Connect the power cable to alarm panel and switch it ON, now the system is ON. When turn on the system, it will try to make communication with GSM, so

you need to wait 20 seconds, before any operation. After 20 seconds, you can press "UP" "DOWN" icon to check the GSM level. If the LCD display "NO SIM CARD", that means the system is not inserted with valid SIM or can not detect the SIM card. If it shows signal level like "15 OK", that means the alarm system can communicate with GSM network. 2 ...
