PHP & MySQL: The Missing Manual Haynes Manuals

These days, a nice original Vauxhall Viva costs an arm and a leg, but back in the 1970s, £ 100 bought you a 'good little runner', with the rust, bald tyres and dodgy MOT thrown in for free. All you needed was someone who knew how to fix it when it broke down! Brian Cunningham is that someone – or, at least, he used to be. Under the Bonnet is the totally true* story of being a car mechanic in the old days, when fixing a car was one thing, but keeping it fixed was something else entirely. These are the tales of a bygone age, full of secret scams, chaotic characters and cars almost bursting with personality. * some tales may be taller than others

The French automobile pioneer and entrepreneur Andre Citroen is one of the neglected founding figures of the industry. Although his name remains a familiar household word, his colourful personality and spectacular achievements are now largely unrecognized. This illustrated biography reviews Citroen's life and work and catalogues the cars he produced. It restores his reputation as one of the most progressive and imaginative characters in the history of the motor car.

Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3500 deaths on the road each year, with 35,000 serious injuries. Modern motor vehicles are becoming safer for occupants, due to advancement in technology, so persons are more likely to survive high impact speeds, but are also more likely to become entrapped. The Fire and Rescue Service, as the primary rescue service, requires national guidance to ensure a similar standard of response anywhere in the UK. This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care. Each chapter forms an independent reference source, but the publication as a whole forms a complete guide. Chapters cover: vehicle design and construction; dealing with incidents; safety procedures; operational procedures; extrication equipment; medical considerations and trauma care; Integrated Personal Development System (I.P.D.S.). Appendices cover: Highways Agency/Fire and Rescue Service memorandum of understanding; training and general information; and emergency services personnel (ESP) aide m à m. The CD-ROM, "Vehicle extrication techniques", is a multi media guide to rescue tool handling and extrication techniques.
