This reference provides a complete discussion of  
the conversion from standard lead-tin to lead-free  
solder microelectronic assemblies for low-end and

high-end applications. Written by more than 45  
world-class researchers and practitioners, the book  
discusses general reliability issues concerning  
microelectronic assemblies, as well as factors specific  
to the tin-rich replacement alloys commonly utilized  
in lead-free solders. It provides real-world  
manufacturing accounts of the introduction of  
reduced-lead and lead-free technology and discusses  
the functionality and cost effectiveness of alternative  
solder alloys and non-solder alternatives replacing  
lead-tin solders in microelectronics.

Treasured for centuries by karate's top  
masters, the *Bubishi* is a classic Chinese  
work on philosophy, strategy, medicine, and  
technique as they relate to the martial arts.  
Referred to as the "bible of karate" by  
famous master Chojun Miyagi, for  
hundreds of years the *Bubishi* was a secret  
text passed from master to student in China  
and later in Okinawa. All of karate's  
legendary masters have studied it, applied  
its teachings, or copied passages from it. No  
other classic work has had as dramatic an  
impact on the shaping and development of  
karate as the *Bubishi*. Karate historian and  
authority Patrick McCarthy spent over ten  
years researching and studying the *Bubishi*  
and the arts associated with it. The first  
English translation of this remarkable  
martial arts manual includes numerous  
explanations and notes. McCarthy's work  
also includes groundbreaking research on  
Okinawan and Chinese history, as well as  
the fighting and healing traditions that  
developed in those countries, making it a  
gold mine for researchers and practitioners  
alike. For the final word on the true origins  
and spirit of classic Okinawan martial arts,  
one need look no further. This karate book  
is one of the best karate training  
supplements available.

This book takes a unique approach to analysing foreign capital flows. Using the neighbourhood model, it analyzes foreign capital inflows from the perspective of both the source and destination countries. Focusing on China, India and the Caribbean, it explores the direct and spillover effects of foreign capital on the destination countries' economy.

A Goju Ryu Guidebook: The Kogen Kan Manual for Karate gives the reader a tool to navigate the history, exercises, equipment, techniques, kata (forms) and kumite (sparring) of Okinawan Goju Ryu Karatedo. The purpose of this guidebook is to serve as a training aid in

furthering the development of karate students and instructors from the Kogen Kan specifically and all karate students generally; however, if it helps only one person, then I will consider it a success. Please keep in mind that much of this information is in notation form and may only make sense with proper instruction. This guidebook is only a tool to help in the retention of instruction and is not a substitute for it. Also, please keep in mind, that although others have assisted with this guidebook, all errors are my own. This guidebook is formatted in such a way as to be the beginnings of a filing and retrieval system.

As each student collects more information, they can organize it by adding it to the "notes" area of the respective sections. It is hoped that all students will research, collect and share material about karate. It is this type of systematic approach that brings science to the art. It is also written so that a lesson plan can be

developed quickly by choosing one or more activities from several sections. If more details are needed while teaching, they can quickly referenced in the rest of the manual. Each chapter is given a table of contents to further hasten referencing. It has a spiral coil binding so it will lay flat for easy viewing during training.

Large font also helps in referencing the information from a distance. Much of this guidebook is written in Japanese. This is done for two reasons: first, it is important to learn Japanese, as it will help standardize everyone's martial arts training; and secondly, this will help keep this information in the purview of the serious. It is a barrier, which will hopefully weed out some who may not use the martial arts for purposes which they were intended, namely the protection of self and others. Thank you for reading this guidebook. Michael P. Cogan, MSE
