International Catalogue of Scientific Literature BoD – Books on Demand

As in the successful first edition, this book provides straightforward information on plastic materials and technology, including the options for recycling plastics, with special focus on mechanical recycling. This new edition reflects the great strides that have been made to increase recycling rates worldwide in recent years. It considers the expansion of infrastructure in the UK to support plastic recycling and major achievements that have been made in gaining widespread public support and participation for recycling schemes; specifically the need to manage waste on an individual household level. Current issues surrounding council recycling of plastic bottles, and the practice of providing free plastic carrier bags by

supermarkets, are also considered.

Biopolymers are expected to have a major impact on plastic markets in the future and therefore some of the issues of biodegradability versus recycling are expanded in this second edition, as is the wider context of life cycle analysis and legislation.

nutritional purposes are on the horizon using bacteria, fungi, yeast, and microalgae as production organisms. The ability to manipulate microbial culture conditions and genetically modify the organisms means that oils can be developed to fit particular applications. These 16 contributions discussing current research would be enhanced by an index.

Source separation of waste and subsequent recycling processes are promising solutions on the road to a circular economy. They reduce waste disposal and the need for resource deployment, while also producing secondary raw materials; as such, they have a significant effect on climate

---

protection. This book presents source separation technologies and related aspects that form the basis for efficient recycling and a modern approach to waste management. It examines legislative drivers and policy aspects of adequate waste collection schemes, as well as segregation technologies and the success factors for their implementation. Summarizing the outcomes of a Sino-German workshop, the focus of this volume is mainly on the current situation in China and Germany. However, the findings are applicable to a broad range of situations and regions around the world. In addition, the book demonstrates the relevance of source separation for climate protection and

describes alternative separation technologies. Given the breadth and depth of its coverage, the volume will appeal to environmental scientists, engineers, economists, waste managers and policymakers alike.

Vibration Problems in Machines explains how to infer information about the internal operations of rotating machines from external measurements through methods used to resolve practical plant problems. Second edition includes summary of instrumentation, methods for establishing machine rundown data, relationship between the rundown curves and the ideal frequency response function. The section on balancing has been expanded and examples are given on the strategies for balancing a rotor with a bend, with new section on instabilities. It includes case studies with real plant data, MATLAB® scripts and functions for the modelling and analysis of rotating machines.

India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern

---

lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

Introduction to Plastics Recycling Office the Kuf Publishing, Incorporated

Six years ago, at the end of my professional career in the oil industry, I left my management position within Agip S.p.A., a

major multinational oil company whose headquarters are in Italy, to take up the chair in reservoir engineering at the University of Bologna, Italy. There, I decided to prepare what was initially intended to be a set of lecture notes for the students attending the course. However, while preparing these notes, I became so absorbed in the subject matter that I soon found myself creating a substantial volume of text which could not only serve as a university course material, but also as a reference for wider professional applications. Thanks to the interest shown by the then president of Agip, Ing. Giuseppe Muscarella, this did indeed culminate in the publication of the first Italian edition of this book in 1989. The translation into English and publication of these volumes owes much to the

---

encouragement of the current president of Agip, Ing. Guglielmo Moscato. My grateful thanks are due to both gentlemen. And now - the English version, translated from the second Italian edition, and containing a number of revisions and much additional material. As well as providing a solid theoretical basis for the various topics, this work draws extensively on my 36 years of worldwide experience in the development and exploitation of oil and gas fields.

A Forester's Log is a unique forest story, told

---

from a forester's viewpoint-the view of John La Gerche, one of the first generation of foresters in Victoria, who managed the Ballarat-Creswick State Forest in the late nineteenth century. La Gerche's Letter Books and Pocket Books have survived to provide a rare insight into a bailiff-forester's burdens in the 1880s and 1890s. As a bailiff, he daily had to confront prop cutters and woodcarters, 'scamps and vagabonds' who constantly defied forest regulations. His pioneering work helped shape today's forested landscape around the Central Victorian goldfields town of Creswick, 'the home of forestry'. In the detailed correspondence between this amateur forester and his bureaucratic masters lies the human story of an ordinary yet remarkable man, endeavouring to strike a fair balance between the competing demands of local woodcutters and distant officials. Angela Taylor reads between the

lines to create a beautifully perceptive portrait of a vanishing character type-the truly committed public servant. A Forester's Log is an illuminating and charming book which will appeal to a wide range of readers, both urban and rural, including those interested in conservation and landscape heritage.

Physiology of Exercise and Sport AASHTO

This book comprehensively rethinks the relationship between G.K. Chesterton and a range of key literary modernists. When Chesterton and modernism have previously been considered in relation to one another, the dynamic has typically been conceived as one of mutual hostility, grounded in Chesterton's advocacy of popular culture and modernist literature's appeal to an aesthetic elite. In setting out to challenge this binary narrative, Shallcross establishes for the first time the depth and ambivalence of Chesterton's engagement with modernism, as well as the reciprocal fascination of

---

leading modernist writers with Chesterton's fiction and thought. Shallcross argues that this dynamic was defined by various forms of parody and performance, and that these histrionic expressions of cultural play not only suffused the era, but found particular embodiment in Chesterton's public persona. This reading not only enables a far-reaching reassessment of Chesterton's corpus, but also produces a framework through which to re-evaluate the creative and critical projects of a host of modernist writers—most sustainedly, T.S. Eliot, Wyndham Lewis, and Ezra Pound—through the prism of Chesterton's disruptive presence. The result is an innovative study of the literary performance of popular and 'high' culture in early twentieth-century Britain, which adds a valuable new perspective to continuing critical debates on the parameters of modernism.
