<p>textbook is a first course in stochastic processes taken by undergraduate and graduate students (MS and PhD students from math, statistics, economics, computer science, engineering, and finance departments) who have had a course in probability theory. It covers Markov chains in discrete and continuous time, Poisson processes, renewal processes, martingales, and option pricing. One can only learn a subject by seeing it in action, so there are a large number of examples and more than 300 carefully chosen exercises to deepen the reader's understanding</p>	<p>Drawing from teaching experience and student feedback, there are many new examples and problems with solutions that use TI-83 to eliminate the tedious details of solving linear equations by hand, and the collection of exercises is much improved, with many more biological examples. Originally included in previous editions, material too advanced for this first course in stochastic processes has been eliminated while treatment of other topics useful for applications has been expanded. In addition, the ordering of topics has been improved; for example, the difficult subject of martingales</p>
---	--

---

is delayed until its usefulness can be applied in the treatment of mathematical finance.

SAS Visual Analytics is a business intelligence and analytics platform that provides visual exploration and discovery, self-service analytics, and interactive reporting for organizations of all sizes. All organizations have a wide variety of users, and each user needs something different from data and analytics. SAS Visual Analytics allows everyone to easily discover and share powerful insights that inspire action. Several useful papers have been written to demonstrate how to use these techniques. We have carefully selected a handful of these from recent Global Forum contributions to introduce you to the topic and let you sample what each has to offer. Also available free as a PDF

Forthcoming Books  
SAGE Publications  
Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety, authored by leadership expert Terry Anderson and several well known leaders in the law enforcement and criminal justice profession, responds to the need for a comprehensive leadership development model for the education and training of police, justice and public safety supervisors, managers and front line officers. He examines how leadership development has a profound impact on the morale and performance of individual officers, teams, and organizations, illustrating in depth and detail how

---

police and other justice and public safety leaders (in corrections, fire, customs, immigration, security, courts, etc.) can implement the Transforming Leadership process, skills, and principles. The recent focus (during the past 10 years) on community policing initiatives has made competency based leadership skills training essential for front line officers. The author's innovative contribution is a focus on the necessity to build "a leadership organization" before - and to an extent, while - you move ahead into building a "learning organization" that is responsive to community and internal organizational needs. The personal, team, and organization development skills discussed in this book are necessary pre-requisites to successful implementation of any neighborhood or community policing initiatives. Every Officer is a Leader: Transforming Leadership in Police, Justice, and Public Safety provides a model for integrating other models into a holistic leadership development framework. It furnishes a map for developing critical leadership skills with self-assessment, includes the developmental aspects of leadership expert Terry Anderson's previous book on Transforming Leadership, and applies them to law enforcement and criminal justice. Anderson and his contributing authors add clarity, perspective, and examples to show how individual leaders can

---

develop themselves, and one another, into high-performance team leaders and officers who motivate others to respond to issues that affect the morale, health, and safety of the communities in which they serve. This new focus adds a perspective on security issues that affect police, justice and public safety organizations.

This is a reference manual for military veterans as well as for medical and professional Service Representatives seeking information on Post-Traumatic Stress Disorder (PTSD), and how to apply for a disability relating to PTSD. Sources for research and blank application forms are provided, as well as a comprehensive personal

worksheet. In addition, the disability process is explained in detail. Instructions on how to submit a "stress letter" are included, and a separate section is provided dealing with current medications and treatment methods. Statistics: Learning from Data Infinity Guides Contains general information for technicians on the specifications, MIL resetting and DTC retrieval, accessory drive belts, timing belts, brakes, oxygen sensors, electric cooling fans, and heater cores of twenty-one types of import cars.

#### National Accident Sampling System Duxbury Press

Perform fast interactive analytics against different data sources using the Presto high-performance, distributed SQL query engine. With this practical guide, you'll learn how to conduct analytics on data where it lives, whether

---

it's Hive, Cassandra, a relational database, or a proprietary data store. Analysts, software engineers, and production engineers will learn how to manage, use, and even develop with Presto. Initially developed by Facebook, open source Presto is now used by Netflix, Airbnb, LinkedIn, Twitter, Uber, and many other companies. Matt Fuller, Manfred Moser, and Martin Traverso show you how a single Presto query can combine data from multiple sources to allow for analytics across your entire organization. Get started: Explore Presto's use cases and learn about tools that will help you connect to Presto and query data. Go deeper: Learn Presto's internal workings, including how to connect to and query data sources with support for SQL statements, operators,

functions, and more. Put Presto in production: Secure Presto, monitor workloads, tune queries, and connect more applications; learn how other organizations apply Presto. Business Transformation Strategies CRC Press. This global tuberculosis report is the first to be produced in the era of the SDGs and the End TB Strategy. It provides an assessment of the TB epidemic and progress in TB diagnosis, treatment and prevention efforts, as well as an overview of TB-specific financing and research. It also discusses the broader agenda of universal health coverage, social protection and other SDGs that have an impact on health. Data were available for 202 countries and territories that account for over

---

99% of the world's  
population and TB cases.
