The Heisler steam locomotive  
was the other popular and  
well-known geared design  
built in the late 19th century.  
However, likely due to the fact  
that it did not hit the market  
until the early 1890s, a few  
years after the Climax and  
Shay had already begun  
production (the Shay was first  
built in 1880), it was not as  
successful.

The Cass rail-logging era  
(1901-1960) involved 17  
Shays – including up to 12  
simultaneously, and a

---

rather short-lived Climax.  
The first locomotive – Class 40-2 Shay, No. 1 (first 1) – arrived and entered service in late December 1900. The most notable Cass Shay was No. 12, a Class 150-3 engine.

Shay #2: This locomotive (Class PC-13) was built in July of 1928 by the Lima Locomotive Works (Pacific Coast Shay) for the Mayo Lumber Company of Paldi, Vancouver Island, British Columbia. It later worked for Lake Logging Company, Cowichan Lake British Columbia & Western Forest Industries, and at Honeymoon Bay, B.C. before its acquisition by Cass Scenic Railroad in the 1970s.

21 Best Shay Locomotive images | Locomotive, Old trains ...

A geared steam locomotive is a type of steam locomotive which uses gearing, usually reduction gearing, in the drivetrain, as opposed to the common directly driven design.. This

gearing is part of the machinery within the locomotive and should not be confused with the pinion that propels a rack locomotive along the rack between the rails. The geared steam locomotives that have been built have ...
