"Drawing together leading scholars from a variety of academic disciplines, this collection reports the leading edge of research and analysis into the contemporary urban condition. With more than half of the world's population living in urban environments, cities are places of huge complexity and diversity and the processes and structures that bind them together reach out across the globe. This volume considers the state of the city and contemporary urbanisation from a range of intellectual and international

perspectives. Whilst considering established themes, such as urban divisions and differences, publics and cultures, politics and planning, the New Blackwell Companion to the City also addresses new debates on subjects like materiality, mobilities, and environment. Incorporating international examples, this book explores the economic, social, cultural, environmental and political issues that flow from and within the modern city"--

This text was the first systematic study of what it meant to be 'Greek' in late antiquity and Byzantium, an identity that could alternatively become national, religious, philosophical, or cultural. Through close readings of the sources, Professor Kaldellis surveys the space that Hellenism occupied in

each period; the broader debates in which it was caught up; and the historical causes of its successive transformations. The first section (100-400) shows how Romanisation and Christianisation led to the abandonment of Hellenism as a national label and its restriction to a negative religious sense and a positive, albeit rarefied, cultural one.

The second (1000-1300) shows how Hellenism was revived in Byzantium and contributed to the evolution of its culture. The discussion looks closely at the reception of the classical tradition, which was the reason why Hellenism was always desirable and dangerous in Christian society, and presents a new model for understanding Byzantine civilisation.

*A General and Analytical Index to the American Cyclopaedia* Yale University Press  
John Calvin (1509–64) stands with Martin Luther (1483–1546) as the premier theologian of the sixteenth-century Protestant Reformation. Calvin's thought spread throughout Europe to the New World and later throughout the whole world. His insights and influence continue to endure today, presenting a model of theological scholarship grounded in Scripture as well as providing nurture for Christian believers within churches across the globe. Dr Donald K. McKim gathers together an international array of major Calvin scholars to consider phases of Calvin's

theological thought and influence. Historians and theologians meet to present a full picture of Calvin's contexts, the major themes in Calvin's writings, and the ways in which his thought spread and has increasing importance. Chapters serve as guides to their topics and provide further readings for additional study. This is an accessible introduction to this significant Protestant reformer and will appeal to the specialist and non-specialist alike. *The Gospel and Henry VIII* Wiley-Blackwell  
During the last decade of Henry VIII's life, his Protestant subjects struggled to reconcile two loyalties: to their Gospel and to their king. This book tells the story of that struggle and describes how a radicalised English Protestantism emerged from it. Focusing on the critical but neglected period 1539–47, Dr Ryrie argues that these years were not the 'conservative reaction' of conventional historiography, but a time of political fluidity and ambiguity. Most evangelicals continued to hope that the king

would favour their cause, and remained doctrinally moderate and politically conformist. The author examines this moderate reformism in a range of settings - in the book trade, in the universities, at court and in underground congregations. He also describes its gradual eclipse, as shifting royal policy and the dynamics of the evangelical movement itself pushed reformers towards the more radical, confrontational Protestantism which was to shape the English identity for centuries.

*A Supplement to the Oxford English Dictionary: O-Scz* Oxford [Oxfordshire] : Clarendon Press

This stimulating volume explores how the memory of the Reformation has been remembered, forgotten, contested, and reinvented between the sixteenth and twenty-first centuries. Remembering the Reformation traces how a complex, protracted, and unpredictable process came to be perceived, recorded, and commemorated as a transformative event. Exploring both local and global patterns of memory, the contributors examine the ways in which the Reformation embedded itself in the historical imagination and analyse the enduring, unstable, and divided legacies that it engendered. The book also underlines how modern scholarship is indebted to processes of memory-making initiated in the early modern period and challenges the conventional models of

---

periodisation that the Reformation itself helped to create. This collection of essays offers an expansive examination and theoretically engaged discussion of concepts and practices of memory and Reformation. This volume is ideal for upper level undergraduates and postgraduates studying the Reformation, Early Modern Religious History, Early Modern European History, and Early Modern Literature.

Author and authorship have become increasingly important concepts in Byzantine literary studies. This volume provides the first comprehensive survey on strategies of authorship in Middle Byzantine literature and investigates the interaction between self-presentation and cultural production in a wide array of genres, providing new insights into how Byzantine intellectuals conceived of their own work and pursuits.

The Author in Middle Byzantine Literature Dumbarton Oaks

Bringing to bear a commanding knowledge of Hebrew Scripture, Osherow presents a series of case studies of biblical heroines who engage in poetry and in song. The author investigates how the cultural requirement for feminine silence informs early modern readings of these biblical characters, and furthermore, how they were used to counteract cultural constraints on women's speech. The book's chapters focus

on Miriam, Hannah, Deborah, and a feminized King David.

*Christ's tears over Jerusalem*

Cambridge University Press  
David Lawton approaches later medieval English vernacular culture in terms of voice. As texts and discourses shift in translation and in use from one language to another, antecedent texts are revoiced in ways that recreate them (as public interiorities) without effacing their history or future. The approach yields important insights into the voice work of late medieval poets, especially Langland and Chaucer, and also their fifteenth-century successors, who treat their work as they have treated their precursors. It also helps illuminate vernacular religious writing and its aspirations, and it addresses literary and cultural change, such as the effect of censorship and increasing political instability in and beyond the fifteenth century. Lawton also proposes his emphasis on voice as a literary tool of broad application, and his book has a bold and comparative sweep that encompasses the Pauline letters, Augustine's *Confessions*, the classical precedents of Virgil and Ovid, medieval contemporaries like Machaut and Petrarch, extra-literary artists like Monteverdi, later poets such as Wordsworth, Heaney, and Paul Valery, and moderns such as Jarry and Proust. What justifies such parallels, the author claims, is that late medieval texts constitute the foundation of a literary history of voice that extends to modernity. The book's energy is therefore devoted to the transformative reading of later medieval texts, in

order to show their original and ongoing importance as voice work.

Not much is known about the life of Bacchylides, but everyone knows how great of a poet he was, becoming one of Ancient Greece's best lyrical poets. The Greeks included him in their canonical list of nine lyric poets, and some of his works survived. His career coincided with the rise of drama, including the playwrights Aeschylus or Sophocles, and his lyrics are known for their clarity in expression and simplicity, making it easier to study the lyrical poetry of Ancient Greece. Epinicians were a genre of occasional poetry that resembled victory odes, written in prose in Ancient Greece as lyrics for a chorus. These were commissioned for and performed at the celebration of an athletic victory in the Panhellenic Games and sometimes in honor of a victory in war. Some of Bacchylides' epinicians survived and are reproduced here.

Psellos the pompous rhetorician and Psellos the ingenious thinker, Professor Papaioannou unravels the often misunderstood Byzantine rhetoric, its rich discursive tradition and the social fabric of elite Constantinopolitan culture which rhetoric addressed. The book offers close readings of Psellos' personal letters, speeches, lectures and historiographical narratives, and analysis of other early Byzantine and classical models of authorship in Byzantine book culture, such as Gregory of Nazianzos, Synesios of Cyrene, Hermogenes and Plato. It also details Psellos' innovative attention to authorial creativity, performative mimesis and the aesthetics of the self.

Simultaneously, it traces within Byzantium complex expressions of emotion and gender, notions of authorship and subjectivity, and theories of fictionality and literature, challenging the common fallacy that these are modern inventions.

*Biblical Women's Voices in Early Modern England* LIT Verlag Münster

This study argues that the century after the Reformation saw a crisis in the way that Europeans expressed their religious experience. Focusing specifically on how this crisis affected the drama of England, O'Connell shows that Reformation culture was preoccupied with idolatry and that the theater was frequently attacked as idolatrous. This anti-theatricalism notably targeted the traditional cycles of mystery plays--a type of

vernacular, popular biblical theater that from a modern perspective would seem ideally suited to advance the Reformation project. The *Idolatrous Eye* provides a wide perspective on iconoclasm in the sixteenth century, and in so doing, helps us to understand why this biblical theater was found transgressive and what this meant for the secular theater that followed.

The imperial court in Constantinople is central to the outsider's vision of Byzantium. However, in spite of its fame in literature and scholarship, there have been few attempts to analyze the court in its entirety as a phenomenon. These studies provide a unified composition by presenting Byzantine courtly life in all its interconnected facets.

**Remembering the Reformation**

John Wiley & Sons

The Parish Church was the primary site of religious practice throughout the early modern period. This was particularly so for the silent majority of the English population, who conformed outwardly to the successive religious upheavals of the sixteenth and seventeenth centuries. What such public conformity might have meant has attracted less attention - and, ironically, is sometimes less well documented - than the non-conformity or semi-conformity of recusants, church-papists, Puritan conventiclers or separatists. In this volume, ten leading scholars of early modern religion explore the experience of parish worship in England during the Reformation and the century that followed it. As the contributors argue, parish worship in this period was of critical theological, cultural and even political

importance. The volume's key themes are the interlocking importance of liturgy, music, the sermon and the parishioners' own bodies; the ways in which religious change was received, initiated, negotiated, embraced or subverted in local contexts; and the dialectic between practice and belief which helped to make both so contentious. The contributors - historians, historical theologians and literary scholars - through their commitment to an interdisciplinary approach to the subject, provide fruitful and revealing insights into this intersection of private and public worship. This collection is a sister volume to Martin and Ryrie (eds), *Private and Domestic Devotion in Early Modern Britain*. Together these two volumes focus and drive forward scholarship on the lived experience of early modern religion, as it was practised in the sixteenth and seventeenth centuries.

*Worship and the Parish Church in Early Modern Britain* Oxford University Press

Peter Mack examines the impact of humanist training in rhetoric and argument on a range of Elizabethan prose texts, including political orations, histories, romances, conduct manuals, privy council debates and personal letters. Elizabethan Rhetoric reconstructs the knowledge, skills and approaches which an Elizabethan would have acquired in order to participate in the political and religious debates of the time: the approaches to an audience, analysis and replication of textual structures, organisation of arguments and tactics for disputation. Study of the

rhetorical codes and conventions in terms of which debates were conducted is currently a major area of historical and literary enquiry, and Mack provides a wealth of new information about what was taught and how these conventions were exploited in personal memoranda, court depositions, sermons and political and religious pamphlets. This important book will be invaluable for all those interested in the culture, literature and political history of the period.

*The Classical Commentary* BoD – Books on Demand

This collection explores the issues raised by the writing and reading of commentaries on classical Greek and Latin texts. Written primarily by practising commentators, the papers examine philosophical, narratological, and historiographical commentaries; ancient, Byzantine, and Renaissance commentary practice and theory, with special emphasis on Galen, Tzetzes, and La Cerda; the relationship between the author of the primary text, the commentary writer, and the reader; special problems posed by fragmentary and spurious texts; the role and scope of citation, selectivity, lemmatization, and revision; the practical future of commentary-writing and publication; and the way computers are changing the shape of the classical commentary. With a genesis in discussion panels mounted in the UK in 1996 and the US in 1997, the volume continues recent international dialogue on the genre and future of commentaries.

*Networks of Learning* BRILL

A sumptuously written people's history and a major retelling and reinterpretation of the story of the English Reformation Centuries on, what the Reformation was and what it accomplished remain deeply contentious. Peter Marshall's sweeping new history—the first major overview for general readers in a generation—argues that sixteenth-century England was a society neither desperate for nor allergic to change, but one open to ideas of “reform” in various competing guises. King Henry VIII wanted an orderly, uniform Reformation, but his actions opened a Pandora's Box from which pluralism and diversity flowed and rooted themselves in English life. With sensitivity to individual experience as well as masterfully synthesizing historical and institutional developments, Marshall frames the perceptions and actions of people great and small, from monarchs and bishops to ordinary families and ecclesiastics, against a backdrop of profound change that altered the meanings of “religion” itself. This engaging history reveals what was really at stake in the overthrow of Catholic culture and the reshaping of the English Church.

renewed attention, and recent approaches are questioning the traditional boundaries of institutional and intellectual history. The volume assembles contributions on both Byzantine and Latin learned culture, and aims to locate medieval scholars in their religious and political contexts instead of studying them in a framework of 'schools'. Eleven contributions on eastern and western scholars offer complementary perspectives on scholars and their work, discussing the symbolic and discursive construction of religious and intellectual authority, practices of networking and adaptations of knowledge formations. Sita Steckel is Junior Professor of Medieval History at the University of Munster and author of a study on 'cultures of teaching' in the early and high middle ages. Niels Gaul is Associate Professor of Byzantine Studies at CEU Budapest, with an interest in Byzantine scholarship, especially the societal functions of rhetoric. Michael Gr̃nbart is Associate Professor of Byzantine Studies at the University of Munster. He is currently working on the image of Byzantine aristocracy and preparing an introduction to the function of letters and words in Byzantine daily life.
