*Faces of Homelessness in the Asia Pacific* Lincoln Children's Books  
Across the Asia Pacific, there are a vast range of experiences of homelessness and an equally diverse range of responses from state systems. Since understandings of homelessness are also heavily dependent on geographical, cultural, and historical contexts, attitudes towards it as a 'social problem' are essentially underpinned by ideological considerations. With a particular focus on critical and international policy and practice, this book builds upon the current scholarship of homelessness across the Asia Pacific. Through examining and comparing a range of state responses, it explores the differing definitions and lived experiences of the issue in a number of countries, including Japan, China, India, Korea, and Australia. The book analyses a range of key themes from welfare provision and legislation to the services provided and the roles played by non-governmental organisations, whilst also recognising the effects of class, gender and ethnicity on homelessness in the region. Taking an interdisciplinary approach, *Faces of Homelessness in the Asia Pacific* will be useful to students and scholars of Social Policy, Urban Sociology, Psychology and Asian Studies.

Can war be taught? Does its nature allow it to be taught? are basic questions which all those engaged in the profession of Wars have to ponder. With the exception of the common denominator : the man, no two wars have been the same. In spite of its variable nature war schools have flourished. Foch then a lieutenant colonel discussed some theorms or principles of war in a series of lectures at the French Staff College in the early years of the present century. These were first published in 1903 and the present edition in 1918. With this limited scope and study of battles which are long past many changes have taken place in our concept, understanding and nature of war due to improved weapons and mobility, necessitating better tactical use of ground This historical study leads Foch to a theory of war, which can be taught and the shape of a doctrine which his pupils were to be taught to practice. He explains it further : What is meant by these words is the conception and the practical application not of a science of war nor of some limited dogmas composed of abstract truths outside which all would be heresy, but of a certain number of principles, the application of which, though they will not be open to discussion once they shall have been established, must logically vary according to circumstances which always tending towards the same goal and that an objective goal.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the

Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. A stunning debut; a Departures original publication. The ultimate survival story; a wild ride—the wildest—down a South American river in the thick of the Amazon Basin; a true and thrilling adventure of a young married couple who survive a plane crash only to later raft hundreds of miles across Peru and Bolivia, ending up in a channel to nowhere, a dead end so flooded there is literally no land to stand on. Their raft—a mere four logs—separates them from the piranha-and-caiman-infested water until they finally realize that there is no way out but to swim. Vintage Original. Holly FitzGerald and her husband, Fitz—married less than two years—set out on a yearlong honeymoon adventure of a lifetime, backpacking around the world. Five months into the trip their plane crash lands in Peru at a penal colony walled in by jungle, and their blissfully romantic journey turns into a terrifying nonstop labyrinth of escape and survival. On a small, soon-ravaged raft that quickly becomes their entire universe through dangerous waters alive with deadly animals and fish, their only choice: to continue on, despite the rush of insects swarming them by day, the sounds of encroaching predators at night. Without food or means of communication, with no one to hear their cries for help or on a search-and-rescue expedition to find them, the author and her husband make their way, fighting to conquer starvation and navigate the brute force of the river, their only hope for survival, in spite of hunger and weakening resolve, to somehow, miraculously hang on and find their way east to a large riverside town, before it is too late. . . .

*Resisting the Evil* Golden Books  
An introduction to dependent types, demonstrating the most beautiful aspects, one step at a time. A program's type describes its behavior. Dependent types are a first-class part of a language, and are much more powerful than other kinds of types; using just one language for types and programs allows program descriptions to be as powerful as the programs they describe. The Little Typer explains dependent types, beginning with a very small language that looks very much like Scheme and extending it to cover both programming with dependent types and using dependent types for mathematical reasoning. Readers should be familiar with the basics of a Lisp-like programming language, as presented in the first four chapters of The Little Schemer. The first five chapters of The Little Typer provide the needed tools to understand dependent types; the remaining chapters use these tools to build a bridge between mathematics and programming. Readers will learn that tools they know from programming—pairs, lists, functions, and recursion—can also capture patterns of reasoning. The Little Typer does not attempt to teach either practical programming skills or a fully rigorous approach to types. Instead, it demonstrates the most beautiful aspects as simply as possible, one step at a time.

In The Space of Boredom Bruce O'Neill explores how people cast aside by globalism deal with an intractable symptom of downward mobility: an unshakeable and immense boredom. Focusing on Bucharest, Romania, where the 2008 financial crisis compounded the failures of the postsocialist state to deliver on the promises of liberalism, O'Neill shows how the city's homeless are unable to fully participate in a society that is increasingly organized around practices of consumption. Without a job to work, a home to make, or money to spend, the homeless—who include pensioners abandoned by their families and the state—struggle daily with the slow deterioration of their lives. O'Neill moves between homeless shelters and squatter camps, black labor markets and transit stations, detailing the lives of men and women who manage boredom by seeking stimulation, from conversation and coffee to sex in public restrooms or going to the mall or IKEA. Showing how boredom correlates with the downward mobility of Bucharest's homeless, O'Neill theorizes boredom as an enduring affect of globalization in order to provide a foundation from which to rethink the politics of alienation and displacement.

The complete works of one of England's greatest Edwardian writers Saki is perhaps the most graceful spokesman for England's 'Golden Afternoon' - the slow and peaceful years before the First World War. Although, like so many of his generation, he died tragically young, in action on the Western Front, his reputation as a writer continued to grow long after his death. His work is humorous, satiric, supernatural, and macabre, highly individual, full of eccentric wit and unconventional situations. With his great gift as a social satirist of his contemporary upper-class Edwardian world, Saki is one of the few undisputed English masters of the short story and one of the great writers of a bygone era. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Welfare conditionality has become an idea of global significance in recent years. A ‘ hot topic ’ in North America, Australia, and across Europe, it has been linked to austerity politics, and the rise of foodbanks and destitution. In the Global South, where publicly funded welfare protection systems are often absent, conditional approaches have become a key tool employed by organisations pursuing human development goals. The essence of welfare conditionality lies in requirements for people to behave in prescribed ways in order to access cash benefits or other welfare support. These conditions are typically enforced through benefit ‘ sanctions ’ of various kinds, reflecting a new vision of ‘ welfare ’ , focused more on promoting ‘ pro-social ’ behaviour than on protecting people against classic ‘ social risks ’ like unemployment. This new book in Routledge ’ s Key Ideas series charts the rise of behavioural conditionality in welfare systems across the globe, its appeal to politicians of Right and Left, and its application to a growing range of social problems. Crucially it explores why, in the context of widespread use of conditional approaches as well as apparently strong public support, both the efficacy and the ethics of welfare conditionality remain so controversial. As such, Welfare Conditionality is essential reading for students, researchers, and commentators in social and public policy, as well as those designing and implementing welfare policies.
