Paul Armstead is your average American senior citizen and electrical engineer. He's 61 years old, unremarkably unattractive, and a self-proclaimed science-fiction nut. He's lived the American dream in drab, typical fashion without a single noteworthy event in his rather mundane life. So how does he end up fleeing from one end of the world to the other, dodging government dragnets, evil, nightmarish monsters known as the Oni, good wizards, bad wizards, beautiful women, spies, and wizardly spells? Well, it is

entirely the genie's fault....

People Get Ready! Harper Collins

"An intoxicating fusion of fantasy and historical fiction. . . . Wecker's storytelling skills dazzle."

—Entertainment Weekly A marvelous and absorbing debut novel about a chance meeting between two supernatural creatures in turn-of-the-century immigrant New York. Chava is a golem, a creature made of clay by a disgraced rabbi knowledgeable in the ways of dark Kabbalistic magic. She serves as the wife to a

Polish merchant who dies at sea on the voyage to America. As the ship arrives in New York in 1899, Chava is unmoored and adrift until a rabbi on the Lower East Side recognizes her for the creature she is and takes her in. Ahmad is a jinni, a being of fire born in the ancient Syrian desert and trapped centuries ago in an old copper flask by a Bedouin wizard. Released by a Syrian tinsmith in a Manhattan shop, Ahmad appears in human form but is still not free. An iron band around his wrist binds him to

the wizard and to the physical world. Chava and Ahmad meet accidentally and become friends and soul mates despite their opposing natures. But when the golem's violent nature overtakes her one evening, their bond is challenged. An even more powerful threat will emerge, however, and bring Chava and Ahmad together again, challenging their very existence and forcing them to make a fateful choice. Compulsively readable, *The Golem* and the Jinni weaves strands of Yiddish and Middle Eastern

literature, historical fiction and magical fable, in a wondrously inventive tale that is mesmerizing and unforgettable.

Bridging the fields of

conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art

History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original

techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle

Ages to the 20th century. This is a new and completely revised edition of the original manual for Emotional Freedom Techniques (EFT), one of the most successful psychology self-help techniques ever developed. Thousands of people tell amazing stories of how it has helped them with psychological problems like anxiety, depression, phobias, and PTSD, as

well as physical problems like pain and stress.

Author Dawson Church is the best-known researcher in the field, and this manual is based on Clinical EFT, the only version of EFT to be validated in dozens of scientific studies. Step by step, you will learn the "evidence-based" form of EFT used in those studies. You'll discover how you can identify the hidden roots of emotional problems, and how to alleviate them using EFTs "Basic Recipe" as well as

advanced techniques. This book shows you how to use Clinical EFT for a variety of common conditions, including pain, fears, addictions and cravings, weight issues, insomnia, and guilt. With the healing keys of EFT, you'll be surprised at how many problems that hold you back can be quickly and easily relieved, opening up new possibilities for your life. three D&D core rulebooks. This new, beautifully bound version of the "Monster Manual" joins the special editions of the "Player's Handbook" and the "Dungeon Master's Guide" to complete the premiere set of Dungeons & Dragons core rulebooks. Like the others, the title gets premium treatment in the form of a leather binding, emboss and foil treatment, gilt-edged paper, and an attached ribbon bookmark. Uva's Basic Grip Book

Dirk Proske Verlag
While the technology of filmmaking has changed dramatically over the last 20 years, the basics of effective studio gripping are the same—a thorough knowledge of equipment, safety, and tools remains the foundation for success. A heavily illustrated reference and learning tool, Uva's Basic Grip Book provides grounding in basic grip equipment, techniques,

and safety issues. It distills the most beginner-friendly information offered in Uva's original Grip Book into a handy reference and guide prepared especially for the beginning professional. Updated with the latest studio grip equipment, the book also offers a complete list of personal grip tools that every grip should have, more than 100 tricks of the trade, and a review test designed to affirm

new knowledge. Uva's Basic Grip Book also offers safety tips for gripping, detailed descriptions of positions within the grip department, and advice designed to help land that first job and get established in this very competitive industry. A fully updated and expanded glossary completes the book. Uva's Basic Grip Book covers beginners' most frequently asked questions and helps

them to acquire basic skills. It also looks at the different positions within the grip department and offers helpful advice in getting that first job. Like its predecessor, Uva's Basic Grip Book is filled throughout with Tricks of the Trade, as well as tips on common practice and safety. An improved and expanded glossary completes the book. "One of the greatest inspirational and motivational books ever written." — Norman Vincent Peale In this bestselling self-help book, a successful businessman reveals the secrets behind harnessing the unlimited energies of the subconscious. Millions of readers have benefited from these visualization techniques, which show you how to turn your thoughts and dreams into

actions that can lead to enhanced income, happier relationships, increased effectiveness, heightened influence, and improved peace of mind. World War I veteran Claude M. Bristol (1891 – 1951) wrote *The Magic of Believing* to help former soldiers adjust to civilian life. A pioneer of the New Thought movement and a popular motivational speaker, Bristol addressed those in all walks of life, from politicians and leaders to performers and

salespeople. His timeless message of the powers of focused thinking and self-affirmation remains a vital source of inspiration and a practical path to achievement.

Jeremy Corbyn 's Labour stands on the brink of power, promising a fundamental re-ordering of British

politics. But what, in practice, will this entail? How can a radical government stand up to an establishment that is hostile to any significant redistribution of wealth and power? *People Get Ready!* dives into the nitty gritty of what 's needed to bring about transformative change. Unlike a decade ago, the left 's problem is no longer a shortage of big ideas. Inside and outside the Labour Party, an agenda for

new forms of public and community ownership is taking shape. Today the biggest danger facing the left is lack of preparedness—the absence of strategies that can make these ideas a reality. People Get Ready! draws on previous attempts at radical change, from the election of Labour at the end of the Second World War and the progressive early days of Mitterrand ’ s presidency in France, to Tony Benn ’ s battles with Harold Wilson and Margaret Thatcher ’ s icy insistence that there was no alternative to free markets. These stories highlight the importance of knowing your allies and, even more, your enemies, of being ready to deal with sabotage and resistance from the highest levels, of being bold enough to transform the structures of government, and of having a mass movement that can both support the leadership and hold it to its radical programme when the going gets tough. Remarkably, democratic socialism in Britain is closer to government than in any other European country. The responsibilities this brings for those supporting the Corbyn project are as great as the opportunities it presents. But there isn ’ t much time to get ready ...

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable

development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great

Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

Electronic Genie takes its readers on a two-century journey that begins with Antoine Lavoisier's prediction of the existence of silicon as an element. It traces the emergence of silicon as key to the development of most forms of today's

electronics and its role in making possible the revolutionary digital computer. Loaded with information about such original thinkers as Lavoisier, John Bardeen, Bill Gates, Patrick Haggerty, Gordon Moore, and many more, the volume traces the use of silicon in metallurgy, as a diode rectifier in wireless and radio, and ultimately as a nonlinear element for heterodyne mixing in radar during World War II. Electronic Genie will appeal to students of

science and technology as well as to anyone interested in the history of these fields.

"Fresh insights into the nature of exceptional performance.... A deeply interesting and important book " (New York Times Book Review) that offers a revolutionary and life-changing message on the new science of human potential. Is true

greatness obtainable from everyday means and everyday genes? Conventional wisdom says no, that a lucky few are simply born with certain gifts. Now you can forget everything you think you know about genes, talent, and intelligence, and take a look at the amazing new evidence. Here, interweaving cutting-edge research from numerous scientific fields, David Shenk offers a new

view of human potential, giving readers more of a sense of ownership over their accomplishments, and freeing parents from the bonds of genetic determinism. As Shenk points out, our genes are not a "blueprint" that dictate individual destinies. Rather we are all the product of interplay between genes and outside stimuli—a dynamic that we can influence. It is a revolutionary and life-

changing message.
