[Audi Check Engine Light | Troubleshooting Guide | YOUCANIC](#)

If your Audi check engine light is flashing, it indicates an engine misfire, which means fuel is not getting burnt efficiently in the cylinders. Engine shaking is often caused by a worn spark plug, bad ignition coil, Ignition Control Module (ICM), or bad catalytic converter. It is not recommended to drive an Audi if the engine light is flashing.

Check Engine Light Car Shaking? Check Engine Light Blinking?

The primary culprit that makes your check engine light blinking and car shaking is a malfunctioning cylinder. Every cylinder in your engine is supposed to play its part or fire to pass the mixture of fuel and air in the system. When the cylinder does not work as expected or it does not pass the fuel and air every time the crankshaft turns, it misfires. As a result, the engine runs rough and it makes the overall car shaking.
