An exploration of conceptual foundations and the practical applications of limits in mathematics, this text offer a theorems relating to what the Customary limits cannot do over to generalized limits, which use "composite" values carrying sets of multiple values. It analyzes the idea of a generalized limit and explains to those for whom intuition cannot suffice. To arbitrary (discontinuous) functions the definition of limit is generalized. The limit of discontinuous functions does not exist. However it is possible for us to make it exist, as in the case of the mathematicians from the sixteenth century who introduced non-existing root of-1.) Viewing the maths lesson as an

opportunity for pupils to develop a deep understanding of mathematical concepts and relationships, rather than to follow fixed processes that lead to 'the answer', is increasingly recognized as the pinnacle of best practice in maths education. The exploration extends through to how the representations apply to complex expressions and manipulations. Visible Maths also includes a chapter dedicated to answering some of the questions that may arise from the reading of the book. Furthermore, the accompanying diagrams and models are displayed to illustrate the conceptual takeaways and teaching techniques discussed. Suitable for teachers of maths in college settings. In addition to presenting the year's most memorable math writing, this must-have anthology includes Much of the research in generalized limits. This is a must-read for anyone interested in where math has taken us from - and where it is headed.

This book is an in-depth, comparative study of two of the most popular and influential intellectual and spiritual traditions of West Africa: Tijani Sufism and Ifa. Employing a unique methodological approach that thinks with and from—rather than merely about—these traditions, Oludamini Ogunnaike argues that they contain sophisticated epistemologies that provide practitioners with a comprehensive worldview and a way of crafting a meaningful life. Using theories belonging to the traditions themselves as well as contemporary oral and textual sources, Ogunnaike examines how both Sufism and Ifa answer the questions of what knowledge is, how it is acquired, and how it is verified. Or, more simply: What do you know? How did you come to know it? How do you know that you know? After

analyzing Ifa and Sufism separately and on their own terms, the book compares them to each other and to certain features of academic theories of knowledge. By analyzing Sufism from the perspective of Ifa, Ifa from the perspective of Sufism, and the contemporary academy from the perspective of both, this book invites scholars to inhabit these seemingly “ foreign ” intellectual traditions as valid and viable perspectives on knowledge, metaphysics, psychology, and ritual practice. Unprecedented and innovative, Deep Knowledge makes a significant contribution to cross-cultural philosophy, African philosophy, religious studies, and Islamic studies. Its singular approach advances our understanding of the philosophical bases underlying these two African traditions and lays the groundwork for future study.

"It seems to me that a good deal has been crowded into my life and I almost feel that if I had to 'lay off' I could easily live on the fond recollections of the past ... I'm almost willing to wager, at this early day, that sometime in the years hence I'll have collected a batch of such sweet and wholesome recollections that can be rated second to none. But best of all, there will be something besides a batch of recollections. For I believe that work with a capital W is the great source of contentment and pleasure, and since consistent work is bound, in my line, to produce something lasting, I hope some day to give pleasure to others in helping them to fish up some pleasant recollection that had most slipped away in the past." -- Albert H. *Theologizing in the Corinthian Conflict* is a collection of twenty exegetical studies on 2 Corinthians. Most of the texts were originally presented as papers during the annual meetings of the European Association of Biblical Studies. Some of the literary-critical issues of 2 Corinthians are touched upon in several contributions. Other essays focus on a variety of theological and interpretive questions: hermeneutics, the narrative and social world, revelation terminology, Paul's theology of God and Christ, the understanding of the Spirit, the letter and the Spirit, conflict and reconciliation, poverty and wealth, debt theology and the collection, identity formation, synagogue beatings, parental beneficence, new creation and righteousness of God, dying for and being raised for, life after death, eschatology and new covenant, mysticism. In their diversity, the contributions of this book have in common that

they are concerned with theological topics in exegetical perspective using a variety of approaches and methodologies. The goal of this book is not to reconstruct the theology of Paul, but to gain a deeper understanding of Paul's theologizing in the Corinthian context of conflict and reconciliation.

When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he's as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn't have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He's finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she'll be gone in a few months... Except now she's determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs?
