I grew up in the Highlands of Scotland and I became a musician while still at School. Then I made my first musical instrument at the age of just 13 years, an Appalachian Dulcimer. I joined the Royal Air Force at the age of 18. I served for 9 years and worked at many of our secret establishments. Even during my military career, I continued to play in bands as well as to write music. When time would allow, I

made guitars for myself, although most of these ended up in my friend's hands. With the bands that I formed and played in; I have been fortunate enough to have recorded 32 albums. I later formed my own company making bespoke guitars (Gordon Guitars UK) The pressure of running so many ventures simultaneously eventually took its toll and a series of heart attacks followed. So, I looked for a new and more sedate way to direct my creative juices and writing thrillers fitted that bill perfectly.

These volumes are of interest to bioscientists and to historians alike. Many authors, both as individuals and as scientists, lived and worked in the 'age of extremes' in the so-called 'short 20th century', and yet contributed significantly to the unprecedented development of life sciences in this period. These 'oral histories', set against a backdrop of the Second World War, Holocaust, and Stalinist terror, are thus of interest and relevance to older and younger generations alike. Perhaps the lessons learned from these first-hand accounts may contribute in some way to ensuring that future scientists can enjoy the fascination of science undisturbed by the avoidable tragedy of man-made events. The contributors to this volume in the Comprehensive Biochemistry series encompass a wide variety of experiences in many different countries and in very different fields of biochemistry. Some have worked close to the laboratory bench throughout their scientific life and are continuing to do so. Others have been closely engaged in organizational matters, both nationally and internationally. All mention incidents in their own career or have observed those in others that will be of interest to future historians who will record and assess the period in which our contributors have lived and worked. It was an extremely exciting time for the life sciences. It was also a period of major and often tragic historical events that deeply affected the life and work of the generation to which our contributors belong.

the Mediterranean coast, the trade routes that connected the late Bronze age cities were disrupted. Part 3 continues the stories of the descendants of Thutmose, the founding Egyptian artist. Little Petros grows into a man who loves adventures and the life of traveling. He comes upon the nomadic Bedouin and their cherished war-mares and loses his heart to them. He cannot live with them for he owes duty to his kin. He and his brothers are sent to Egypt to purchase gems, gold and linen and discover if the old trade routes remain. Nothing is as it appears, and surrounded by old animosities, old grudges, and old feuds, the three brothers barely escape Egypt with their lives. They are pursued to their new home by distant kin and old grudges. Petros grows into his manhood, discovers in himself the ability to innovate in an uncertain and changing world, forges new friendships and embarks on a tender love story.

Back in 1932, saw the birth of the first president of America - George Washington. He has been called the father of our country for leading America through its early years.

Washington also served in two major wars during his lifetime: the French and Indian War and the American Revolution. His life and career are depicted on every page with fascinating and vivid stories. His heroic exploits with the Continental Army, his presiding over the Constitutional Convention, and his magnificent performance as America's first president. Despite the reverence, his name inspires, Washington remains a lifeless waxwork for many Americans, worthy but dull. A laconic man of granite self-control, he often arouses more respect than affection. A strapping six feet, Washington was a celebrated horseman, elegant dancer, and tireless hunter, with a fiercely guarded emotional life. This book brings to vivid life a dashing, passionate man of fiery opinions and many moods. Probing his private life, he explores his fraught relationship with his crusty mother, his youthful infatuation with the married Sally Fairfax, and his often conflicted feelings toward his adopted children and grandchildren. He also provides a lavishly detailed portrait of his marriage to Martha and his complex behavior as a slave master. At the same time, Washington is an astute and surprising portrait of a canny political genius who knew how to inspire people. Not only did Washington gather around himself the foremost figures of the age, including James Madison, Alexander Hamilton, John Adams, and Thomas Jefferson, but he also brilliantly orchestrated their actions to shape the new federal government, define the separation of powers, and establish the office of the presidency.
