The *Real Shark's Tank* is a deft mix of the author's dates and research about online dating. Find out which websites have the least men, if more men or women lie while online dating, and if you're less likely to marry while you online date. L.V. Krause breezily exposes why online dating is so frustrating for so many women, from the weight online dating men prefer (anorexic), to the age most men prefer (ten years younger), to whether relationships that start online break up more often than those that start offline. (They do.) The *Real Shark's Tank* delves into fascinating psychological research about what makes players tick, how to avoid them, and why the dating websites are their personal safari kingdoms. The author offers up plenty of her own comic online dating life—including showing up for jury duty to find that the prosecutor was a past online date. She decided she needed her own *Sex and the City* group of girlfriends and emailed other women on the same dating website to form a supportive group in their beachside Florida city. As one of her dates laughingly complained, "You're unionizing!" After online dating for over a year, the author wanted to shout it from the rooftops to the women trudging through the online dating world: "It's not you, it's online dating!"

Just remember, you can't climb the ladder of success with your hands in your pockets. Arnold Schwarzenegger Everyone is searching for a formula for success, but there is no one, single formula for everyone as our needs, wants and wishes vary from individual to individual. On the other hand, it is noteworthy to mention that those who have achieved success have many qualities in common. The attributes of vision, risk-taking, passion, planning, focus and perseverance are typically utilized in various proportions to accomplish success. On the journey to success, the first-timer must identify a goal, as the goal determines your actions. Then there is your measurement of success. One commonly-used gauge of success is financial progress. Other yardsticks include public acclaim, spiritual progress, personal health, knowledge, improved self-esteem and confidence ... and

the list goes on. What is yours? After deciding on your goal, you proceed to develop your own success formula. This is where our Celebrity Experts(R) (authors/mentors) in this book can help. These mentors can save you time, effort, heartache and resources by helping you to create The Success Formula needed to achieve your goal. Successful people maintain a positive focus in life no matter what is going on around them. They stay focused on their past successes rather than their past failures, and on the next action steps they need to take to get them closer to the fulfillment of their goals rather than all the other distractions that life presents to them. From the Hardcover edition. Grow Your Handmade Business Dunham Group The bestselling author and star of ABC's Shark Tank reveals how to master the three prongs of influence: reputation, negotiation, and relationships. Have you ever wanted to make a big change in your life but weren't sure where to start? In Powershift, Daymond John shares the answer. To take control of your destiny and drive the change you want to see, you need to lay the groundwork so you're prepared to seize every opportunity that comes your way. And that means mastering • Influence—make an impression: Develop a reputation that highlights what you stand for. • Negotiation—make a deal: Hone a win-win negotiating style. • Relationships—make a connection last: Nurture those connections you make along the way. Through never-before-told stories from his life and career, Daymond shares the lessons that got him to where he is today: from how he remade his public image as he transitioned from clothing

mogul to television personality, to how he mastered the negotiation strategies that determine whether deals are won or lost “in the tank,” to his secrets for building long-lasting—and profitable—relationships with founders and brands. Throughout the book, some of the world's most successful personalities reveal how they shifted their power in meaningful ways: Kris Jenner on determining your value: “You don't have to go ask somebody else for permission. You have the power to be able to stick to your guns and demand your worth.” Mark Cuban on finding and understanding your why: “Time is the one asset we don't own, we can't buy, and we can never get back.” Pitbull on tapping into your inner power: “A lot of people feel that to be powerful is to exude strength. I think it's the total opposite. To be powerful is to be powerless. It's when you give everybody what you got.” Whether you're an innovator working to turn your big idea into a reality, a professional looking to land a major promotion, or a busy parent trying to find more time to focus on what's really important to you, Daymond shows you how to shift your power and energy towards positive change. "This book delivers completely new and refreshing ideas on how to create value in the world."—Mark Zuckerberg, CEO of Meta "Peter Thiel has built multiple breakthrough companies, and *Zero to One* shows how."—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In

Zero to One, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we're too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. *Zero to One* presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.
