Developmental Education is an approach to education in school that aims at promoting children's cultural development and their abilities to participate autonomously and well-informed in the cultural practices of their community. From the point of view of Cultural-historical Activity theory (CHAT), a play-based curriculum has been developed over the past decades for primary school, which presents activity contexts for pupils in the classroom that create learning and teaching opportunities for helping pupils with appropriating cultural knowledge, skills, and moral understandings in meaningful ways. The approach is implemented in numerous Dutch primary schools classrooms with the explicit intention to support the learning of both pupils and teachers. The book focuses especially on education of young children (4 – 8 years old) in primary school and presents the underpinning concepts of this approach, and chapters on examples of good practices in a variety of subject matter areas, such as literacy (vocabulary acquisition, reading, writing), mathematics, and arts. Successful implementation of Developmental Education in the classroom strongly depends on dynamic assessment and continuous observations of young pupils' development. Strategies for implementation of both the teaching practices and assessment strategies are discussed in detail in the book.

This is a new kind of textbook for courses in introductory linguistics. It makes clear what is important or essential, and omits what is not. It is strictly selective, highly structured, focused, to-the-point and informative. It presents material in a way that mirrors the structure of a typical semester of teaching, and integrates many exercises into the text. In doing this it meets the need of the busy student who wants the text book to get straight to the point; and it suits the instructor looking for a textbook which not only identifies key material, but integrates it with numerous exercises, engaging the student in active learning. The book organises, develops, integrates, and practices topics more thoroughly than other textbooks. Chapters are short, each corresponding, generally, to two typical class periods. They are organised in a very clear way, with numbered and labelled sections. They present information in lists and provide generous illustrative material. Each chapter concludes with an outline, a list of new concepts and terms, and with a set of short, often objective, exercises. Thus the book will serve both as a study guide and as a textbook for beginning students. *Essential Introductory Linguistics* is supported by an instructor's manual.

This book examines the regulatory framework, regulatory objectives, regulatory logics, regulatory instruments, regulatory failures, and regulatory responses in China's financial market after the global financial crisis. The book provides an in-depth analysis of China's contemporary financial regulatory system, focusing on risks, regulation, and policies in practice. By drawing on public and private interest theories relating to financial regulation, the book contends that the controlled development of the banking sector, and the financial sector generally, has transformed China's banks into more market-oriented institutions and increased public sector growth. However, China's financial market and financial regulation have some inherent weaknesses and deficiencies. This book also offers insights into how this can be improved or adapted to minimize systemic risks in China's financial sector. This book tries to prove that financial regulation is not just a vehicle for maintaining efficient financial markets but a primary tool through which the Chinese government achieves its political and economic objectives. More fundamentally, according to

the law and finance theory, strong market and vibrant judicial systems are needed to further modernize China's financial markets and market economy. The book will be a useful reference for anyone interested in learning from the Chinese experience.

It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss.
