The City and The River is a political fable. Using an artistically satisfying combination of fantasy, prophecy, and a startlingly real vision of everyday politics, this novel is truly a parable of the times. The City is all cities. The River is the mother of cities. The Grand Master rules the city by the river and is determined to become its unchallenged King. Things move smoothly in this earthly Eden, till a strange prophecy is made by the palace astrologer. The learned man predicts the crowning of a new King in place of the Grand Master. With quiet humour and characteristic skill, Joshi plots the path of intrigue and corruption in high places. The Grandmaster is surrounded by a coterie of fawning councillors, whose sole aim is to remain in limelight and improve their hierarchical standing. The politics in the novel has unmistakable echoes of the Emergency period of 1974-75; acquisition of unlimited powers, presence of self-seeking sycophants, shadow of an heir apparent, and loss of individual freedom pose significant questions about identity, commitment and faith in a hostile society. The story is narrated in easy flowing prose blending political satire with philosophical and spiritual dimensions.

Kelsen, Hans. Pure Theory of Law. Translation from the Second German Edition by Max Knight. Berkeley: University of California Press, 1967. x, 356 pp. Reprinted 2005 by The Lawbook Exchange, Ltd. ISBN 1-58477-578-5. Paperbound. \$36.95 * Second revised and enlarged edition, a complete revision of the first edition published in 1934. A landmark in the development of modern jurisprudence, the pure theory of law defines law as a system of coercive norms created by

the state that rests on the validity of a generally accepted Grundnorm, or basic norm, such as the supremacy of the Constitution. Entirely self-supporting, it rejects any concept derived from metaphysics, politics, ethics, sociology, or the natural sciences. Beginning with the medieval reception of Roman law, traditional jurisprudence has maintained a dual system of "subjective" law (the rights of a person) and "objective" law (the system of norms).

Throughout history this dualism has been a useful tool for putting the law in the service of politics, especially by rulers or dominant political parties. The pure theory of law destroys this dualism by replacing it with a unitary system of objective positive law that is insulated from political manipulation. Possibly the most influential jurist of the twentieth century, Hans Kelsen [1881-1973] was legal adviser to Austria's last emperor and its first republican government, the founder and permanent advisor of the Supreme Constitutional Court of Austria, and the author of Austria's Constitution, which was enacted in 1920, abolished during the Anschluss, and restored in 1945. The author of more than forty books on law and legal philosophy, he is best known for this work and *General Theory of Law and State*. Also active as a teacher in Europe and the United States, he was Dean of the Law Faculty of the University of Vienna and taught at the universities of Cologne and Prague, the Institute of International Studies in Geneva, Harvard, Wellesley, the University of California at Berkeley, and the Naval War College. Also available in cloth.
