SEEMP brochure 4a - IRClass

What. A Ship Energy Efficiency Management Plan (SEEMP), is a ship specific document containing energy efficiency improvement measures identified by the Ship Owner, to be kept onboard each ship. A Ship Energy Efficiency Management Plan (SEEMP), being introduced as an operational measure, is a tool for monitoring ship and fleet energy efficiency performance over time and improving it with a PDCA (Plan Do Check Act) cycle. Ship Energy Efficiency Management Plan (SEEMP) Part I and II

The SEEMP is primarily intended to be a management tool for ship-board use and aims to improve the energy efficiency of ship operations. It is an IMO requirement to have a SEEMP on-board all existing and new applicable ships from 1st January 2013. SEEMP should be customised to the characteristics and needs of individual companies and ships; therefore it is a ship-specific plan.
