Security analysis is the process of deciding which securities are sound investments. True investments keep the principal safe and deliver an acceptable return. Any purchase that does not meet these criteria is speculation. Security analysis

has three functions:
Security Analysis Summary: Benjamin Graham – NicoBros
The objective of security analysis is to 1) present important facts regarding a stock or bond in a fashion that is both informing and useful for a potential owner; and 2) to reach reliable conclusions based on facts and standards concerning a security ' s safety and attractiveness relative to the current price range.

With nearly a million copies sold, Security Analysis has been continuously in print for more than sixty years. No investment book in history had either the immediate impact, or the long-term relevance and value, of its first edition in 1934. By 1951, seventeen years past its original publication and more than a decade beyond its revised and acclaimed 1940 second edition, a.
