This handbook is one of the first comprehensive research and teaching tools for the developing area of global media ethics. The advent of new media that is global in reach and impact has created the need for a journalism ethics that is global in principles and aims. For many scholars, teachers and journalists, the existing journalism ethics, e.g. existing codes of ethics, is too parochial and national. It fails to provide adequate normative guidance for a media that is digital, global and practiced by professional and citizen. A global media ethics is being constructed to define what responsible public journalism means for a new global media era. Currently, scholars write texts and codes for global media, teach global media ethics, analyse how global issues should be covered, and gather together at conferences, round tables and meetings. However, the field lacks an authoritative handbook that presents the views of leading thinkers on the most important issues for global media ethics. This handbook is a milestone in the field, and a major contribution to media ethics.

The Protection of the Right to Education by International Law Lulu.com

There's never been a greater likelihood a company and its key people will become embroiled in a cross-border investigation. But emerging unscarred is a challenge. Local laws and procedures on corporate offences differ extensively - and can be contradictory. To extricate oneself with minimal cost requires a nuanced ability to blend understanding of the local law with the wider dimension and, in particular, to understand where the different countries showing an interest will differ in approach, expectations or conclusions. Against this backdrop, GIR has published the second edition of The Practitioner's Guide to Global Investigation. The book is divided into two parts with chapters written exclusively by leading names in the field. Using US and UK practice and procedure, Part I tracks the development of a serious allegation (whether originating inside or outside a company) - looking at the key risks that arise and the challenges it poses, along with the opportunities for its resolution. It offers expert insight into fact-gathering (including document preservation and collection, witness interviews); structuring the investigation (the complexities of cross-border privilege issues); and strategising effectively to resolve cross-border probes and manage corporate reputation. Part II features detailed comparable surveys of the relevant law and practice in jurisdictions that build on many of the vital issues pinpointed in Part I.

Global Competition Enforcement New Players, New Challenges Edited by Paulo Burnier da Silveira & William Evan Kovacic In a short span of years, the landscape of global competition has changed significantly. In particular, international cooperation in competition law enforcement has greatly strengthened the battle against abuse of dominance, cartels, anticompetitive mergers and related political corruption. This thoroughly researched book explains the current situation regarding joint investigations, identifies common problems and considers possible solutions and future developments. In addition to covering issues of competition policy, its authors look in detail at practice in both merger and conduct investigations in a variety of countries. The following aspects of the subject and more are examined in depth: the interface between antitrust and anti-corruption; the digital economy's challenges to competition authorities; convergent aims and rules among different competition authorities; regional organizations with competition mandates; competition neutrality and state-owned enterprises; and leniency programmes. Although necessarily there is considerable information on major antitrust regimes like those of the United States and the European Union, chapters by local experts highlight lessons to be learned from the work of competition authorities in five continents including Argentina, Australia, Brazil, China, Colombia, India, Japan, Mauritius, Mexico, Peru and South Africa. The contributors include competition enforcers, regulators, academics, practitioners and leading commentators from a range of jurisdictions. Adding up to an authoritative analysis from the enforcer's perspective, the studies presented in the book clarify the approaches and priorities of competition enforcement authorities - including those of major emerging economies - and provide expert guidance on dealing with transnational investigations.

Antitrust lawyers, corporate counsel and interested academics as well as policymakers will benefit immeasurably from this book's wealth of informative detail.

The Olympic Games is unquestionably the largest and most important sporting event in the world. Yet who exactly is accountable for its successes and failures? This book examines the legitimacy and accountability of the International Olympic Committee (IOC). This non-governmental organisation wields extraordinary power, but there is no democratic basis for its authority. This study questions the supremacy of the IOC, arguing that there is a significant accountability deficit. Investigating the conduct of the IOC from an international legal perspective, the book moves beyond a critique of the IOC to explore potential avenues for reform, means of improving democratic procedures and increasing accountability. If the Olympics are to continue to be our most celebrated sporting event, those who organise them must be answerable to the citizens that they can potentially harm as well as benefit. Full of original insights into the inner workings of the IOC, this book is essential reading for all those interested in the Olympics, sport policy, sport management, sport mega-events, and the law.
