It provides real-world manufacturing accounts of the introduction of reduced-lead and lead-free technology and discusses the functionality and cost effectiveness of alternative solder alloys and non-solder alternatives replacing lead-tin solders in microelectronics.

The purpose of this guidebook is to serve as a training aid in furthering the development of karate students and instructors from the Kogen Kan specifically and all karate students generally; however, if it helps only one person, then I will consider it a success. Please keep in mind that much of this information is in notation form and may only make sense with

---

proper instruction. This guidebook is only a tool to help in the retention of instruction and is not a substitute for it. Also, please keep in mind, that although others have assisted with this guidebook, all errors are my own. This guidebook is formatted in such a way as to be the beginnings of a filing and retrieval system. As each student collects more information, they can organize it by adding it to the "notes" area of the respective sections. It is hoped that all students will research, collect and share material about karate. It is this type of systematic approach that brings science to the art. It is also written so that a lesson plan can be developed quickly by choosing one or more activities from several sections. If more details are needed while teaching, they can quickly referenced in the rest of the manual. Each chapter is given a table of contents to further hasten referencing. It has a spiral coil binding so it will lay flat for easy viewing during training. Large font also helps in referencing the information from a distance. Much of this guidebook is written in Japanese. This is done for two reasons: first, it is important to learn Japanese, as it will help standardize everyone's martial arts training; and secondly, this will help keep this information in the purview of the serious. It is a barrier, which will hopefully weed out some who

may not use the martial arts for purposes which they were intended, namely the protection of self and others. Thank you for reading this guidebook. Michael P. Cogan, MSE

Bread Lover's Bread Machine Cookbook CRC Press

Treasured for centuries by karate's top masters, the Bubishi is a classic Chinese work on philosophy, strategy, medicine, and technique as they relate to the martial arts. Referred to as the "bible of karate" by famous master Chojun Miyagi, for hundreds of years the Bubishi was a secret text passed from master to student in China and later in

---

Okinawa. All of karate's legendary masters have studied it, applied its teachings, or copied passages from it. No other classic work has had as dramatic an impact on the shaping and development of karate as the *Bubishi*. Karate historian and authority Patrick McCarthy spent over ten years researching and studying the *Bubishi* and the arts associated with it. The first English translation of this remarkable martial arts manual includes numerous explanations and notes. McCarthy's work also includes groundbreaking research on Okinawan and Chinese history, as well as the fighting and healing traditions that developed in those countries, making it a gold mine for researchers and practitioners alike. For the final word on the true origins and spirit of classic Okinawan martial arts, one need look no further. This karate book is one of the best karate training supplements available.
