"Tiger-Lilies is actually a somewhat autobiographical book. In it, Lanier analyzes the relationship between a Northerner and a Southerner throughout the Civil War. As a Southerner who had fought for the Confederate army, Lanier had experienced the war firsthand, both on the battlefield and as a prisoner of war. These experiences are recognizable in the battle scenes especially, which are considered some of the most realistic representations of Civil War combat in literature. Ultimately, Tiger-Lilies can be interpreted as an anti-war novel and one of Lanier's less successful endeavors in the course of his career."--The History Engine.

Deviant Consumption in the Hebrew Bible Out of My Mind

A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

The 3rd Edition of *Literacy & Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

The Gettysburg Address is a speech by U.S. President Abraham Lincoln, one of the best-known in American history. It was delivered by Lincoln during the American Civil War, on the afternoon of Thursday, November 19, 1863, at the dedication of the Soldiers' National Cemetery in Gettysburg, Pennsylvania, four and a half months after the Union armies defeated those of the Confederacy at the Battle of Gettysburg. Abraham Lincoln's carefully crafted address, secondary to other presentations that day, was one of the greatest and most influential statements of national purpose. In just over two minutes, Lincoln reiterated the principles of human equality espoused by the Declaration of Independence and proclaimed the Civil War as a struggle for the preservation of the Union sundered by the secession crisis, with "a new birth of freedom" that would bring true equality to all of its citizens. Lincoln also redefined the Civil War as a struggle not just for the Union, but also for the principle of human equality. Beginning with the now-iconic phrase "Four score and seven years ago"—referring to the United States Declaration of Independence in 1776—Lincoln examined the founding principles of the United States as stated in the Declaration of Independence. In the context of the Civil War, Lincoln also memorialized the sacrifices of those who gave their lives at Gettysburg and extolled virtues for the listeners (and the nation) to ensure the survival of America's representative democracy: that "government of the people, by the people, for the people, shall not perish from the earth." Despite the speech's prominent place in the history and popular culture of the United States, the exact wording and location of the speech are disputed. The five known manuscripts of the Gettysburg Address in Lincoln's hand differ in a number of details, and also differ from contemporary newspaper reprints of the speech.

China has emerged as a member of the elite club of nations who are powerful at both global poles. Polar states are global giants, strong in military, scientific, and economic terms. The concept of a polar great power is relatively unknown in international relations studies; yet China, a rising power globally, is now widely using this term to categorize its aspirations and emphasize the significance of the polar regions to their national interests. China's focus on becoming a polar great power represents a fundamental re-orientation - a completely new way of imagining the world. China's push into these regions encompasses maritime and nuclear security, the frontlines of climate change research, and the possibility of a resources bonanza. As shown in this book, China's growing strength at the poles will be a game-changer for a number of strategic vulnerabilities that could shift the global balance of power in significant and unexpected ways.
