Dr. Marty Becker has become
known as "America's Veterinarian"
because of his educational and
entertaining shows and columns.
For more than ten years, Dr.
Becker has been the popular
veterinary contributor to ABC-
TV's Good Morning America and

is now a member of Core Team Oz
on Dr. Mehmet Oz's show. Dr.
Becker will help owners solve
problems and enhance their bond
with their cats through a tip-filled
book on everything from finding
the right cat to preventing health
problems and bad behavior. He will
start owners off on the right foot,
whether they buy a kitten or adopt
an older cat, showing them how to
solve the most annoying behavior
and cat-care problems--from
scratching furniture to not using the
litter-box. (Surprising fact: did you
know that black cats shed more
than light-colored cats?) And he
advises owners how to make their
own cat toys, and how to save
money on medication, both
traditional and alternative.

DESIGN and PLANNING

of Research and Clinical LABORATORY FACILITIES
In this primer/professional reference, Leonard Mayer demystifies one of the most complex architectural specialties. An architect with more than thirty-three years' experience as a master planner and programmer of laboratories and clinical facilities, Mr. Mayer offers a comprehensive overview of the fundamental issues related to laboratory planning and design. He also provides designers

with a clear and rational framework through which to approach this highly challenging and rewarding design specialty. A superb learning tool for students and professionals just getting started in lab design and a valuable one-volume reference for the experienced professional, *Design and Planning of Research and Clinical Laboratory Facilities* features: * Step-by-step guidance through the complex maze of codes, specifications,

standards, and official guidelines, relating to the planning, design, and construction processes * New and updated design criteria based on the most recent laws and regulations * Master plans, facility programs, functional programs and requirements programs for a wide variety of scientific and medical disciplines and support facilities * Comprehensive lists of relevant codes, regulations,

standards, guidelines, and important architectural, structural, mechanical, electrical, and plumbing criteria Research and clinical laboratory facilities are, perhaps, the most complex structures to plan and design. Intimidated by a vast and seemingly impenetrable body of codes, regulations, and design criteria pertaining to lab design and construction, many architects, unfortunately, choose to

avoid what can be one of the most profitable and professionally rewarding areas of specialization. Written by an architect with more than thirty-three years of experience as a master planner and programmer of laboratories and clinical facilities, this book demystifies the process of laboratory planning and design. It provides a comprehensive overview of the fundamental issues related to laboratory design and offers readers detailed, step-by-step guidance through the complex maze of design specifications and codes, standards, and official guidelines that must be addressed during the programming, planning, design, and construction process. Focusing mainly on laboratory programming, planning, and design criteria for "wet" laboratory environments, Leonard Mayer provides examples from numerous master plans, facility programs, functional programs and requirements programs applicable to a wide variety of scientific and medical disciplines, and related facilities. Related functions and activities include administrative offices, computer centers, core service and support, building services facilities, and more. He presents new and updated design criteria based on recent laws and regulations and supplies

readers with comprehensive lists of relevant codes, regulations, standards, guidelines, and architectural, structural, mechanical, electrical, and plumbing criteria. Design and Planning of Research and Clinical Laboratory Facilities is an excellent primer for architecture students and newcomers to the field, as well as an indispensable single-volume reference for experienced

professionals. It is also an invaluable resource for researchers and investigators, facility planners and managers, plant engineers, and all others involved with the design, construction, maintenance, and administration of laboratory facilities. **Operator, Organizational, Direct Support & General Support Maintenance Manual Including Repair Parts List for Shop Equipment, General**

One of the responsibilities of every dog or cat owner is that of coat care. There are many and varied coat types and there is a vast difference between the time it takes to groom a Doberman and an Old English Sheepdog, a Siamese and a Persian cat. This book provides much needed guidance for groomers, breeders and owners. It will be invaluable for those taking the City and Guilds 775 Grooming exam and animal care students of all levels. Step by step grooming/clipping techniques

are described for the more popular breeds of dog and cat and in each case the technique is illustrated with photographic sequences. The book also includes allied subjects such as skin care, commonly found skin parasites and basic first aid and handling.

This is another very informative book by Elliott Lang. As an animal lover, he enjoys writing animal books and advising others how to take care for their animals to give them a happy home. This book is a must

have guide for anybody passionate about bombay cats. Bombay Cats Facts and Information. Care, personality, grooming, health and feeding all included. The book is written in an easy to read and understandable style. In a straight forward, no nonsense fashion, Elliott Lang covers all aspects of keeping bombay cats as pets. I have always been in the company of animals. That is the one thing I am most thankful for. My lovely pets have always

been around to provide unconditional affection and love when I needed it the most. My father was instrumental in making me grow fond of animals. He always kept me around animals. I guess he was trying to help me learn how to be tolerant and loving from these amazing creatures. Trust me, some of the biggest life lessons that I have gained have come from these beautiful creatures. My family, too, has always been hands on with the pets in the

household. Whether it was bathing, feeding or taking care of these animals, my family relied on pure instincts and ensured that the animals go the best of everything. These animals were the centre of all our activities. There was not a single day that did not begin with a discussion about these pets. What to feed them? How to take care of a cat or dog that is ailing? What is the most nutritious thing to feed them? These were common dinner table

conversations while I was growing up. So, needless to say, I have had a lot of practical training with respect to taking care of different breeds of animals. Sometimes, I learnt from my family and sometimes, your pet will just tell you what he or she needs. Today, I am in a very privileged place where I can share this information with pet lovers across the globe. I would have never been able to provide you with so much comprehensive

information without the knowledge that I gained from my father, my family and of course my beloved cats.
