Most of my friends have told me stories of how they got swindled by getting a raw deal when buying a car (second hand or new). Others have complained of how they got overcharged by dishonest mechanics. This book will familiarize you with basic car care and tips including Choosing the right car, car check-list before a long trip, how to keep the automatic transmission alive, top reasons why your car won't start, among others. To the readers, the

author is happy to wish that the pages of this book may help you learn the fastest, easiest, and most comprehensive tips to maintain your car. It's a book that every car owner (or anyone intending to) should have.

(OnBoard Diagnostic II) is the standard of the industry, and this book provides a thorough explanation of this system. It details its main features, capabilities, and characteristics. It shows how to access the port connector on the car, the serial data protocols, and what the serial data

means. To understand the diagnostic codes, the numbering system is defined and the table of common DTCs is shown. But most importantly, McCord provides a thorough process for trouble shooting problems, tracing a problem to its root, explaining why DTCs may not lead to the source of the

underlying problem, and ultimately resolving the problem. *Today's Technician: Advanced Engine Performance Classroom Manual and Shop Manual* Penguin Damocles On The Couch, is about getting your life straight, and it is about stories. information. Herb Stricklin, therapist and educator, has found that stories are a tremendous tool for relaying information regarding sound principles to live one's life by. Stories afford the listener an opportunity to take the information that they are hearing and apply it to their lives on a much deeper level than just hearing cold hard facts. Jesus used parables to relay some of his most powerful messages. Ancient Greeks and Romans used plays to both entertain and educate those witnessing the performance. Morality plays, such as The Sword Of Damocles, help us to learn life lessons and understand the human condition. In this story, Damocles finds himself placed in a chair with a sword dangling over his head suspended by a single hair. The angst and fear that he experiences is a universal experience for humans (not necessarily a sword, but we have all had things "hanging over our heads"). Stricklin uses stories such as this to paint a picture for people regarding healthy and unhealthy

between the academic research on motivation and to present it in a form that is useful to the practicing manager. In essence, the book presents a theory of motivation and how to use it without ever mentioning the word "theory". The goal of the book is to give managers a kind of mental model to use in thinking about motivation and to show them how to use this mental model for practical management actions to diagnose and improve motivation of

subordinates. The book is written in three sections: Understanding Motivation, Diagnosing Motivation and Improving Motivation. The book incorporates case studies and many examples of how to successfully manage motivation.
