Statistical data analysis is the backbone of sound business decision making, and finding the right tool to analyse a particular business problem is the key. By learning the fundamentals of statistical reasoning and data analysis, you will be on the way to becoming a better manager, analyst or economist. By providing a framework for solving statistical problems, this seventh Australian and New Zealand edition of Business Statistics teaches skills that you can use throughout your career. The book shows you how to analyse data effectively by focusing on the relationship between the kind of problem you face, the type of data involved and the appropriate statistical technique for solving the problem. Business Statistics emphasises applications over theory. It illustrates how vital statistical methods and tools are for today's managers and analysts, and how to apply them to business problems using real-world data. Using a proven three-step Identify-Compute-Interpret (ICI) approach to problem solving, the text teaches you how to: 1. IDENTIFY the correct statistical technique by focusing on the problem objective and data type; 2. COMPUTE the statistics doing them by hand and using Excel; and 3. INTERPRET results in the context of the problem. This unique approach enhances comprehension and practical skills. The text's vast assortment of data-driven examples, exercises and cases covers the various functional areas of business, demonstrating the statistical applications that marketing managers, financial analysts, accountants, economists and others use. Learning resources such as CourseMate maximise study time to help you achieve the results you want. Completely up-to-date, the seventh edition offers comprehensive coverage, current examples and an increased focus on applications in the real world.

Health care arguably is the single most regulated industry in industrial countries, and possibly in newly industrialized and developing countries as well. But what exactly is being regulated, what are the instruments used, and what are the effects and side-effects of such regulation? Regulation of Health: Case Studies of Sweden and Switzerland seeks to resolve problems in answering these key questions regarding the health care sector in two countries - Sweden and Switzerland. The volume contains a series of studies that compare the regulation of health and health care in these two apparently very similar countries, in considerable detail. The contributing teams acquired a great deal of knowledge about health regulation in both countries; they also derived comparative predictions when regulation differs, using actual observations to check whether these predictions are borne out. These comparisons are based on the conditions prevailing in the mid-nineties.

Prof. Dr. Josef Bleymler war Direktor des Instituts für Ökonometrie und Wirtschaftsstatistik der Universität Münster. Der „Bleymler“ ist eines der erfolgreichsten Lehrbücher zur Statistik für Wirtschaftswissenschaftler. Aufgrund seines Fokus auf die Grundlagen der statistischen Ausbildung im Wirtschaftsstudium hat es einen zumutbaren Lernumfang und wird daher an vielen Universitäten und Fachhochschulen eingesetzt. Der Autor legt großen Wert auf eine gute Verständlichkeit der Ausführungen, stellt diese immer präzise dar und richtet sie auf das Wesentliche aus. Über 100 Übungsaufgaben mit Lösungen dienen der Anwendung der Methoden und der Kontrolle des Lernerfolges in Vorbereitung der Bachelor-Prüfung. Die Verarbeitung statistischer Datenmengen wird heute meistens mit Softwareanwendungen durchgeführt. Eine der am weitesten verbreiteten Anwendungen ist dabei IBM SPSS. Die Arbeit mit IBM SPSS wird im Anhang anhand der einzelnen Kapitel angeführten Übungsaufgaben dargestellt. Die ideale Ergänzung zu diesem Lehrbuch: Bleymler/Gehlert Statistische Formeln, Tabellen und Statistik-Software 12. Auflage, 10 € ISBN 978-3-8006-3850-5 Dieses Taschenbuch mit statistischen Formeln und Tabellen eignet sich zur Verwendung in Klausuren und macht das Schreiben gesonderter Formelblätter weitgehend überflüssig.

Darüber hinaus enthält es Kurzübersichten über ausgewählte Statistik-Software. Regulation of Health: Case Studies of Sweden and Switzerland Springer Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics, held at the University of Oregon. Most chapters focus on single languages, addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation, in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daats'i?in (Gumuzic) stands out as the first-ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese border lands.

This edition of Business Statistics is designed specifically for beginning statistics students who require a book on statistics that will explain everything, without leaving out any of the steps in the process. It summarises what students need to know shows how to select the correct technique to solve a problem but it doesn't take an overly mathematical approach. Designed to cover a twelve week semester, this text can be used for first year undergraduate students, for those studying at a technical college, or as part of a bridging unit for those wishing to enter university. This updated 2nd edition of Business Statistics features a Solutions Manual and Solution Slides for the instructor. This customised eBook has been created with the content you need for your studies. Due to the process used to produce this customised eBook, it doesn't offer the same functionality available in other Cengage eBooks, including read aloud and copy text.

This book is about marketing models and the process of model building. Our primary focus is on models that can be used by managers to support marketing decisions. It has long been known that simple models usually outperform judgments in predicting outcomes in a wide variety of contexts. For example, models of judgments tend to provide better forecasts of the outcomes than the judgments themselves (because the model eliminates the noise in judgments). And since judgments never fully reflect the complexities of the many forces that influence outcomes, it is easy to see why models of actual outcomes should be very attractive to (marketing) decision makers. Thus, appropriately constructed models can provide insights about structural relations between marketing variables. Since models explicate the relations, both the process of model building and the model that ultimately results can improve the quality of marketing decisions. Managers often use rules of thumb for decisions. For example, a brand manager will have defined a specific set of alternative brands as the competitive set within a product category. Usually this set is based on perceived similarities in brand characteristics, advertising messages, etc. If a new marketing initiative occurs for one of the other brands, the brand manager will have a strong inclination to react. The reaction is partly based on the manager's desire to maintain some competitive parity in the marketing variables.

Floods are difficult to prevent but can be managed in order to reduce their environmental, social, cultural, and economic impacts. Flooding poses a serious threat to life and property, and therefore it's very important that flood risks be taken into account during any planning process. This handbook presents different aspects of flooding in the context of a changing climate and across various geographical locations. Written by experts from around the world, it examines flooding in various climates and landscapes, taking into account environmental, ecological, hydrological, and geomorphic factors, and considers urban, agriculture, rangeland, forest, coastal, and desert areas. Features Presents the main principles and applications of the science of floods, including engineering and technology, natural science, as well as sociological implications. Examines flooding in various climates and diverse landscapes, taking into account environmental, ecological, hydrological, and geomorphic factors. Considers floods in urban, agriculture, rangeland, forest, coastal, and desert areas Covers flood control structures as well as preparedness and response methods. Written in a global context, by contributors from around the world.

This book is concerned with a class of copular clauses known as specificational clauses, and its relation to other kinds of copular structures, predicational and equative clauses in particular. Based on evidence from Danish and English, I argue that specificational clauses involve the same core predication structure as predicational clauses — one which combines a referential and a predicative expression to form a minimal predicational unit — but differ in how the predicational core is realized syntactically.

Predicational copular clauses represent the canonical realization, where the referential expression is aligned with the most prominent syntactic position, the subject position. Specificational clauses involve an unusual alignment of the predicative expression with subject position. I suggest that this unusual alignment is grounded in information structure: the alignment of the less referential DP with the subject position serves a discourse connective function by letting material that is relatively familiar in the discourse appear before material that is relatively unfamiliar in the discourse. Equative clauses are argued to be fundamentally different.

Marketing Research 4th Asia-Pacific edition continues to equip students with the knowledge and skills required to successfully undertake marketing research. Combining a solid theoretical foundation with a practical, step-by-step approach, the marketing research process is explored through a learning model that is constantly reinforced throughout the text. Using a raft of contemporary local and international examples, data sets and case studies to explain traditional marketing research methods, Marketing Research also examines new theories and techniques. To reflect emerging industry practices, each stage of research reporting is detailed, as well as a range of presentation methodologies. This edition of Marketing Research continues to integrate Qualtrics, a robust and easy-to-use online survey tool that provides students with a platform for designing, distributing and evaluating survey results, to strengthen its 'learning by doing' approach. For analysing data, the text covers both SPSS and EXCEL outputs. This text is indispensable for students studying marketing research in any business or marketing course.

Catch Up Maths & Stats, second edition CRC Press

Catch Up Maths & Stats covers the core maths skills you will need on any life or medical sciences course including: working with fractions and powers preparation of a dilution series how to calculate standard deviation using and understanding graphs analysing enzyme kinetics choosing the right statistical test Over 200 examples are provided to show the relevance and application of maths and stats to your course. This second edition also now provides further coverage of differentiation and integration alongside nearly 70 more questions and answers to help you test your understanding. Catch Up Maths & Stats will bring you up to speed in the shortest possible time, even if you didn't study maths at advanced level.

The emergent phenomena of virtual reality, augmented reality, and mixed reality is having an impact on ways people communicate with technology and with each other. Schools and higher education institutions are embracing these emerging technologies and implementing them at a rapid pace. The challenge, however, is to identify well-defined problems where these innovative technologies can support successful solutions and subsequently determine the efficacy of effective virtual learning environments. Emerging Technologies in Virtual Learning Environments is an essential scholarly research publication that provides a deeper look into 3D virtual environments and how they can be developed and applied for the benefit of student learning and teacher training. This book features a wide range of topics in the areas of science, technology, engineering, arts, and math to ensure a blend of both science and humanities research. Therefore, it is ideal for curriculum developers, instructional designers, teachers, school administrators, higher education faculty, professionals, researchers, and students studying across all academic disciplines.

Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World contains the contributions presented at the ITA-AITES World Tunnel Congress 2023 (Athens, Greece, 12 – 18 May, 2023). Tunnels and underground space are a predominant engineering practice that can provide sustainable, cost-efficient and environmentally friendly solutions to the ever-

growing needs of modern societies. This underground expansion in more diverse and challenging infrastructure types or to novel underground uses can foster the changes needed. At the same time, the tunneling and underground space community needs to be better prepared and equipped with knowledge, tools and experience, to deal with the prevailing conditions, to successfully challenge and overcome adversities on this path. The papers in this book aim at contributing to the analysis of challenging conditions, the presentation and dissemination of good practices, the introduction of new concepts, new tools and innovative elements that can help engineers and all stakeholders to reach their end goals. Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World covers a wide range of aspects and topics related to the whole chain of the construction and operation of underground structures: Knowledge and Passion to Expand Underground for Sustainability and Resilience Geological, Geotechnical Site Investigation and Ground Characterization Planning and Designing of Tunnels and Underground Structures Mechanised Tunnelling and Microtunnelling Conventional Tunnelling, Drill-and-Blast Applications Tunnelling in Challenging Conditions - Case Histories and Lessons Learned Innovation, Robotics and Automation BIM, Big Data and Machine Learning Applications in Tunnelling Safety, Risk and Operation of Underground Infrastructure, and Contractual Practices, Insurance and Project Management The book is a must-have reference for all professionals and stakeholders involved in tunneling and underground space development projects.

As the world rapidly moves online, sectors from management, industry, government, and education have broadly begun to virtualize the way people interact and learn. Virtual Learning Environments: Concepts, Methodologies, Tools and Applications is a three-volume compendium of the latest research, case studies, theories, and methodologies within the field of virtual learning environments. As networks get faster, cheaper, safer, and more reliable, their applications grow at a rate that makes it difficult for the typical practitioner to keep abreast. With a wide range of subjects, spanning from authors across the globe and with applications at different levels of education and higher learning, this reference guide serves academics and practitioners alike, indexed and categorized easily for study and application.
