* we updated this book in Feb 2015 * According to MS, exam 70-667 is all about configuring SharePoint Server 2010. Topics include: Installing and Configuring a SharePoint Environment Managing a SharePoint Environment Deploying and Managing Applications Maintaining a SharePoint Environment Exam 331 covers the new generation Sharepoint Server. Topics include: Design a SharePoint Topology Plan Security Install and Configure SharePoint Farms Create and Configure Web Applications and Site Collections Maintain a Core SharePoint Environment Although the two exams have BOKs that look quite different, they in fact share many common knowledge (the fundamentals of SharePoint administration and operation are almost identical between the 2010 version and the 2013 version) and we strongly recommend that you study for both together - in your job environment you will quite likely encounter both versions. We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic list. The exam does not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. To succeed in the exam, you need to read as many reference books as possible. There is no single book that can cover everything! This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome. You should download the evaluation copy of SharePoint Server 2010/2013 and play with them. SharePoint Server can be downloaded from Technet for evaluation purpose.
