Aerodynamics, Aeronautics, and Flight Mechanics John Wiley & Sons

A self-contained in-depth treatment of aircraft performance, designed for a first course in aeronautical or aerospace engineering for undergraduate engineers. Provides an understanding of why conventional aircraft look and fly the way they do. This well written text covers turbofan and turboprop propulsion, subjects often avoided in other texts. New to the text is the treatment of wind effects on aircraft. Includes illustrative examples and references to practical piloting procedures and the significance of parameters.

Headaches in Women Cambridge Scholars Publishing

Designed for introductory courses in aerodynamics, aeronautics and flight mechanics, this text examines the aerodynamics, propulsion, performance, stability and control of an aircraft. Major topics include lift, drag, compressible flow, design information, propellers, piston engines, turbojets, statics, dynamics, automatic stability and control. Two new chapters have been added to this edition on helicopters, V/STOL aircraft, and automatic control.

Introduction to Aircraft Performance, Selection, and Design McGraw-Hill

Women suffer from headaches far more than men. According to the World Health Organization, migraine is one of the most disabling medical conditions. The understanding of the pathophysiology of migraine has changed dramatically over the past decade, leading to more rational and targeted treatments. Since most migraineurs are young women, use of contraception, management of headaches with menstruation, pregnancy, lactation, and menopause are important issues addressed in this text. Headaches are often inherited, and, as such, the book also discusses genetic issues, particularly relevant in this era of customized medicine. The hormonal management of transgenders is important as many will experience severe headaches during their transitions. Comorbidities, including psychiatric syndromes and strokes, are also presented in detail. This text will be of interest to all practitioners who manage women with headaches.

Each volume deals with different aspects of the properties, composition, uses and testing of concrete. With worked examples, case studies and illustrations throughout, this series will be a key reference for the concrete specialist for years to come. Expert international authorship ensures the series is authoritative Case studies and worked examples help the reader apply their knowledge to practice Comprehensive coverage of the subject gives the reader all the necessary reference material

Formula 1

For the second year running, the young German driver Sebastian Vettel and his Red Bull team were virtually unrivalled, claiming both the Drivers' and the Constructors' World Championship titles. Only

Jenson Button and Lewis Hamilton, both driving for McLaren, put up anything of a fight, while Fernando Alonso in the Ferrari had to settle for a single victory in the British GP at Silverstone. In technical terms, the 2011 season was characterised by the use of a mobile rear wing, the return of Kers and Pirelli as sole tyre supplier. An unmissable annual event for over 10 years, Giorgio Piola's review returns once again with the well-known illustrator and TV commentator analysing the different phases of the technical development undertaken by the various teams during the championship, with brief but exhaustive texts complemented by hundreds of colour technical drawings. The book is completed with an extensive section devoted to the leading cars for the 2012 season.
