Historic North American Locomotives traces the historic development of North American locomotives from the early 1800s through today. Considered a photographic book with the look and feel of fine art, 100 locomotives are profiled using descriptive text and richly detailed and colored photographic imagery. A well-researched introduction provides the reader with a historical perspective. The author/photographer includes high-quality photographs, created through various techniques that vividly capture the distinctive features of the locomotives. From the 1805 Trevithick portable boiler to modern, high-speed locomotives such as the 2013 GE Genesis, the reader will enjoy viewing a variety of locomotives that are not usually shown together in one book.

In 1877, Ephraim Shay designed a steam locomotive that featured a side-mounted set of cylinders. These in turn drove longitudinal shafts, which powered the wheels of both the locomotive and tender. This  $\zeta$  geared locomotive  $\zeta$  developed terrific tractive effort. The Lima Locomotive Works of Ohio, produced the first Shay locomotive in 1880. A little more than two decades later, when this catalog was produced, the company was producing three different classes of Shays. The last engine was built in 1945 and still operates at the Cass Scenic Railroad in West Virginia. This reproduction catalog is a wonderful resource for the model railroader, train spotter, and rail enthusiast.

In 1877, Ephraim Shay came up with a radical design for a logging locomotive that featured a side-mounted set of cylinders. These drove drive shafts, which powered the wheels of both the locomotive and tender. This "geared locomotive" offered a distinct advantage, in that the entire weight of the engine developed traction. The Lima Locomotive Works of Lima, Ohio, produced the first Shay in 1880. Less than a decade later, the company was producing five different types of Shays, and shipping them throughout the world. The last Shay was built in 1945. Lima produced its last steam engine in 1949, and merged with Baldwin in 1951. This book is a reproduction of two vintage catalogs from the Lima Locomotive Works. The first shows Lima's line of Shay locomotives circa 1921. The second is a spare parts catalog with maintenance information. Featuring descriptive text and photos, this book is a wonderful resource for anyone interested in the age of steam.

The geared locomotive is important in the history of logging. It mechanized the transport of logs from forest to mill. The Willamette is but a footnote with only 33 ever built. Its impact belies the small number; it brought innovations later copied by the big players: Shay and Heisler. A useful and worthy contribution to the history of rail and logging. In 1880, ancient-growth forest still covered two-thirds of West Virginia, but by the 1920s lumbermen had denuded the entire region. Ronald Lewis explores the transformation in these mountain counties precipitated by deforestation. As the only state that lies entirely within the Appalachian region, West Virginia provides an ideal site for studying the broader social impact of deforestation in Appalachia, the South, and the eastern United States. Most of West Virginia was still dominated by a backcountry economy when the industrial transition began. In short order, however, railroads linked remote mountain settlements directly to national markets, hauling away forest products and returning with manufactured goods and modern ideas. Workers from the countryside and abroad swelled new mill towns, and merchants ventured into the mountains to fulfill the needs of the growing population. To protect their massive investments, capitalists increasingly extended control over the state's legal and political systems. Eventually, though, even ardent supporters of industrialization had reason to contemplate the consequences of unregulated exploitation. Once the timber was gone, the mills closed and the railroads pulled up their tracks, leaving behind an environmental disaster and a new class of marginalized rural poor to confront the worst depression in American history.
