Conceptualizing the curse as the representation of a foundational, mythical violence that is embedded within juridical discourse, *Shakespeare's Curse: The Aporias of Ritual Exclusion in Early Modern Royal Drama* pursues a reading of Richard III, King John, and King Lear in order to analyse the persistence of imprecations in the discourses of modernity. Shakespeare wrote during a period that was transformative in the development of juridical thinking. However, taking up the relationship between theater, theology and law, Björn Quiring argues that the curse was not eliminated from legal discourses during this modernization of jurisprudence; rather, it persisted and to this day continues to haunt numerous speech acts. Drawing on the work of Derrida, Lacan, Walter Benjamin and Giorgio Agamben, among others, Quiring analyses the performativity of the curse, and tracks its power through the juristic themes that are

pursued within Shakespeare's plays – such as sovereignty, legitimacy, succession, obligation, exception, and natural law. Thus, this book provides an original and important insight into early modern legal developments, as well as a fresh perspective on some of Shakespeare's best known works. A fascinating interdisciplinary study, this book will interest students and scholars of Law, Literature, and History.

In the last quarter of the twentieth century, urban colleges and universities found themselves enveloped by the poverty, crime, and physical decline that afflicted American cities. Some institutions turned inward, trying to insulate themselves rather than address the problems in their own backyards. Others attempted to develop better community relations, though changes were hard to sustain. Spurred by an unprecedented crime wave in 1996, University of Pennsylvania President Judith Rodin knew that the time for urgent action had arrived, and she set a new course of proactive community engagement for her university. Her dedication to the revitalization of West Philadelphia was guided by her role not only as president but also as a woman and a mother with a deep

affection for her hometown. The goal was to build capacity back into a severely distressed inner-city neighborhood—educational capacity, retail capacity, quality-of-life capacity, and especially economic capacity—guided by the belief that "town and gown" could unite as one richly diverse community. Cities rely on their academic institutions as stable places of employment, cultural centers, civic partners, and concentrated populations of consumers for local business and services. And a competitive university demands a vibrant neighborhood to meet the needs of its faculty, staff, and students. In keeping with their mission, urban universities are uniquely positioned to lead their communities in revitalization efforts, yet this effort requires resolute persistence. During Rodin's administration (1994-2004), the Chronicle of Higher Education referred to Penn's progress as a "national model of constructive town-gown interaction and partnership." This book narrates the challenges, frustrations, and successes of Penn's campaign, and its prospects for long-term change.

Examples of economic solutions to common problems help you understand the need for economic application to aquaculture and the success that may come with sound economic planning and management. It also provides coverage of virtually all basic principles of microeconomics, farm management finance, and marketing applicable to the aquacultural industry. You will "walk" through the intricate maze of decisions which are necessary for success in the business environment. Additionally, producers and students alike will find that application of careful economic planning results in long-term viability for individual producers as well as community projects, cooperatives, or even governmental projects. Special sections in the book illustrate the savings or costs of right and wrong decisions as well as those related to short versus longer term planning and investment. Other topics covered in this book include: role of aquaculture in economic development fish demand and supply farm management and operation time value of money in the short- and long-term capital budgeting market structure and price theory government in aquaculture Along with students, other readers will find the business help they need in *Economics of Aquaculture*. ballads reveal the bawdy, anarchic sub-culture of England before the Industrial Revolution. Drawn from the eighteenth and early nineteenth centuries, it demonstrates the great wealth and variety of the English broadside ballads during these periods. At this time political balladry was rife and Irish ballads began to be composed in English - their distinctive background giving them a unique range of poetry. Indeed, these ballads represent an extensive, varied and important area of English literature. Written, as the editors observe, 'to provide a moment in which listeners could enjoy verse, wit and song', they very much reflect the lively observation, love of detail and social awareness of the age of the novel. This volume includes 127 ballads, ranging from 'Admiral Benbow' and 'The Jolly Bacchanal' to 'The Bottle the Best Companion' and 'The Young Man's Fortune'. Reprinted from contemporary or near-contemporary broadsides in the Madden Collection at the University Library, Cambridge, the head and tail blocks, a distinguished feature of the original texts, are also reproduced for this edition. The introduction is designed to enable individuals to read the texts in perspective and with pleasure. The book further includes a select bibliography and an index of ballad titles. This book was first published in 1975.
