Author and authorship have become increasingly important concepts in Byzantine literary studies. This volume provides the first comprehensive survey on strategies of authorship in Middle Byzantine literature and investigates the interaction between self-presentation and cultural production in a wide array of genres, providing new insights into how Byzantine intellectuals conceived of their own work and pursuits.

During the last decade of Henry VIII's life, his Protestant subjects struggled to reconcile two loyalties: to their Gospel and to their king. This book tells the story of that struggle and describes how a radicalised English Protestantism emerged from it. Focusing on the critical but neglected period 1539–47, Dr Ryrie argues that these years were not the 'conservative reaction' of conventional historiography, but a time of political fluidity and ambiguity. Most evangelicals continued to hope that the king would favour their cause, and remained doctrinally moderate and politically conformist. The author examines this moderate reformism in a range of settings - in the book trade, in the universities, at court and in underground congregations. He also describes its gradual eclipse, as shifting royal policy and the dynamics of the evangelical movement itself pushed reformers towards the more radical, confrontational Protestantism which was to shape the English identity for centuries.

This stimulating volume explores how the memory of the Reformation has been remembered, forgotten, contested, and reinvented between the sixteenth and twenty-first centuries. Remembering the Reformation traces how a complex, protracted, and unpredictable process came to be perceived, recorded, and commemorated as a transformative event. Exploring both local and global patterns of memory, the contributors examine the ways in which the Reformation embedded itself in the historical imagination and analyse the enduring, unstable, and divided legacies that it engendered. The book also underlines how modern scholarship is indebted to processes of memory-making initiated in the early modern period and challenges the conventional models of periodisation that the Reformation itself helped to create. This collection of essays offers an expansive examination and theoretically engaged discussion of concepts and practices of memory and Reformation. This volume is ideal for upper level undergraduates and postgraduates studying the Reformation, Early Modern Religious History, Early Modern European History, and Early Modern Literature. A sumptuously written people's history and a major retelling and reinterpretation of the story of the English Reformation Centuries on, what the Reformation was and what it accomplished remain deeply contentious. Peter Marshall's sweeping new history—the first major overview for general readers in a generation—argues that sixteenth-century England was a society neither desperate for nor allergic to change, but one open to ideas of “reform” in various competing guises. King Henry VIII wanted an orderly, uniform Reformation, but his actions opened a Pandora's Box from which pluralism and diversity flowed and rooted themselves in English life. With sensitivity to individual experience as well as masterfully synthesizing historical and institutional developments, Marshall frames the perceptions and actions of people great and small, from monarchs and bishops to ordinary families and ecclesiastics, against a backdrop of profound change that altered the meanings of “religion” itself. This engaging history reveals what was really at stake in the overthrow of Catholic culture and the reshaping of the English Church.

Not much is known about the life of Bacchylides, but everyone knows how great of a poet he was, becoming one of Ancient Greece's best lyrical poets. The Greeks included him in their canonical list of nine lyric poets, and some of his works survived. His career coincided with the rise of drama, including the playwrights Aeschylus or Sophocles, and his lyrics are known for their clarity in expression and simplicity, making it easier to study the lyrical poetry of Ancient Greece. Epinicians were a genre of occasional poetry that resembled victory odes, written in prose in Ancient Greece as lyrics for a chorus. These were commissioned for and performed at the celebration of an athletic victory in the Panhellenic Games and sometimes in honor of a victory in war. Some of Bacchylides' epinicians survived and are reproduced here.

The imperial court in Constantinople is central to the outsider's vision of Byzantium. However, in spite of its fame in literature and scholarship, there have been few attempts to analyze the court in its entirety as a phenomenon. These studies provide a unified composition by presenting Byzantine courtly life in all its interconnected facets.

This collection explores the issues raised by the writing and reading of commentaries on classical Greek and Latin texts. Written primarily by practising commentators, the papers examine philosophical, narratological, and historiographical commentaries; ancient, Byzantine, and Renaissance commentary practice and theory, with special emphasis on Galen, Tzetzes, and La Cerda; the relationship between the author of the primary text, the commentary writer, and the reader; special problems posed by fragmentary and spurious texts; the role and scope of citation, selectivity, lemmatization, and revision; the practical future of commentary-writing and publication; and the way computers are changing the shape of the classical commentary. With a genesis in discussion panels mounted in the UK in 1996 and the US in 1997, the volume continues recent international dialogue on the genre and future of commentaries.

This text was the first systematic study of what it meant to be 'Greek' in late antiquity and Byzantium, an identity that could alternatively become national, religious, philosophical, or cultural. Through close readings of the sources, Professor Kaldellis surveys the space that Hellenism occupied in each period; the broader debates in which it was caught up; and the historical causes of its successive transformations. The first section (100-400) shows how Romanisation and Christianisation led to the abandonment of Hellenism as a national label and its restriction to a negative religious sense and a positive, albeit rarefied, cultural one. The second (1000-1300) shows how Hellenism was revived in Byzantium and contributed to the evolution of its culture. The discussion looks closely at the reception of the classical tradition, which was the reason why Hellenism was always desirable and dangerous in Christian society, and presents a new model for understanding Byzantine civilisation.

First published in 1895, this book recounts the author's 1893 expedition to the Tafilet oasis in Morocco, one of the largest oases in the world. Previously largely inaccessible (before the invention of the motor car it was at least 10 days' journey south of Fez across the Atlas mountains and the Sahara), Harris took advantage of the Sultan of Morocco Mulai el Hassen's decision to pay a visit to the oasis during the autumn of that year. Throughout the book the author describes in great detail the places he visited and the people he met along the way. There are detailed descriptions of Marrakesh and the villages of the Atlas Mountains, as well as ruminations on the differences between the Arabs and the Berber tribes, and the situation of the Jews. Crossing the desert, Harris reached the Sultan's camp at the edge of the oasis, and there follows a detailed description of the activities of the Sultan and his retinue, their dealings with the troublesome tribes of the area, and accounts of the history, geography and people of Tafilet. The book concludes with the author's return journey to the north, and an account of the events following the Sultan's own return from the oasis and his subsequent death. Painting as it does a vivid picture of the state of Morocco at the very end of the 19th century, Walter B. Harris's Tafilet is sure to be of great interest to all those fascinated by the history of this unique and diverse North African country.

Looking specifically at sewing, art, writing, and acting, Zakreski shows how these professions increasingly came to be defined as 'artistic' and thus as suitable professions for middle-class women, and argues that the supposedly degrading activity of paid work could be transformed into a refining experience for women. Rather than consigning working women to the margins of patriarchal culture, then, her study shows how representations of creative women, by authors such as Elizabeth Barrett Browning, Dinah Craik, Charles Dickens, Anthony Trollope, and Charlotte Yonge, participated in and shaped new forms of mainstream culture."--BOOK JACKET.

This book explores Michael Psellos' place in the history of Greek rhetoric and self-representation and his impact on the development of Byzantine literature. Avoiding the modern dilemma that vacillates between Psellos the pompous rhetorician and Psellos the ingenious thinker, Professor Papaioannou unravels the often misunderstood Byzantine rhetoric, its rich discursive tradition and the social fabric of elite Constantinopolitan culture which rhetoric addressed. The book offers close readings of Psellos' personal letters, speeches, lectures and historiographical narratives, and analysis of other early Byzantine and classical models of authorship in Byzantine book culture, such as Gregory of Nazianzos, Synesios of Cyrene, Hermogenes and Plato. It also details Psellos' innovative attention to authorial creativity, performative mimesis and the aesthetics of the self. Simultaneously, it traces within Byzantium complex expressions of emotion and gender, notions of authorship and subjectivity, and theories of fictionality and literature, challenging the common fallacy that these are modern inventions.

This volume presents the results of a scholarly meeting which focused on the patronage of women in the Byzantine Empire. In their scope, the articles address broadly not only the founding or re-founding of churches and monasteries, but also their rich decoration, as well as numerous smaller donations. In spite of increased attention to gender research in recent years, a comparative treatment of the legal and economic potential that women in Byzantium could exercise in order to exert independent influence has been lacking; thus a gender-specific viewpoint for the volume was intentionally chosen.
