Do's and Don'ts Homeowner's Brochure | Septic Systems ...
A septic system is the most common method of sewage treatment for homes and businesses that are not connected to an area wide

sewage system. In its basic form, a septic system consists of a septic tank, where solids settle and decompose, and a drainfield where liquid discharged from the tank is treated by bacteria in the soil. More complex septic systems are installed in areas with high groundwater and/or poor soils.

Septic System Owner's Guide - Florida Department of Health
By keeping harmful materials out of the system and by pumping out the septic tank at least every 3 years,

the homeowner can protect his or her system against premature failure. The approximate \$300 cost of having the tank pumped is wise insurance to protect a substantial investment.
