Everything you need to know to restore or customize your classic Japanese motorcycle. Whether you want to correctly restore a classic Japanese motorcycle or create a modified, custom build, you need the right information about how to perform the mechanical and cosmetic tasks required to get an old, frequently neglected, and often long-unridden machine back in working order. *How to Rebuild and Restore Classic Japanese Motorcycles* is your thorough, hands-on manual, covering all the mechanical subsystems that make up a motorcycle. From finding a bike to planning your project to dealing with each mechanical system, *How to Rebuild and Restore Classic Japanese Motorcycles* includes everything you need to know to get your classic back on the road. Japanese motorcycles have been the best-selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawasaki H1, H2, Z1R - and these have now become the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

116 pages, with more than 360 illustrations and diagrams, size 8.25 x 10.75 inches. At the time of Floyd Clymer's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication. This 'Honda 125cc - 200cc' is one of those completed but previously unpublished compilations of various Honda Factory Manuals for the 125cc, 160cc, 175cc and 200cc center cam drive twins. While this manual was likely completed in early 1970 it actually covers the 1964 through 1978 street, scrambler and motosport models. The primary focus is the maintenance and repair of the major mechanical and electrical components including: Engine, Transmission, Clutch, Fuel, Electrical, Frame, Suspension and Steering. Owners of the earlier 125-150cc C92 & C95 twin cylinder 'Benly' series (1959-1966) are directed to our Honda factory workshop manual ISBN 9781588500823 which is exclusive to those models. After his visit to Japan in 1961, Floyd Clymer published 'The Complete Catalog of Japanese Motor Vehicles' (ISBN 9781588502209). Based on his experiences during that visit, Floyd also anticipated the need for repair manuals for those Japanese motorcycles that were just starting to be imported into the USA [Yamaha (1958), Honda (1959), Suzuki (1963)]. The predominance of the Floyd Clymer Japanese motorcycle manuals were reprints or compilations of the factory publications, which today makes them more desirable than the current aftermarket manuals.
