The Northern Goshawk in Utah Haynes Manuals N. America, Incorporated

This assessment describes northern goshawk (*Accipiter gentilis*) habitat in the State of Utah. Because of fire exclusion, insect and disease epidemics, timber harvest, livestock grazing, or a combination of these factors the forests and woodlands of Utah have changed drastically since the early 1900's. Forests are now dominated by mid- and late successional species (Douglas-fir, white fir, and subalpine fir) rather than the early successional species (lodgepole and ponderosa pine). Along with these changes came suspected declines in goshawk populations. Goshawk habitat in Utah was assessed using potential vegetation types, current vegetation types, and expert knowledge. Subalpine fir (17 percent) and quaking aspen (10 percent) potential vegetation types were the most common forest types in the State. Nearly 95 percent of the subalpine fir potential vegetation type was rated as high or medium for nesting habitat, while nearly 90 percent of the quaking aspen potential vegetation type was rated as high or medium for nesting. Similarly, combining nesting and foraging preferences 70 percent of the subalpine fir potential vegetation type is rated as either high value or optimum habitat. In addition, throughout Utah all of the high value habitats are well connected. The present conditions of the forests and woodlands of Utah are prone to insect and disease epidemics in addition to the risk of stand replacing fires. To ensure the goshawk's continued existence in Utah will require the restoration of these degraded habitats and the protection of native processes.

This is the much anticipated and thoroughly updated version of the popular but long out of print "Raptor Management Techniques Manual". Produced by the Raptor Research Foundation, this is a comprehensive work designed for use by raptor researchers and conservationists and natural-resource managers around the world. Each chapter has been authored by experts in the field and has undergone rigorous review. Not an all-inclusive manual or detailed "how-to" book, this new work reflects the state of the art in raptor research, with up-to-date information on various techniques, and numerous references to additional sources for details and cautions regarding various field and laboratory techniques and management tools. Beginning with a general review of the field of raptor research, it includes insights into field-study techniques, information on the energetics, physiology, pathology, and toxicology of raptors; it covers reduction of management and researcher disturbance, mitigation, population monitoring at migration watchsites, captive breeding, the augmentation of wild populations, and rehabilitation, and concludes with chapters on public education and legal considerations. This book will enhance standardisation in the field, speed improvement in techniques and help those who study and manage birds to better protect them.

Natural right—the idea that there is a collection of laws and rights based not on custom or belief but that are “ natural ” in origin—is typically associated with liberal politics and freedom. In *The Terror of Natural Right*, Dan Edelstein argues that the revolutionaries used the natural right concept of the “ enemy of the human race ” —an individual who has transgressed the laws of nature and must be executed without judicial formalities—to authorize three-quarters of the deaths during the Terror. Edelstein further contends that the Jacobins shared a political philosophy that he calls “ natural republicanism, ” which assumed that the natural state of society was a republic and that natural right provided its only acceptable laws. Ultimately, he proves that what we call the Terror was in fact only one facet of the republican theory that prevailed from Louis ’ s trial until the fall of Robespierre. A highly original work of historical analysis, political theory, literary criticism, and intellectual history, *The Terror of Natural Right* challenges prevailing assumptions of the Terror to offer a new perspective on the Revolutionary period.
