The Middle Ages were a period of tremendous cultural and scientific advancement in the Islamic Empire—ideas and inventions that shaped our world. Did you know that: • The numbers you use every day (Arabic numerals!) are a Muslim invention? • The marching band you hear at football games has its roots in the Middle East? • You are drinking orange juice at breakfast today thanks to Islamic farming innovations? • The modern city's skyline was made possible by Islamic architecture? The Muslim world has often been a bridge between East and West, but many of Islam's crucial innovations are hidden within the folds of history. In this important book, Bryn Barnard uses short, engaging text and gorgeous full-color artwork to bring Islam's contributions gloriously to life. Chockful of information and pictures, and eminently browsable, The Genius of Islam is the definitive guide to a fascinating topic.

Two Wheels To War is a scholarly but entertaining look at the largely forgotten world of the motorcycle despatch rider in the early months of the First World War, then a new phenomenon in the field of conflict. At the heart of the book is an illustrated and annotated edition of the underrated - and initially uncensored - classic first published in 1915, Adventures of a Despatch Rider, written by Captain WHL Watson, one of the well-educated young men who volunteered for the Signal service. He and over 400 other motorcyclists were sent to France, some mounted on their own machines, direct from the recruiting office. Sometimes uncomfortably close to the fast evolving action, Watson and his colleagues played a little known but key part in the early campaigns at Mons, Le Cateau, on the Retreat and on the Aisne. They accompanied the BEF returning to the north in October 1914 when the Western Front extended to Flanders, enduring the harsh winter that followed. His book, which initially escaped scrutiny by the censor, was a graphic and particularly well written account of the reality of war from the Retreat from Mons to the First Battle of Ypres. To illustrate his classic prose, we have unearthed a treasure trove of contemporary photographs, mainly taken by three of his fellow despatch riders in the 5th Signal Company, Pollers, Sadders and Cecil Burney, using the soldier's camera, the VPK, as the iconic Vest Pocket Kodak camera became known. As well as Watson's book itself, we continue his story until April 1915, when he was wounded and repatriated to England. His book was based on his letters home which were serialized in Blackwood's Magazine (the famous 'Maga'), an Edinburgh-based publisher responsible for other classics of the time such as The Thirty Nine Steps and The First Hundred Thousand. While convalescing from a shrapnel wound, Watson was persuaded to edit his letters into a book which was released in late 1915. Now commissioned, Watson resumed writing (but in a less personal style than before) about his experiences as an officer commanding a Cyclist's battalion, articles which appeared in Maga under the title Tales of a Gaspiper Officer. Plans to publish these in book form were thwarted by the censor who had by now spotted that his first book had slipped through the censor's net and had been withdrawn awaiting review. These Maga articles are republished here for the first time since 1916. Our introduction offers a new perspective on their story - how the Signal service hurriedly recruited and sent to France more than 400 motorcyclists with their own machines. We have also researched the biographical details of the twelve despatch riders of 5th Signal Company. These reveal their real identities, hidden until now behind the nicknames they used such as -Huggie- and -Spuggy- and the ironically named -Fat Boy-. The appendices describe the motorcycles and equipment the despatch riders used, and finally there is a database of the 400 men who went to France in this role in 1914, which will prove an invaluable tool for their descendants researching their forebears.

A practical guide for robust shar'ah governance of the Islamic banking industry Debate in the market on the extent of shar'ah compliance of Islamic banks, their products, and activities has piqued stakeholders' interest. In Foundations of Shar'ah Governance of Islamic Banks, Karim Ginena and Azhar Hamid explore the depths of shar'ah governance to unravel its mysterious dimensions, and equip academics and practitioners with a solid understanding of the subject, which has become a serious challenge and thus deserves dedicated attention. The authors make a strong case for the need to contain the shar'ah risk that Islamic banks experience, and present a compelling argument for how this should be done. Ginena and Hamid propose a robust shar'ah governance model that comprehensively tackles this risk, and helps improve the extent of shar'ah compliance of market players. The authors detail the internal, external, and institutional arrangements needed to promote responsible shar'ah governance, and critically analyze current laws, regulations, and industry practices on the topic. The chapters of the book do the following: Examine the roots, characteristics and objectives of shar'ah and its relation to financial dealings; Probe the role of regulators in shar'ah governance, explore the different approaches adopted by banking supervisors, and provide examples of relevant legal and regulatory measures; Explain to bank directors and management the fiduciary duty they assume with respect to shar'ah compliance, and detail how they could discharge this responsibility in line with best practices; Elaborate on the purpose of the Shar'ah Supervisory Board (SSB), its responsibilities, competence criteria, internal regulations, and key governance guidelines; additionally, they explore different SSB models; Describe the internal shar'ah control system including its six components, and examine the internal shar'ah audit function as well as different stages of conducting a shar'ah audit; Clarify the role of a shar'ah auditor, with guidance on reporting lines, scope of duties, authority, and practical ways on fulfilling tasks, such as a sample shar'ah risk assessment grid and audit checklists; Discuss the newly emerging external shar'ah advisory firms that are expected to play a key role in the coming years and the services they provide. Through an effective treatment of each of these elements, and the way that they interact with one another, the book offers a fresh take on how robust shar'ah governance of Islamic banks can be successfully accomplished. It is a comprehensive resource for academics, regulators, directors, lawyers, auditors, consultants, employees, and customers of Islamic banks interested in learning more about these challenges. This essential reading persuasively extends the discourse on the subject and addresses critical shar'ah issues that have policy implications for decision makers in jurisdictions aiming to attract the fast-growing Islamic finance industry or increase their market share.
