Philippe de Vosjoli has

written a concise and useful guide, well illustrated with color photographs, that offers all of the information a boa keeper needs to maintain a pet snake safely and in the best of health. This Advanced Vivarium Systems title includes information about selecting and purchasing a healthy boa constrictor, proper housing and maintenance needs, feeding, and safe handling. Dr. Roger	Klingenberg, a herp veterinary specialist, has written a special health chapter on diseases and disorders, with particular emphasis on the dreaded boa AIDS (inclusion body disease or IBD) as well as parasitism, respiratory disease, and more. The chapter concludes with a six-page chart on troubleshooting health concerns, which all boa constrictor keepers will find useful for general	upkeep and recognizing and dealing with serious issues. Beyond the husbandry and health of boa constrictors, this book offers an excellent chapter by Jeff Ronne on breeding Colombia boa constrictors, beginning with the size and health of breeding and animals and the female's cycling to the birth and care of newborns. The use of images, particularly photography, has been steadily gaining popularity in academia, but there has not yet been a book that deals with the act and process of photo-taking in the field. Drawing upon 21 years of photographic experience and sociological research, Terence Heng 's immersive and narrative style will: introduce photography as a qualitative method; discuss the intricacies of, challenges in and

opportunities for using a camera in the field; explore common themes and topics in social science research, including photographing rituals, space, people and objects; advise on navigating the always evolving technological landscapes of traditional, digital and mobile photography. Visual Methods in the Field: Photography for the Social Sciences is a photography guide written for researchers by a researcher. Using in-

depth ethnographic case studies from research done in various urban environments, this book will act as a crucial bridge for students in geography, sociology, education, media studies and other social sciences to incorporate photography into their research repertoire. Popular Science Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, &

short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

This manual provides direction for the preparation of noise and vibration sections of environmental documents for mass transportation projects.

The manual has been developed in the interest of promoting quality and uniformity in assessments. It is expected to be used by people associated with or affected by the urban transit industry, including Federal Transit Administration (FTA) staff, grant applicants, consultants and the general public. Each of these groups has an interest in noise/vibration assessment, but not all

have the need for all the details of the process. Consequently, this manual has been prepared to serve readers with varying levels of technical background and interests. It sets forth the basic concepts, methods and procedures for documenting the extent and severity of noise impacts from transit projects.
