4K security camera systems, or 8MP (2160p) security camera systems, refer to the security systems with high performance image sensors that can capture videos at 3840 x 2160 pixels. And that's four times the 1920 x 1080 pixels found in 1080p full HD security systems.

All Surveillance Systems | Costco

Digital Video Recorders (DVR) and Network Video Recorders (NVR) are the heart of every security camera system. It critiques the final outcome of your captured footage, which is the entire complexity of its existence. Naturally a consumer wants to know how clear the video resolution will be from a system before making a purchase decision.

Difference in DVR and Security Camera Resolutions

Resolution is simply a way to measure the size of the video being produced. Smaller images produce low resolution video, larger images produce HD or high definition video. It really is that simple, the larger the image being

recorded, the higher the resolution and quality. Resolution is measured in pixels.

4K IP Camera System - Lorex security cameras and security ...
Quadruple the Definition of 1080p. The 4K security cameras featured in these IP systems use advanced 8-megapixel image sensors and have approximately four times the amount of pixels as a 1080p HD security camera. This larger image sensor allows the camera to capture more light, which improves color, contrast, and low-light performance.
