Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

In the 1960s, model kit building was a huge hobby. Kids built plastic kits of planes, tanks, race cars, space ships, creatures from scary movies, you name it. Before baseball card collecting, Pokémon, and video games, model kit building was one of the most popular hobby activities. Car and airplane kits were the most popular, and among the car kits, muscle cars, as we know them today, were one of the most popular categories. Many owners of real muscle cars today were not old enough to buy them when the cars were new, of course. Yet kids of the 1960s and 1970s worshiped these cars to an extent completely foreign to kids today. If you couldn't afford or were too young to buy a muscle car back then, what could you do? For many, the next best thing was to buy, collect, and build muscle car kits from a variety of kit companies. Hundreds were made. Many of these kits have become collectible today, especially in original, unassembled form. Although people still build kits today, there is a broad market for collectors of nostalgic model kits. People love the kits for the great box art, to rekindle fond memories of building them 40 years ago, or even as a companion to the full-scale cars they own today. Here, world-leading authority Tim Boyd takes you through the entire era of muscle car kits, covering the options, collectability, variety availability, and value of these wonderful kits today. Boyd also takes you through the differences between the original kits, the older reproduction kits, and the new reproduction kits that many people find at swap meets today. If you are looking to build a collection of muscle car kits, interested in getting the kits of your favorite manufacturer or even just of the cars you have owned, this book will be a valuable resource in your model kit search.

The European Union (EU) has emerged as a leading governing body in the international struggle to govern climate change. The transformation that has occurred in its policies and institutions has profoundly affected climate change politics at the international level and within its 27 Member States. But how has this been achieved when the EU comprises so many levels of governance, when political leadership in Europe is so dispersed and the policy choices are especially difficult? Drawing on a variety of detailed case studies spanning the interlinked challenges of mitigation and adaptation, this volume offers an unrivalled account of how different actors wrestled with the complex governance dilemmas associated with climate policy making. Opening up the EU's inner workings to non-specialists, it provides a perspective on the way that the EU governs, as well as exploring its ability to maintain a leading position in international climate change politics.

Calcutta nights (Raater Kolkata) is the real-life story and memoir of the enigmatic 'Meghnad Gupta', pen name of famed Bengali fiction writer Hemendra Kumar Roy. Translated into English by Rajat Chaudhuri almost a century after the first publication of Raater Kolkata in 1923, Roy reveals to contemporary readers The darkest secrets of an earlier Calcutta. The first two decades of the last century, the backdrop for this book, were politically turbulent times. Those days, Calcutta, the erstwhile capital of British India, was teeming with people from different parts of the country besides Europeans and other foreigners. It was a city of sin, pleasure and suffering. Indians who arrived and settled here mingled with locals, some of them picking up dress, manners and the wanton lifestyles of the Bengali 'Babu', while others kept their identities intact. All this created a unique cosmopolitan setting, coloured with shades of debauchery, darkness and crime that this first-hand account brilliantly recounts. Written in an age very different from ours, certain views of the author could be jarring for the present times. However, these need to be tempered by the understanding of the sociopolitical contexts and the distance of a century separating us from Meghnad Gupta's Calcutta. Calcutta nights is the hootum pyanchar naksha (published in 1862 and penned by kaliprasanna Sinha) of the early twentieth century, a book that will help anyone understand the contrasts and colours of a unique Indian metropolis.
