The Centers for Disease Control and Prevention (CDC) established the Vessel Sanitation Program (VSP) in the 1970s as a cooperative activity with the cruise ship industry. The program assists the cruise ship industry in fulfilling its responsibility for developing and implementing comprehensive sanitation programs to minimize the risk for acute gastroenteritis. Every vessel that has a foreign itinerary and carries 13 or more passengers is subject to twice-yearly inspections and, when necessary, re-inspection.

Advances in Vocational Psychology devoted to presenting and evaluating important advances in the field of interest measurement. Progress in three well known interest inventories -- the Strong Campbell Interest Inventory, the Kuder Occupational Interest Survey, and the Self Directed Search -- is closely examined. A focus on innovations in interest measurement directs attention to how more recent instruments provide technical and conceptual advances over older, more reliable ones. Both research and counseling perspectives combine to provide a well-balanced guide to the study of vocational psychology. How interest inventories can be used beneficially in the career counseling of minority and majority populations is also explored.

[Regional Industrial Buying Guide](#) Cambridge University Press

This book provides the most comprehensive treatment to date of microeconometrics, the analysis of individual-level data on the economic behavior of individuals or firms using regression methods for cross section and panel data. The book is oriented to the practitioner. A basic understanding of the linear regression model with matrix algebra is assumed. The text can be used for a microeconometrics course, typically a second-year economics PhD course; for data-oriented applied microeconometrics field courses; and as a reference work for graduate students and applied researchers who wish to fill in gaps in their toolkit.

Distinguishing features of the book include emphasis on nonlinear models and robust inference, simulation-based estimation, and problems of

complex survey data. The book makes frequent use of numerical examples based on generated data to illustrate the key models and methods. More substantially, it systematically integrates into the text empirical illustrations based on seven large and exceptionally rich data sets.
