Road traffic collisions kill about 1.2 million people around the world every year but they are largely neglected as a health and development issue, perhaps because they are still viewed by many as being beyond human control. Efforts to prevent road traffic injuries are hampered by a lack of human capacity. Policy-makers, researchers and practitioners need information on effective prevention

measure and on how to develop, implement and evaluate such interventions. There is a need to train more specialists in road traffic injury prevention in order to address the growing problem of road traffic injuries at international levels.

For over a century and in scores of countries, patriarchal presumptions and practices have been challenged by women and their male allies. “ Sexual harassment ” has entered common parlance; police departments are equipped with rape kits; more than half of the national legislators in Bolivia and Rwanda are women; and a woman candidate won the plurality of the popular votes in the 2016 United

States presidential election. But have we really reached equality and overthrown a patriarchal point of view? The Big Push exposes how patriarchal ideas and relationships continue to be modernized to this day. Through contemporary cases and reports, renowned political scientist Cynthia Enloe exposes the workings of everyday patriarchy—in how Syrian women civil society activists have been excluded from international peace negotiations; how sexual harassment became institutionally accepted within major news organizations; or in how the UN Secretary General ’ s post has remained a masculine domain. Enloe then lays out strategies and skills for

challenging patriarchal attitudes and operations. Encouraging self-reflection, she guides us in the discomforting curiosity of reviewing our own personal complicity in sustaining patriarchy in order to withdraw our own support for it. Timely and globally conscious, *The Big Push* is a call for feminist self-reflection and strategic action with a belief that exposure complements resistance.

The global financial system has proven increasingly unstable and crisis-prone since the early 1980s. The system has failed to serve either creditors or debtors well. This has been reinforced by the global financial crisis of 2008, where we have seen systemic weaknesses bring rich countries to the brink of bankruptcy and visit appalling suffering on the poorest citizens of poor countries. Yet the regulatory responses to this crisis have involved little thinking from outside the box in which the crisis was delivered to the world. This book presents a powerful indictment of this regulatory failure and calls for greatly increased attention to international financial

law and analyses new regulatory measures with the potential to make a new recognition of the principles that ought to underlie it. Using a historical approach that compares the various financial crises of the past three decades, the authors clearly show how misconceived economic policy responses have paved the way for each next 'crash'. Among the numerous topics that arise in the course of this revealing analysis are the following: overvalued exchange rates; excess liquidity in rich countries; premature liberalisation of local financial markets; capital controls; derivatives markets; accounting standards; credit ratings and the conflicts in the role of credit rating agencies; investor protection arrangements; insurance companies; and payment, clearing and settlement activities. The authors offer detailed commentary on: the role of multilateral development banks, the IMF and the WTO in responding to crises; the role of the Basel Accords, the Financial Stability Forum and Board, and the responses of the European Commission, the US, and the G20 to the most recent crisis. The book concludes by exploring systemic game-changing reforms such as bank levies, financial activities taxes and financial transaction taxes, and a global sovereign bankruptcy regime; as well as measures to remove the currency mismatches from the

balance sheets of developing countries. Apart from its great usefulness as a detailed introduction to the international financial system and its regulation, the book is enormously valuable for its clear identification of the areas of regulatory failure, and its analysis of new regulatory approaches that offer the potential for a genuinely more stable system. Banking and investment policymakers at every level, the lawyers that serve these markets and the regulators that seek to regulate them, cannot afford to neglect this book.

NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES "Irreversible Damage . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts." —Janice Turner, The Times of London Until just a few years ago, gender dysphoria—severe discomfort

in one's biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as "transgender." These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans "influencers." Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and "gender-affirming" educators and therapists who push life-changing interventions on young girls—including

medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to "detransitioners"—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls' social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier's essential book will help you understand what the trans craze is and how you

can inoculate your child against it—or how to retrieve her from this dangerous path. Globalization and Militarism Univ of California Press  
Ever since the uprisings that swept the Arab world, the role of Arab women in political transformations received unprecedented media attention. The copious commentary, however, has yet to result in any serious study of the gender dynamics of political upheaval. Rethinking Gender in Revolutions and Resistance is the first book to analyse the interplay between moments of sociopolitical transformation, emerging subjectivities and the different modes of women's agency in forging new gender norms in the Arab world. Written by scholars and activists from the countries affected, including Palestine, Egypt, Tunisia and Libya, this is an important addition to Middle Eastern gender studies. Maneuvers takes readers on a global tour of the sprawling process called "militarization." With her incisive verve and moxie, eminent feminist Cynthia Enloe shows that the people who become militarized are not just the obvious ones—executives and factory floor workers who make fighter planes, land mines, and

---

intercontinental missiles. They are also the employees of food companies, toy companies, clothing companies, film studios, stock brokerages, and advertising agencies. Militarization is never gender-neutral, Enloe claims: It is a personal and political transformation that relies on ideas about femininity and masculinity. Films that equate action with war, condoms that are designed with a camouflage pattern, fashions that celebrate brass buttons and epaulettes, tomato soup that contains pasta shaped like Star Wars weapons—all of these contribute to militaristic values that mold our culture in both war and peace. Presenting new and groundbreaking material that builds on Enloe's acclaimed work in *Does Khaki Become You?* and *Bananas, Beaches, and Bases*, *Maneuvers* takes an international look at the politics of masculinity, nationalism, and globalization. Enloe ranges widely from Japan to Korea, Serbia, Kosovo, Rwanda, Britain, Israel, the United States, and many points in between. She covers a broad variety of subjects: gays in the military, the history of "camp followers," the politics of women who have sexually serviced male soldiers, married life

in the military, military nurses, and the recruitment of women into the military. One chapter titled "When Soldiers Rape" explores the many facets of the issue in countries such as Chile, the Philippines, Okinawa, Rwanda, and the United States. Enloe outlines the dilemmas feminists around the globe face in trying to craft theories and strategies that support militarized women, locally and internationally, without unwittingly being militarized themselves. She explores the complicated militarized experiences of women as prostitutes, as rape victims, as mothers, as wives, as nurses, and as feminist activists, and she uncovers the "maneuvers" that military officials and their civilian supporters have made in order to ensure that each of these groups of women feel special and separate. *Searching for Women in a New Age of Empire* University of Illinois Press

Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three public workshops

between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

Prominent economists reconsider the fundamentals of economic policy for a post-crisis world. In 2011, the International Monetary Fund invited prominent economists and economic policymakers to consider the brave new world of the post-crisis global economy. The result is a book that captures the state of macroeconomic thinking at a transformational moment. The crisis and the weak recovery that has followed raise fundamental questions concerning macroeconomics and economic policy. These top economists discuss future directions for monetary policy, fiscal policy, financial regulation, capital-account management, growth strategies, the international monetary system, and the economic models that should underpin thinking about critical policy choices. In *Seriously!*, Cynthia Enloe, author of the groundbreaking analysis of globalization, *Bananas, Beaches, and Bases*, addresses two deeply gendered and contested questions: Who is taken seriously? And who gets to bestow the label "serious" on others? With a strategy of taking both women and gender dynamics seriously, Cynthia Enloe investigates the Dominique Strauss-Kahn affair and the banking crash of 2008, the subsequent recession, as well as UN peacekeeping and the ongoing Egyptian revolution. Each case study highlights the gritty experiences of women in diverse circumstances—in banks, on the job market, in war zones, and in revolutions. The results of taking women seriously are fresh insights into what fuels the cultures of hyper – risk taking, of sexual harassment, and the denial of women ’ s

post-war security.

The Political Economy of the Andean Region  
Crown

Critically acclaimed author and psychoanalyst Mikita Brottman offers literary true crime writing at its best, taking us into the life of a murderer after his conviction—when most stories end but the defendant's life goes on. On February 21, 1992, 22-year-old Brian Bechtold walked into a police station in Port St. Joe, Florida and confessed that he ’ d shot and killed his parents in their family home in Silver Spring, Maryland. He said he ’ d been possessed by the devil. He was eventually diagnosed with schizophrenia and ruled “ not criminally responsible ” for the murders on grounds of insanity. But after the trial, where do the "criminally insane" go? Brottman reveals Brian's inner life leading up to the murder, as well as his complicated afterlife in a maximum security psychiatric hospital, where he is neither imprisoned nor free. During his 27 years at the hospital, Brian has tried to escape and been shot by police, and has witnessed three patient-on-patient murders. He ’ s experienced the drugging of patients beyond recognition, a sadistic system of rewards and punishments, and the short-lived reign of a crazed psychiatrist-turned-stalker. In the tradition of *One Flew Over The Cuckoo ’ s Nest*, *Couple Found Slain* is an insider ’ s account of life in the underworld of forensic psych wards in America and the forgotten lives of those held there, often indefinitely.

Political Crises, Social Conflict and Economic Development is a rare attempt to undertake comparative political economy analysis of the Andean region and thus represents a welcome contribution. . . It is clearly written and will engage scholars interested in Latin America from a wide range of disciplines. Jonathan di John, *Journal of Agrarian Change* This collection of essays on the political economy of the Andean region goes to the heart of the struggle these smaller economies face in completing crucial reforms and achieving higher growth. Andr é s Solimano has brought together the best and the brightest talent from each country, the result being the most compelling analysis ever of how enclave development and a historical dependence on primary exports renders these countries distinctly Andean. As the essays argue, the political solutions and economic remedies must address this phenomenon, rather than mimicking those strategies of the larger emerging market countries in the region. Carol Wise, University of Southern California, US The contributors to this authoritative volume analyze the impact of political crises and social conflict on economic performance in the Andean region of Latin America. The blend of

theory and case studies is also relevant for understanding other complex societies in the developing world and transition economies. The book provides illuminating insights on how to understand, and survive, the complicated interactions between volatile politics, unstable democracies, violence, social inequality and uneven economic performance. Recent political economy theories are combined with valuable quantitative and qualitative information on presidential crises, breakdowns of democracy, constitutional reforms, quality of institutions, and social inequality and exclusion to understand actual country realities. Part I provides the conceptual framework and a regional perspective of the book. Part II contains five political economy country studies Bolivia, Colombia, Ecuador, Peru and Venezuela written by leading scholars in the field and former senior policymakers, including a former President. Together, the chapters highlight the detrimental effects of political instability and social conflict on economic growth and stability, as well as the feedback effects from poor economic performance on political instability and institutional fragility. The country studies warn that narrow economic reforms that do not pay adequate attention to politics, institutions and social structures are bound to fail in bringing lasting

prosperity and stability to complex societies. Examining new and rich information on episodes of political turmoil, military interventions, forced presidential resignations, constitutional reforms and social uprisings, this book will be required reading for all those interested in the interface of politics and economic development.

International Relations Theory DIANE Publishing

The Asian financial crisis of 1997 – 98 was devastating for the region, but policymakers at least believed that they gained a great deal of knowledge on how to prevent, mitigate, and resolve crises in the future. Fifteen years later, the Asian developing countries escaped the worst effects of the global crisis of 2008 – 10, in part because they had learned the right lessons from their own experience. In this important study, the Asian Development Bank and Peterson Institute for International Economics join forces to illuminate the contrast between Asia ' s performance during the more recent crisis with its performance during its own crisis and the gap between what the United States and European Union leaders recommended to

Asia then and what they have practiced on themselves since then. The overriding lessons emerging from the essays in this volume are that countries need to prepare for crises as if they cannot be prevented, make room for stabilization policies and deploy them rapidly when crises hit, and address the need for self-insurance globally if they can, or regionally if they must.

The transition from President Donald J. Trump to President Joseph R. Biden Jr. stands as one of the most dangerous periods in American history. But as # 1 internationally bestselling author Bob Woodward and acclaimed reporter Robert Costa reveal for the first time, it was far more than just a domestic political crisis. Woodward and Costa interviewed more than 200 people at the center of the turmoil, resulting in more than 6,000 pages of transcripts—and a spellbinding

and definitive portrait of a nation on the brink. This classic study of Washington takes readers deep inside the Trump White House, the Biden White House, the 2020 campaign, and the Pentagon and Congress, with vivid, eyewitness accounts of what really happened. Peril is supplemented throughout with never-before-seen material from secret orders, transcripts of confidential calls, diaries, emails, meeting notes and other personal and government records, making for an unparalleled history. It is also the first inside look at Biden's presidency as he faces the challenges of a lifetime: the continuing deadly pandemic and millions of Americans facing soul-crushing economic pain, all the while navigating a bitter and disabling partisan divide, a world rife with threats, and the hovering, dark shadow of the former president. "We have much to do in this winter of peril," Biden declared at his inauguration, an event marked by a nerve-wracking security alert and the threat of domestic terrorism. Peril is the extraordinary story of the end of one presidency and the beginning of another, and represents the culmination of Bob Woodward's news-making trilogy on the Trump presidency, along with Fear and Rage. And it is the beginning of a collaboration with fellow Washington Post reporter Robert Costa that will remind readers of Woodward's

coverage, with Carl Bernstein, of President Richard M. Nixon's final days. Making Feminist Sense of the Iraq War Taylor & Francis "Highlights how losses in the US subprime market had spread beyond the confines of the US mortgage sector and the borders of the United States, how risk spreads had ballooned and liquidity in some markets had dried up forcing large financial institutions to report significant losses. Bank runs were no longer the stuff of history." - Cover. Report of the Presidential Commission on the Space Shuttle Challenger Accident University of Illinois Press Through examining practices of torture, extra-judicial assassination, and first person accounts of soldiers on the ground, Bonnie Mann develops a new theory of gender. The First Global Financial Crisis of the 21st Century MIT Press "Once-in-a-lifetime" financial crises have been a recurrent part of life in the last three decades. It is no longer possible to dismiss or ignore them as aberrations in an otherwise well-functioning system. Nor are they peculiar to recent times. Going back in history, asset price bubbles and bank-runs have been an endemic feature of the capitalist system over the last four centuries. The historical record offers a treasure trove of experience that may shed light on how and why

financial crises happen and what can be done to avoid them - provided we are willing to learn from history. This book interweaves historical accounts with competing economic crisis theories and reveals why commentaries are often contradictory. First, it presents a series of episodes from tulip mania in the 17th century to the subprime mortgage meltdown. In order to tease out their commonalities and differences, it describes political, economic, and social backgrounds, identifies the primary actors and institutions, and explores the mechanisms behind the asset price bubbles, crashes, and bank-runs. Second, it starts with basic economic concepts and builds five competing theoretical approaches to understanding financial crises. Competing theoretical standpoints offer different interpretations of the same event, and draw dissimilar policy implications. This book analyses divergent interpretations of the historical record in relation to how markets function, the significance of market imperfections, economic decision-making process, the role of the government, and evolutionary dynamics of the capitalist system. Its diverse theoretical and historical content of this book complements economics, history and political science curriculum. Understanding the Creeping Crisis Oxford University Press (UK) The world is still recovering from the most recent global recession associated with the 2008 – 09 financial crisis and the possibility of another downturn persists as the global

---

economy struggles to regain lost ground. But, what is a global recession? What is a global recovery? What really happens during these episodes? As the debates about the recent global recession and the subsequent recovery have clearly shown, our understanding of these questions has been very limited. This book tracks the global business cycle through the destruction of a global recession to the renewal of recovery, drawing on four major episodes in the past half century. It defines key terms, documents the main features of a global recession and recovery, and describes the events that take place around these episodes. The book also puts the latest global recession and ongoing recovery in perspective. A companion website and DVD provide several unique tools to help readers understand the basics: interactive timelines of the four episodes, videos of author interviews, several reports explaining the regional impact of the collapse, as well as coverage of the Lehman Brothers bankruptcy, and more. Maneuvers DIANE Publishing

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most

anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States--which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean--it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts--it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7--it is nevertheless an essential record of one of the most transformational events of modern times.
