This thesis deals with Rare Earth Elements (REE), especially with neodymium used in permanent magnets, from a very scientific basis by providing basic research data. Despite the fact that REE are newsworthy and very important elements for a considerable bandwidth of today's technologies, accompanied by the monopolistic supply-situation and Chinese politics, there are inexplicable data discrepancies about REE which have been recognized frequently but usually have not been addressed accordingly. So this analysis started with the hypothesis that the four application areas, namely computer hard disk drives (HDD), mobile phones, wind turbines and e-mobility (automotive traction), account for about 80% of the global annual neodymium-demand. The research methodology was a laboratory analysis of the composition of used magnets for HDDs and mobile phones and a literature and official report analysis of wind turbine and automotive neodymium use. The result was amazing and the hypothesis had to be withdrawn as these four areas only account for about 20% of neodymium use. This result raises some questions concerning actual use and thus potential recycling options.

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Prices and quantities of both stock and flow variables in an economic system are decisively influenced by their spatial coordinates. Any equilibrium state also mirrors the underlying

spatial structure and a tatonnement process also incorporates the spatial ramifications of consumer and producer behaviour. The recognition of the spatial element in the formation of a general equilibrium in a complex space-economy already dates back to early work of Losch, Isard and Samuelson, but it reached a stage of maturity thanks to the new inroads made by T. Takayama. This book is devoted to spatial economic equilibrium (SPE) analysis and is meant to pay homage to the founding father of modern spatial economic thinking, Professor Takayama. This book witnesses his great talents in clear and rigorous economic thinking regarding an area where for decades many economists have been groping in the dark. Everybody who wants to study the phenomenon of spatial economic equilibrium will necessarily come across Takayama's work, but this necessity is at the same time a great pleasure. Studying his work means a personal scientific enrichment in a field which is still not completely explored. The present volume brings together recent contributions to spatial equilibrium analysis, written by friends and colleagues of Takayama. The structure of the book is based on four main uses of spatial equilibrium models: (i) the imbedding of spatial flows in the economic environment, related to e.g.

I was the Fool-king of Soho and the number-one slag in the Groucho Club, the second drunkest member of the world's drunkest band. This was no disaster, though. It was a dream coming true.' For Alex James, music had always been a door to a more eventful life. But as bass player of Blur - one of the most successful British bands of all time - his journey was more exciting and extreme than he could ever have predicted. In **Bit of a Blur** he chronicles his journey from a slug-infested flat in Camberwell to a world of screaming fans and private jets - and his eventual search to find meaning and happiness (and, perhaps most importantly, the perfect cheese), in an increasingly surreal world.

'I am already planning the next adventure. The wanderlust that infected me has no cure.' It all started in Fishguard in the mid-1970s when, aged fifteen, Martyn Howe and a friend set off on the Pembrokeshire Coast Path armed with big rucksacks, borrowed boots, a Primus stove and a pint of paraffin, and a thirst for adventure. After repeating the route almost thirty years later, Martyn was inspired to walk every National Trail in England and Wales, plus the four Long-Distance Routes (now among the Great Trails) in Scotland. His 3,000-mile journey included treks along the South West Coast Path, the Pennine Way, the Cotswold Way and the West Highland Way. He finally achieved his ambition in 2016 when he arrived in Cromer in Norfolk, only to set a new goal of walking the England and Wales Coast Paths and the Scottish National Trail. In **Tales from the Big Trails**, Martyn vividly describes the diverse landscapes, wildlife, culture and heritage he encounters around the British Isles, and the physical and mental health benefits he derives from walking. He also celebrates the people who enrich his travels, including fellow long-distance hikers, tourists discovering Britain's charm, farmers working the land, and the friendly and eccentric owners of

hostels, campsites and B&Bs. And when he is asked 'Why do you do it?', the answer is as simple as placing one foot in front of the other: 'It makes me happy.'

From the authors of the best-selling *The Secrets of Happily Married Men* comes the much-anticipated follow-up book *The Secrets of Happily Married Women*. In their first book, Dr. Haltzman and his coauthor Theresa Foy DiGeronmio outlined a recipe for men about growing a happy marriage: treat marriage with the same sense of purpose, resolve, and single-minded devotion that they have for their job. Although that workplace formula works well for men, an entirely different set of criteria resonate with women. In *The Secrets of Happily Married Women*, Dr. Haltzman tells us stories from real women who are happy in their relationships. These women know how to get more out of their partners by doing less, by not trying so hard to make men perfect, not dragging them to couples therapy, not expecting them to think or behave like a woman. These are women from Dr. Haltzman's clinical practice and culled from thousands of contributors to his Web site www.HappilyMarriedWomen.com. They have learned to understand how men really work and tap into men's powerful hard-wired desire to please women and "be a better man."
