Clinical Supervision Activities for Increasing Competence and Self-Awareness Obehi Ewanfoh As identity and authenticity discourses increasingly saturate everyday life, so too have these concepts spread across the humanities and social sciences literatures. Many scholars may be interested in identity and authenticity but lack knowledge of paradigmatic or disciplinary approaches to these concepts. This volume offers readers insight into social constructionist approaches to identity and authenticity. It focuses on the processes of identification and authentication, rather than on subjective experiences of selfhood. There are no attempts to settle what authentic identities are. On the contrary, contributors demonstrate that neither identities nor their authenticity have a single or fixed meaning. Chapters provide exemplars of contemporary research on identity and authenticity, with significant diversity among them in terms of the identities, cultural milieu, geographic settings, disciplinary traditions, and methodological approaches considered. Contributors introduce readers to a number of established and emerging identity groups from sites around the world, from yogis and punks to fire dancers and social media influencers. Their conceptual work stretches from the micro-analytic to the ethno-national as authors employ a variety of qualitative methods including ethnographic fieldwork, interviewing, and the collection and analysis of naturally-occurring interactions. Several of the chapters look directly at identification and authentication while others focus on the social and cultural backdrops that structure these practices — what unites them is the adoption of social constructionist sensibilities. This book will appeal to anyone interested in understanding identity and authenticity. Handbook of Experience Science IGI Global Experience the life-changing magic of self-love! Authenticity Unlocked Sanam Writers Community and Publisher

The personal identity literature is fragmented. There is a literature on the normative topic of 'what matters in survival'. And there is a separate literature on the metaphysics of persons. But in Self and Identity, Trenton Merricks shows that some important claims about personal identity cannot even be articulated, much less evaluated, unless these topics are brought together. Merricks says that what matters in survival is constituted by its being appropriate for a present person to first-personally anticipate, and have self-interested concern with regard to, a future person's experiences. So what matters in survival is not constituted by identity with a future person. So identity is not what matters in survival. But Merricks argues that—given a metaphysics of 'enduring' persons—identity with a future person explains why it is appropriate to first-personally anticipate, and have self-interested concern with regard to, that person's experiences. So identity delivers what matters in survival. Some claim that what matters in survival is delivered not by identity, but instead by psychological continuity. Or by having the 'same self' (that is, the same values, desires, and projects). Or by narrative connectedness. Or by unity of agency. Merricks argues that these claims—unlike the claim that identity delivers what matters in survival—cannot accommodate all the ways in which personal transformations can be good, or bad, for someone. At the end of Self and Identity, Merricks puts his conclusions about what matters in survival through their paces by applying them to a new topic: personal immortality.

The impacts of tourism, an increasingly crucial area of study amongst researchers, are primarily investigated through economic, socio-cultural or environmental perspectives. The social psychological effects of tourism have not been adequately researched despite often being much more important for many destinations, especially where conflicts among

different stakeholders exist. This book investigates the social psychological effects of tourism within the scope of social psychology theory. This book introduces the concept of social psychology, as distinct from psychology and sociology, and its relationship to tourism, examines tourism within various theoretical frameworks, e.g. career ladder theory and Maslow ’ s 7 hierarchy, explores the ways in which tourism changes attitudes and finally investigates social psychological issues in tourism business. It is an important resource for advanced undergraduates, graduate students and relevant practitioners in the field of tourism, and in some cases for a broader public in the field of social psychology.

Problem-Based Learning in Higher Education: Untold Stories W. W. Norton & Company

Historically Black Colleges and Universities (HBCUs) are valuable institutions that provide intellectual domains for racial uplift, racial refuge, and cultural empowerment within a continually polarized nation. Today ’ s current racial climate reminds us of the historical context that gave birth to HBCUs and segregated athletic experiences. While the sporting life at HBCUs is an integral part of these institutions ’ mission, there is a dearth of research about HBCU athletics. In The Athletic Experience at Historically Black Colleges and Universities: Past, Present, and Persistence, leading scholars from across the nation present a holistic examination of the integral role sports have played at HBCUs. Chapters in this volume cover a range of topics, from HBCU Football Classics to economics. It begins with a historical overview of HBCUs and the early sporting life before delving into the experiences of today ’ s male and female student-athletes—including the unique perspectives of athletes who transferred from historically White colleges and universities to HBCUs. Other chapters examine economic issues at HBCUs, such as the financial viability of their athletic departments in the context of the larger NCAA economic framework, and recommendations for the future of HBCU athletics to restore both academic and athletic excellence at these institutions. An important addition to the existing literature on race in contemporary society, this volume provides a narrative of the Black experience from the historical origins of educating Blacks, their early athletic experiences, and the current state of athletics at HBCUs. The Athletic Experience at Historically Black Colleges and Universities is a significant contribution to the debate on college athletics and higher education, in general, and athletics at HBCUs, specifically. It is a must-read for sport studies scholars and students, sport management practitioners, and sport enthusiasts of the inter-workings of athletics and the HBCU experience.
