The Handbook of Islamic Banking comprises 25 studies by leading international experts on Islamic banking and finance specially commissioned to analyse the various debates

and the current state of play in the field. From its origins thirty years ago, Islamic banking has expanded rapidly to become a distinctive and fast growing segment of the international banking and capital markets. Despite this expansion, Islamic banking still remains poorly understood in many parts of the Muslim world and continues to be a mystery in much of the West. This comprehensive Handbook provides a succinct analysis of the workings of Islamic banking and finance, accessible to a wide range of readers. At the same time, it seeks to bring the current research agenda and the main issues on Islamic banking before a wider audience. Islamic banking offers, as an alternative to conventional interest-based financing methods, a wide variety of financial instruments and investment vehicles based on profit-and-loss sharing

arrangements. These are all explored in detail along with other subjects such as governance and risk management, securities and investment, structured financing, accounting and regulation, economic development and globalization. M. Kabir Hassan, Mervyn Lewis and the other contributors have created an authoritative and original reference work, which will contribute to a wider understanding of Islamic banking as well as provoking further discussion and research. It will be invaluable to all scholars, researchers and policymakers with an interest in this subject.

A practical guide for robust shar'ah governance of the Islamic banking industry Debate in the market on the extent of shar'ah compliance of Islamic banks, their products, and activities has piqued stakeholders' interest. In Foundations of Shar'ah Governance of Islamic Banks, Karim Ginena and Azhar Hamid explore the depths of

shar'ah governance to unravel its mysterious dimensions, and equip academics and practitioners with a solid understanding of the subject, which has become a serious challenge and thus deserves dedicated attention. The authors make a strong case for the need to contain the shar'ah risk that Islamic banks experience, and present a compelling argument for how this should be done. Gina and Hamid propose a robust shar'ah governance model that comprehensively tackles this risk, and helps improve the extent of shar'ah compliance of market players. The authors detail the internal, external, and institutional arrangements needed to promote responsible shar'ah governance, and critically analyze current laws, regulations, and industry practices on the topic. The chapters of the book do the following: Examine the roots, characteristics and objectives of shar'ah and its relation to financial dealings; Probe the role of regulators in shar'ah governance, explore the different approaches adopted by banking supervisors, and provide examples of relevant legal and regulatory measures; Explain to bank directors and management the fiduciary duty they assume with respect to shar'ah compliance, and detail how they could discharge this responsibility in line with best practices; Elaborate on the purpose of the Shar'ah Supervisory Board (SSB), its responsibilities, competence criteria, internal regulations, and key governance guidelines; additionally, they explore different SSB models; Describe the internal shar'ah control system including its six components, and examine the internal shar'ah audit function as well as different stages

of conducting a shar'ah audit; Clarify the role of a shar'ah auditor, with guidance on reporting lines, scope of duties, authority, and practical ways on fulfilling tasks, such as a sample shar'ah risk assessment grid and audit checklists; Discuss the newly emerging external shar'ah advisory firms that are expected to play a key role in the coming years and the services they provide. Through an effective treatment of each of these elements, and the way that they interact with one another, the book offers a fresh take on how robust shar'ah governance of Islamic banks can be successfully accomplished. It is a comprehensive resource for academics, regulators, directors, lawyers, auditors, consultants, employees, and customers of Islamic banks interested in learning more about these challenges. This essential reading persuasively extends the discourse on the subject and addresses critical shar'ah issues that have policy implications for decision makers in jurisdictions aiming to attract the fast-growing Islamic finance industry or increase their market share.

Legal, Regulatory and Governance Issues in Islamic Finance Palgrave Macmillan

This book provides valuable insights into the practical challenges faced by the nascent Islamic finance industry and compares the Australian experience to developments in the UK. It contributes to a greater understanding of how Muslims living as a minority in Australia and the UK negotiate Islamic doctrine in secular societies by focusing on one aspect of this negotiation, namely the prohibition of ribā. There is little debate in the Islamic tradition on the prohibition of ribā. The differences, however, lie in the interpretation of ribā and the question of how Muslims live in a society that is heavily reliant on interest and conventional banking, yet at the same time adhere to Islamic guidelines. Through the words of religious leaders, Muslim professionals and university students, Imran Lum provides real accounts of how Muslims in Australia and the UK practically deal with conventional banking and finance products such as home loans, savings accounts and credit cards. He also explores Muslim attitudes towards Islamic finance and queries whether religion is the sole determining factor when it comes to its uptake. Drawing on his own unique experience as a

practitioner responsible for growing an Islamic business in a conventional bank, Lum provides a firsthand account of the complexities associated with structuring Islamic finance products that are not only sharia compliant but also competitive in a non-Muslim jurisdiction. Using sukuk bonds as a case study, he highlights the tangible and non-tangible barriers to product development, such as tax and regulatory requirements and the rise of Islamophobia. Combining academic and industry experience, Lum unpacks the relationship of Islamic finance with Muslim identity construction in the West and how certain modalities of religiosity can lead to an uptake of Islamic finance, while others can lead to its rejection. A Comparative Study of Islamic Finance in Australia and the UK CERT Publications Sdn Bhd

Introduction to Islamic Banking and Finance is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent with the Sharia'a, a key element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Sharia'a contracts of Murabaha,

Mudaraba, Musharaka, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Sharia'a law and Sharia'a boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and growing market. Although estimates of the size of the Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

A detailed look at the fast-growing field of Islamic banking and finance The Art of Islamic Banking and Finance is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company,

LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic "bubbles." The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed

analysis of the superior results realized by applying this new brand of banking to financing.

Can Islamic finance save the global system? Islamic Finance and the New Financial System describes how the adoption of Islamic finance principles in future regulatory decisions could help prevent future shocks in the global financial system. FOLLOW THE MONEY Some people work all their lives for it. Some people have huge amounts of it, and some have almost none. Some steal it, some kill for it. Some men and women marry for it. Some people gamble everything they can, hoping to win more of it and some actually do win, but most lose. Some lie for it, some die for it. Many nations go to war for it. Most of the films we see and a great many of the stories we read are about people who do many of the above things for it. But what is money? The modern world is a complex place. Ideologies and religions swirl, entangle with and wage war upon each other. Politically, socially and militarily the world is in upheaval. Economics, commerce and finance move in their own fashion and move many other forces from behind. The whole makes a strangely compelling but disturbing fabric of interwoven threads. And when was it ever different? This book was written in the conviction that if we use the old journalist's rule "Follow the Money" we can make some sense of that. **ABDASSAMAD CLARKE**
