A Discovery of Witches meets Twilight in this mesmerizing paranormal romance... Naomi Feldman has never understood the strange energy that hums beneath her senses. But when she comes across an ancient artifact that seems to beckon to her, she may finally find the answers she's been seeking. Alaric, a centuries-old vampire, lives a solitary life by choice. When he's assigned to protect Naomi, long dormant emotions stir to life. Pursued by a dangerous enemy and battling their growing attraction, Naomi and Alaric follow the mystery of the artifact from the museums of Athens, the streets of London, toward a confrontation that will decide the fate of two worlds... Fans of Charlaine Harris, Deborah Harkness, and Karen Marie Moning will love the Descendants series, where urban fantasy and paranormal romance collide. For a limited time, grab your copy of this series bundle deal at a discount compared to purchasing the individual books.

Happy Valentine's Day G Schirmer Incorporated
It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently,

deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys’ killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

An Amazon Best Books of the Year selection BookBub Breakout Debut Novels of Winter 2018 The Verge?18 Science Fiction and Fantasy Books to Read in February Barnes & Noble–One of 25 Sci-Fi/Fantasy Debuts to Watch for in 2018 Nerdmuch–Best New Sci-Fi & Fantasy Books of 2018 Bookish–Winter 2018’s Hottest Sci-Fi and Fantasy Books Library Journal: Spring/Summer Best Debut Novels “Interesting quirks and divided loyalties flesh out this first novel in which sf and mystery intersect in a well-crafted plot...Pedreira’s science thriller powerfully highlights the human politics and economics from the seemingly desolate expanse of the moon. It will attract readers who enjoyed Andy Weir’s lunar crime caper Artemis.” -- Library Journal, starred review A realistic and chilling vision of life on the Moon, where dust kills as easily as the vacuum of space...but murder is even quicker—a fast-paced, cinematic science fiction thriller, this debut novel combines the inventiveness of The Martian, the intrigue of The Expanse, and the thrills of Red Rising. The Moon smells like gunpowder. Every lunar walker since Apollo 11 has noticed it: a burnt-metal scent that reminds them of war. Caden Dechert, the chief of the U.S. mining operation on the edge of the Sea of Serenity, thinks the smell is just a trick of the mind—a reminder of his harrowing days as a Marine in the war-torn Middle East back on Earth. It’s 2072, and lunar helium-3 mining is powering the fusion reactors that are bringing Earth back from environmental disaster. But competing for the richest prize in the history of the world has destroyed the oldest rule in space: Safety for All. When a bomb kills one of Dechert’s diggers on Mare Serenitatis, the haunted veteran goes on the hunt to expose the culprit before more blood is spilled. But as Dechert races to solve the first

murder in the history of the Moon, he gets caught in the crosshairs of two global powers spoiling for a fight. Reluctant to be the match that lights this powder-keg, Dechert knows his life and those of his crew are meaningless to the politicians. Even worse, he knows the killer is still out there, hunting. In his desperate attempts to save his crew and prevent the catastrophe he sees coming, the former Marine uncovers a dangerous conspiracy that, with one spark, can ignite a full lunar war, wipe out his team . . . and perhaps plunge the Earth back into darkness.

100 Questions and Answers About Chronic Pain Alfred Music

The Clone was a work-in-progress in 2002. As this book was being written, many advances have occurred in the area of cloning. In the future humans will be cloned. Will they be treated as equals or just a creation of man? Will it be used to transfer a dieing spouse or child into a healthy body so that they can continue to live? Will it only be available to the Wealthy? No one will stop the future of cloning. It will become a part of our lives. Used for good or evil, only the future can say.

Do you crave food all the time? Do you think you might want to eat again in the future? Do you suck at cooking? Inspired by the wildly popular YouTube channel, these 60+ recipes will help you suck slightly less You already

know the creator of the YouTube show You Suck at Cooking by his well-manicured hands and mysterious voice, and now you'll know him for this equally well-manicured and mysterious tome. It contains more than sixty recipes for beginner cooks and noobs alike, in addition to hundreds of paragraphs and sentences, as well as photos and drawings. You'll learn to cook with unintimidating ingredients in dishes like Broccoli Cheddar Quiche Cupcake Muffin-Type Things, Eddie's Roasted Red Pepper Dip (while also learning all about Eddie's sad, sad life), Jalapeño Chicken, and also other stuff. In addition, there are cooking tips that can be applied not only to the very recipes in this book, but also to recipes outside of this book, and to all other areas of your life (with mixed results). In the end, you just might suck slightly less at cooking.* *Results not guaranteed

Yummy! : Food Coloring Book Nelson Thornes
The de Young is San Francisco's oldest art museum, treasured in a unique verdant setting. Beginning as the Golden Gate Park Memorial Museum in 1895, the museum has been a valued center of world art and culture, serving the Bay Area and, increasingly, national and international visitors and scholars. A city museum since 1924, it joined the Legion of Honor in 1972 to become part of the Fine Arts Museums of San Francisco, together preserving and exhibiting the most widely inclusive art collections in the city. Over the years, the de Young buildings changed in telling ways, transforming to protect and present a continuously expanding array of objects and their histories.0Published to mark the 125th anniversary of the de Young, this volume offers a new path to artworks from across its departmental disciplines: art from Africa, Oceania, and the Americas; American art; contemporary art and programming; costume and textiles; and works on paper. Poetic themes, curatorial insights, brief institutional histories, and an expanded historical timeline are accompanied by lavish new photography, presenting this beloved museum to audiences today. de Young 125 features a selection of 125 works from around the world that span more than two millennia and convey a shared human experience and creative achievement.

Computer Control of Manufacturing Systems
This volume collects thirteen expository or survey articles on topics including Fractal Geometry, Analysis of Fractals, Multifractal Analysis, Ergodic Theory and Dynamical

Systems, Probability and Stochastic Analysis, written by the leading experts in their respective fields. The articles are based on papers presented at the International Conference on Advances on Fractals and Related Topics, held on December 10-14, 2012 at the Chinese University of Hong Kong. The volume offers insights into a number of exciting, cutting-edge developments in the area of fractals, which has close ties to and applications in other areas such as analysis, geometry, number theory, probability and mathematical physics.
