A Septic Tank System for Your Home CRC Press  
From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they’ve long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there’s something interesting about everything (...except maybe jackhammers).

Septic Systems & Sand Filters Firefly Books Limited  
"Get Rid of Boat Odors," by Peggie Hall, known by many of her fans as "The Headmistress," will teach you how to eliminate annoying odors on your boat by treating the source instead of perfuming the symptoms. It covers all aspect of marine sanitation as well as other odor causing problems, like dirty bilge areas, in an easy to understand format. The focus is to instruct the reader on how to resolve odor problems, not just disguise them. In addition, there are extensive appendices providing detailed contact information on equipment manufacturers and schematics of most major brands and models of marine toilets that will allow the reader to make necessary repairs with a high degree of confidence. "Get rid of Boat Odors" is a book for boat owners or professionals in the boating industry alike. It's the most comprehensive guide available to help solve the widespread problem of annoying odors on boats.  
*Septic System Maintenance Pure & Simple : a Guide for Homeowners : Your Simple Step-by-step Guide to Septic Systems Maintenance and Trouble-shooting* Shelter Publications, Inc.

**Septic Systems and Ground-water Protection: An executive's guide** McGraw Hill Professional  
A detailed Guide to Sustainable Decentralized Wastewater Systems Covering technical principles and practical applications, this comprehensive resource explains how to design and construct sound and sustainable decentralized wastewater systems of varying sizes and in differing geophysical conditions. Planning and Installing Sustainable Onsite Wastewater Systems covers state-of-the-art techniques, materials, and industry practices, and provides detailed explanations for why certain approaches result in more sustainable projects. A rational approach is presented for assessing assimilative capabilities of soils, and selecting methods of wastewater treatment and dispersal that make optimal use of natural treatment processes and site conditions. In-depth design and construction information highlights nonproprietary methods proven to be very sustainable and cost effective on a long-term basis for many geographic settings. Step-by-step illustrations and project examples featuring real-world implementations of onsite wastewater systems are included in this definitive volume. Planning and Installing Sustainable Wastewater Systems covers: Sustainability factors and planning considerations for decentralized wastewater systems Project planning and site evaluation Wastewater collection and conveyance methods Design and installation of primary treatment units Comparisons of secondary and advanced treatment methods Sand filter construction Subsurface flow wetland performance and construction Effluent dispersal methods Design and installation of low-pressure dosed effluent dispersal systems  
Septic Tank Options and Alternatives
