Ford F150 Service Engine Light Solution

Service Engine Soon Light [How to fix it?] Meaning & Causes

Service Engine Soon Light Meaning. If the ' Service Engine Soon ' light comes on, it

means that there is a minor problem with the electronics or the engine of your car.

Some manufacturers use them as a check engine light for minor problems. It could

also mean that it is time for a scheduled service, such as oil or spark plug

replacement. Some manufacturers only have one indicator for both scheduled service

and engine problems.

The Service Engine Soon (SES) Light indicates many other things that could

range from a loose connection somewhere or a serious problem. Since the

introduction of on-board computers that are meant to keep track of every

function of the engine, diagnosing engine problems has been much easier

because these computers relay error codes that are associated with certain

engine problems.
