She] has consistently chronicled that which has been intentionally forgotten.”—Masha Gessen, National Book Award-winning author of *The Future Is History*

World History: Patterns of Interaction Columbia University Press

Is peace an aberration? The bestselling author of *Paris 1919* offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR “Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book.”—H.R. McMaster, author of *Dereliction of Duty* and *Battlegrounds: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity’s history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political

organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.
